Vision, Mission and Values

Vision

“To be the leading municipality in the delivery of quality services for the promotion of socio-economic development”

Mission

To ensure an effective, efficient and economically viable municipality through:

- *Promotion of accountable, transparent and consultative and co-operative governance;*
- *Promotion of local economic development and poverty alleviation;*
- *Provision of sustainable and affordable services and*
- *Ensuring a compliant, safe and healthy environment.*
- *Utilisation of smart technology*

Slogan

“Maatla go Setšhaba”

Values

The values of Greater Letaba Municipality are in the table follows:

VALUES	DESCRIPTION
Teamwork	Mean that Greater Letaba Municipality representatives will cooperate, using their individual skills and providing constructive feedback, for the achievement of the municipality vision and mission. Is a combined effort, or the actions of a group, to achieve a common purpose or goal
Commitment	The state or quality of being dedicated to a cause or activity. Willingness to give time and energy to the municipality activities
Integrity	Living this value means that Greater Letaba Municipality representatives will display behaviour, attitudes and actions informed by honesty, commitment to the company, its policies, procedures and processes.
Value for money	Living this value means that Greater Letaba Municipality representatives ensure that the municipality has obtained the maximum benefit from the goods and services it both acquires and provides, within the resources available to it

VALUES	DESCRIPTION
Consultation	Living this value means Greater Letaba Municipality representatives will seek and give advice, information, and/or opinion, usually involving a consideration
Transparency	The obligation to act in an open and transparent manner.
Accountability	The obligation to account. To take responsibility for one's actions.
Courtesy	The obligation to show politeness in one's attitude and behaviour towards others
Innovation	Living this value means that Greater Letaba Municipality representatives should translate ideas or invention into a goods or services that creates value for the municipality and the community it serves

MAYOR'S FOREWORD

As we draw closer to the end of the 2021 term of council, we are reminded of the journey we have travelled, the challenges and possibilities.

When we first adopted the 2022 IDP, the municipality was almost bankrupt and passing an unfunded budget. It has quite been a journey to experience in this difficult terrain of planning while delivering quality services to the people of Greater Letaba with the support of stakeholders, Committees and all role players in the development of a five year plan in the form of an IDP.

We continue to spearhead the call for change when it comes to economic emancipation, full access to government services and the freedom to understand the long road still ahead in achieving all of that.

We still say that Integrated Developmental Plan is an overarching tool to guide planning, development and decision-making processes of our municipality. With the powers entrusted in me by the community of Greater Letaba Municipality holding the helm in having the advantage to make immense contribution in the lives of residents of this municipality through provision of government services.

Our greatest call is making sure that the Integrated Development Plan is able to guide development and respond to the plight of our people through implementation of the plans. We continue to serve our people as they still regard us to be the correct leaders to steer them in the direction of complete access to services due to them.

Proper coordination that includes planning, budgeting, implementation, and monitoring will see our people get a fair slice of our hard work. Having properly laid out the IDP document that syncs perfectly with the SDBIP and translates into budget will see this administration resonate positively with the needs on the ground.

We cannot shy away from the limited resources we have, hence realizing our vision and mission will confirm correct usage of government resources. We are alive to the realities of the disaster and floods that we have had to respond to as a municipality and we continue to ensure that resources respond adequately to the needs of our people. We still need to come up with innovative ways to properly prioritize on projects and programmes that will have positive spin offs for our people.

Regular engagement with community members will assist in making sure that the IDP document is aligned with the needs on the ground.

As we move forward to implement our plans, we call upon all stakeholders to help us realize our goals by moving in the same direction with us.

Cllr. MAMANYOHA T.D

MAYOR

EXECUTIVE SUMMARY

Legislative framework and Section 25 of the municipal systems Act makes it mandatory for the municipalities to embark in a process of developing an Integrated Development Plan that must be aligned with the term of office of the council. To ensure responsiveness of the municipality to the needs that are articulated and prioritized by the people themselves, the IDP is reviewed on an annual basis.

The 2026 IDP review is conducted in line with the MTDP and also respond to the material changes happening in the society. The IDP encompasses the analysis phase which depicts the current state of socio-economic circumstances of the municipality and strategy phase that determines the strategies which needs to be developed to respond to the needs of the municipality.

There structures that have been put in place to prioritize projects that are espoused in the IDP as informed by people's priorities and to deliver quality services as enshrined in the mission of the municipality.

It is the responsibility of the municipality to implement projects budgeted for in the 2026/2027 and ensuing financial years. The council must account to the community on successes and failures on implementing the SDBIP through the appropriate structures and mechanisms that have been put in place to ensure performance and fulfillment of the constitutional mandate.

