Introduction	The development, implementation and monitoring of a Service Delivery and Budget Implementation Plan (SDBIP) is required by the Municipal Finance Management Act (MFMA).
	In terms of Circular 13 of National Treasury, "the SDBIP gives effect to the Integrated Development Plan (IDP) and budget of the municipality and will be possible if the IDP and budget are fully aligned with each other, as required by the MFMA."
	As the budget gives effect to the strategic priorities of the municipality it is important to supplement the budget and the IDP with a management and implementation plan.
	The SDBIP serves as the commitment by the Municipality, which includes the administration, council and community, whereby the intended objectives and projected achievements are expressed in order to ensure that desired outcomes over the long term are achieved and these are implemented by the administration over the next twelve months.
	The SDBIP provides the basis for measuring performance in service delivery against quarterly targets and implementing the budget based on monthly projections.
	Circular 13 further suggests that "the SDBIP provides the vital link between the mayor, council (executive) and the administration, and facilitates the process for holding management accountable for its performance. The SDBIP is a management, implementation and monitoring tool that will assist the mayor, councillors, municipal manager, senior managers and community."
	The purpose of the SDBIP is to monitor the execution of the budget, performance of senior management and achievement of the strategic objectives set by council. It enables the municipal manager to monitor the performance of senior managers, the mayor to monitor the performance of the municipal manager, and for the community to monitor the performance of the municipality. In the interests of good governance and better accountability, the SDBIP should therefore determine and be aligned with the performance agreements of the municipal manager and senior managers.
	The development, implementation and monitoring of a Service Delivery and Budget Implementation Plan (SDBIP) is required by the Municipal Finance Management Act (MFMA).
Las fala fras	In terms of Circular 13 of National Treasury, "the SDBIP gives effect to the Integrated Development Plan (IDP) and budget of the municipality and will be possible if the IDP and budget are fully aligned with each other, as required by the MEMA."
Legislation	According to the Municipal Finance Act (MFMA) the definition of a SDBIP is: 'service delivery and budget implementation plan' means a detailed plan approved by the mayor of a municipality in terms of section 53 (1)
	(c) (ii) for implementing the municipality's delivery of municipal services and its annual budget, and which must indicate-
	 (a) projections for each month; (i) revenue to be collected by source;
	(ii) operational and capital expenditure by vote;
	(b) service delivery targets and performance indicators for each quarter.
	Section 53 of the MFMA stipulates that the Mayor should approve the SDBIP within 28 days after the approval of the budget. The Mayor must also ensure that the revenue and expenditure projections for each month and the service delivery targets and performance indicators as set out in the SDBIP are made public within 14 days after their approval.
	The following National Treasury prescriptions as minimum requirements that must form part of the SDBIP are applicable to the Municipality :
	 (1) Monthly projections of revenue to be collected by source. (2) Monthly projections of expenditure (operating and capital) and revenue for each vote.
	(3) Quarterly projections of service delivery targets and performance indicators for each vote.
	(4) Ward information for expenditure and service delivery.(5) Detailed capital works plan broken down per ward for three years.
	* Section 1 of the MFMA defines a "vote" as: a) One of the main segments into which a budget of a municipality is divided for the appropriation of money for the different departments or
	functional areas of the municipality; and b) which specifies the total amount that is appropriated for the purposes of the department or functional area concerned.
	Section 28 of the Municipal Finance Management Act deals with adjustments budgets. In terms of the Act, an adjustments budget is intended
	to do the following: Sub-Section 2 a) Must adjust the revenue and expenditure estimates downwards if there is material under-collection of revenue during the current year b) May appropriate additional revenues that have become available over and above those anticipated in the annual budget, but only to revise or accelerate spending programmes already budgeted for c) May, within a prescribed framework, authorise unforeseeable and unavoidable expenditure recommended by the mayor of the municipality d) May authorise the utilisation of projected savings in one vote towards spending under another vote e) May authorise the spending of funds that were unspent at the end of the past
	financial year where the under-spending could not reasonably have been foreseen at the time to include projected roll-overs when the annual budget for the current year was approved by the council f) May correct any errors in the annual budget; and g) May provide for any other expenditure within a prescribed framework