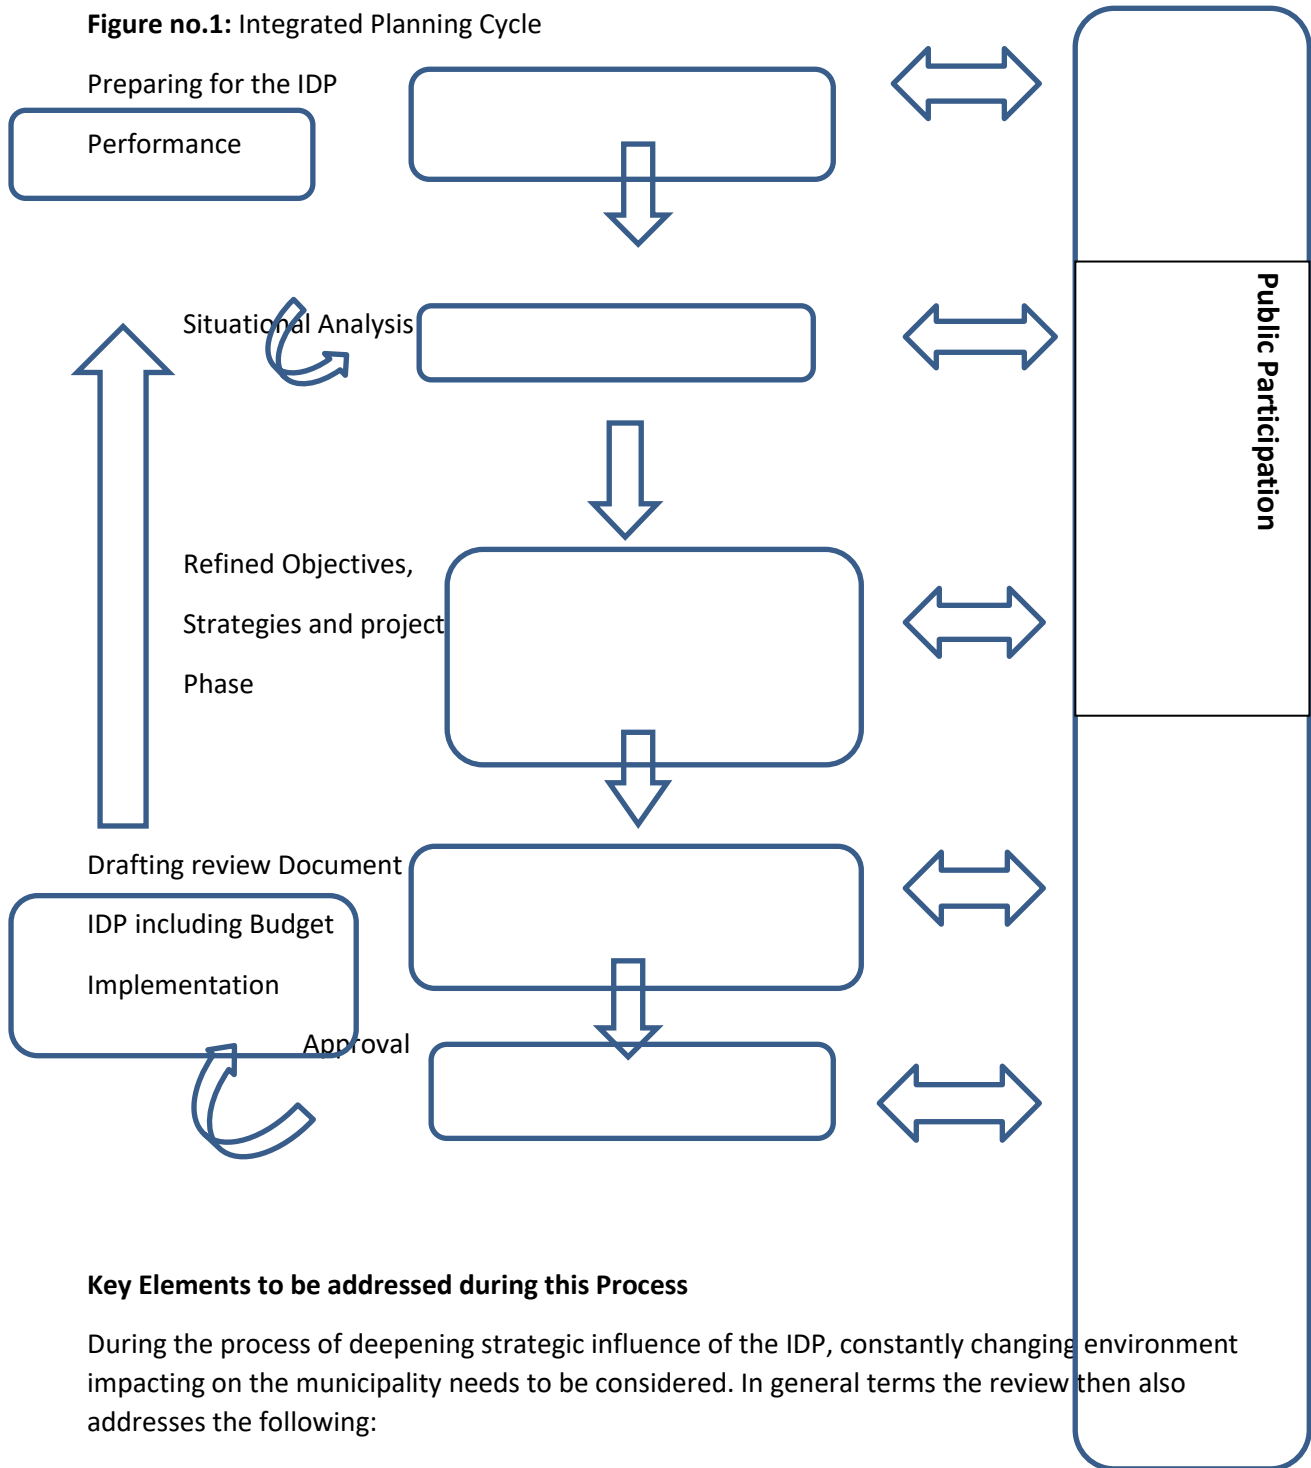

SEWAPE M.O

MUNICIPAL MANAGER

Integrated Planning Cycle

Greater Letaba Municipality IDP process takes into account situations that impact on the priority issues, objectives, strategies, projects and programme of integrated planning as reflected below in figure 1.

Figure no.1: Integrated Planning Cycle

Key Elements to be addressed during this Process

During the process of deepening strategic influence of the IDP, constantly changing environment impacting on the municipality needs to be considered. In general terms the review then also addresses the following:

- Incorporation of comments from various role player;
- Incorporate comments from Provincial MEC;

- Review and inclusion of new/additional information;
- Weakness through self-assessment;
- Alignment of Sector plans and
- Alignment of Provincial Programme and policies.

Strategic Objectives

COGHSTA has identified Key Performance Area (KPA) whereby the strategic agenda can be implemented and monitored. Of critical nature for the municipality will be to link its strategic objective to the strategic agenda of national government. The table below provides the details whereby the strategic objective of the municipality can be linked to the five Key Performance Areas as stipulated by the Department of Local Government and Housing:

Table no.1: Strategic Alignment

KPA	Outputs (Outcome 9)	Strategic Objective
Municipal Transformation and Organisational Development	Differentiate approach to municipal financing, planning and support	Improved quality of life Improved Human Resource
Basic Services and Infrastructure Development	Improved access to basic services Support Human settlement	Access to sustainable quality basic services. Integrated sustainable Human settlement
Local Economic Development and Spatial Rationale	Implementation of community work programme Land acquisition for low income and affordable housing	Improved and inclusive local economy Integrated sustainable development Integrated human settlement
Municipal Financial Viability and Management	Improve municipal financial and administrative capability	Sustainable financial institution