Methodology and Content	National Treasury directives are clear on the contents and methodology to derive at the SDBIP. As a first step, the IDP objectives need to be quantified and related into key performance indicators. The budget is aligned to the objectives, projects and activities to enable the SDBIP to serve as monitoring tool for service delivery. The SDBIP is described as a layered plan. The top layer deals with consolidated service delivery targets and time frames. Top Management is held accountable for the implementation of the consolidated projects and Key Performance Indicators. From the consolidated information, top management is expected to develop the next level of detail by breaking up outputs into smaller outputs and then linking and assigning responsibility to middle-level and junior managers.
	The SDBIP of the Greater Letaba Municipality consists of strategic objectives derived from the IDP that are aligned with the strategic intent of the organisation. Strategic indicators with targets are set to measure the objectives. The Municipal Manager takes responsibility for the strategic indicators and objectives which will form part of his/her Performance Agreement and Plan. Projects and activities are aligned to the indicators with quarterly targets, time-frame and budget assigned to each.
	The Strategic Indicators give rise to the institutional indicators for which the Directors will take responsibility. These indicators will form part of the Performance Agreements and Plans of Senior Managers (Directors). Indicators are assigned quarterly targets and responsibilities to monitor performance.
	Derived from this, the next layer is developed, whereby the details with responsibilities for the next level of management is outlined and forms part of the Lower SDBIP. This lower SDBIP is a management tool for the S57 Managers and need not be made public and is a separate document for each internal department.
	The SDBIP serves as a management, implementation and monitoring tool that will assist the Mayor, Councilors, Municipal Manager and Directors in delivering services to the community

Vision and Mission	The strategic vision of the organisation sets the long term goal the Municipality wants to achieve. The vision of Greater Letaba Municipality is:
	"To be an outstanding agro-processing and eco-cultural tourism hub".
	The strategic mission speaks about what the purpose of Greater Letaba Municipality is:
	The mission of Greater Letaba Municipality is to ensure an effective, efficient and economically viable municipality through: Provision of accountable, transparent, consultative and co-operative governance. Improving the quality of life through economic development and poverty alleviation. Provision of sustainable services.
	Ensuring a safe and healthy environment.
Strategy map	The Strategy Map depicts the strategic objectives on how Greater Letaba Municipality will be able to become an outstanding agro-processing and eco-cultural tourism hub while providing sustainable and affordable services to all. These objectives were positioned in terms of the Balanced Scorecard Perspectives being: Learning and Growth; Institutional Processes; Financial results and Community Satisfaction. All operational outputs (projects, initiatives and process) as contained within the SDBIP are aligned to the attainment of one or more of these objectives.

Votes and	Votes	Objectives and Targets
Operational objectives	Municipal Manager Office (Vote 0040)	To lead, direct and manage a motivated and inspired administration and account to the Greater Letaba Municipal Council as Accounting Officer for long term municipal sustainability to achieve a good creditor rating within the requirements of the relevant legislation and whereas the following sections within the department, i.e. HIV/Aids, Youth, Disabled and Gender Desk, Communication and Internal Auditing is managed for integration, economic growth, marginalised poverty alleviation, efficient, economic and effective communication and service delivery.
	Finance (Vote 0050)	To secure a sound and sustainable management of the financial affairs of Greater Letaba Municipality by managing the budget and treasury office and advising and if necessary assisting the Accounting Officer and the Directors in their duties and delegation contained in the MFMA. Ensuring that the Greater Letaba Municipality is 100% financially viable when it comes to cost coverage and to manage the grant revenue of the municipality so that no grant funding is foregone
	Community Services (Vote 0028)	To co-ordinate Environmental Health Services, Sports Arts and Culture, Education, Libraries, Safety and Security, Environmental and Waste management, Health and Social development programmes as well as Disaster management to decrease community affected by disasters
	Infrastructure Development and Economic Planning (Votes 0029 and 0022)	To ensure that the service delivery requirements for roads are met and maintenance of water, sewerage and electricity are conducted for access to basic services as well as no less than an average of 100% MIG expenditure
		To direct the Greater Letaba Municipality's resources for advanced economic development and investment growth through appropriate town and infrastructure planning in order that an environment is created whereby all residents will have a sustainable income.
	Corporate Services (Vote 0046)	To ensure efficient and effective operation of council services, human resources and management, legal services and the provision of high quality customer orientated administrative systems. Ensuring 100% compliance to the Skills Development Plan.