Good Governance and Public Participation	Refine ward committee model to deepen democracy Single coordination	Effective and efficient community development

Municipal Future Plans

- Ensure that all communities have access to clean portable water by 2025/2026;
- Provide universal waste removal to all communities;
- Integrated Human Settlement in Ga-Kgapane and Mokgoba;
- Effectively deal with communicable and non-communicable disease;
- Strengthen community participation and IGR;
- Integrated planning and service provision in rural areas;

- Increase revenue base;
- Facilitation of economic activities in both urban and rural areas;
- Provide access to housing;
- Provide infrastructure that is conducive for economic development and growth;
- Create job opportunities and reduction of poverty;
- Ensure that all communities have access to electricity and
- Acquire more resources to provide and maintain the existing and proposed infrastructure.

Monitoring of the Progress

In terms of the Municipal Finance Act No 56 of 2003 section 1 maintain that the Mayor of the municipality should approve a Service Delivery Budget Implementation Plan (SDBIP) each financial year. SDBIP should show monthly projections; revenue collected indicating sources, operational and capital expenditure by vote and indicates delivery targets and performance indicators. The municipality recognises the fact that a well-designed SDBIP will generate a good performance management system. Therefore, the municipality develops and adopts SDBIP on an annual basis. The SDBIP is divided into four quarters, monitoring and evaluation is done on quarterly basis.

The SDBIP is an operational plan that clearly outlines Key Performance Indicators, Objectives, Timeframes, Outputs, Outcome and Strategies for each programme and projects. The SDBIP is informed by the IDP and Budget. Municipal System Act No.32 of 2000, Chapter 6 compels municipalities to establish performance management system that is:

- Commensurate with its resource;
- Best suited to its circumstances;
- In line with the priorities, objectives and
- Indicators and targets contained in the IDP.

The municipality has established the performance management system, which monitors, measures, and review performance on regular basis as outlined below:

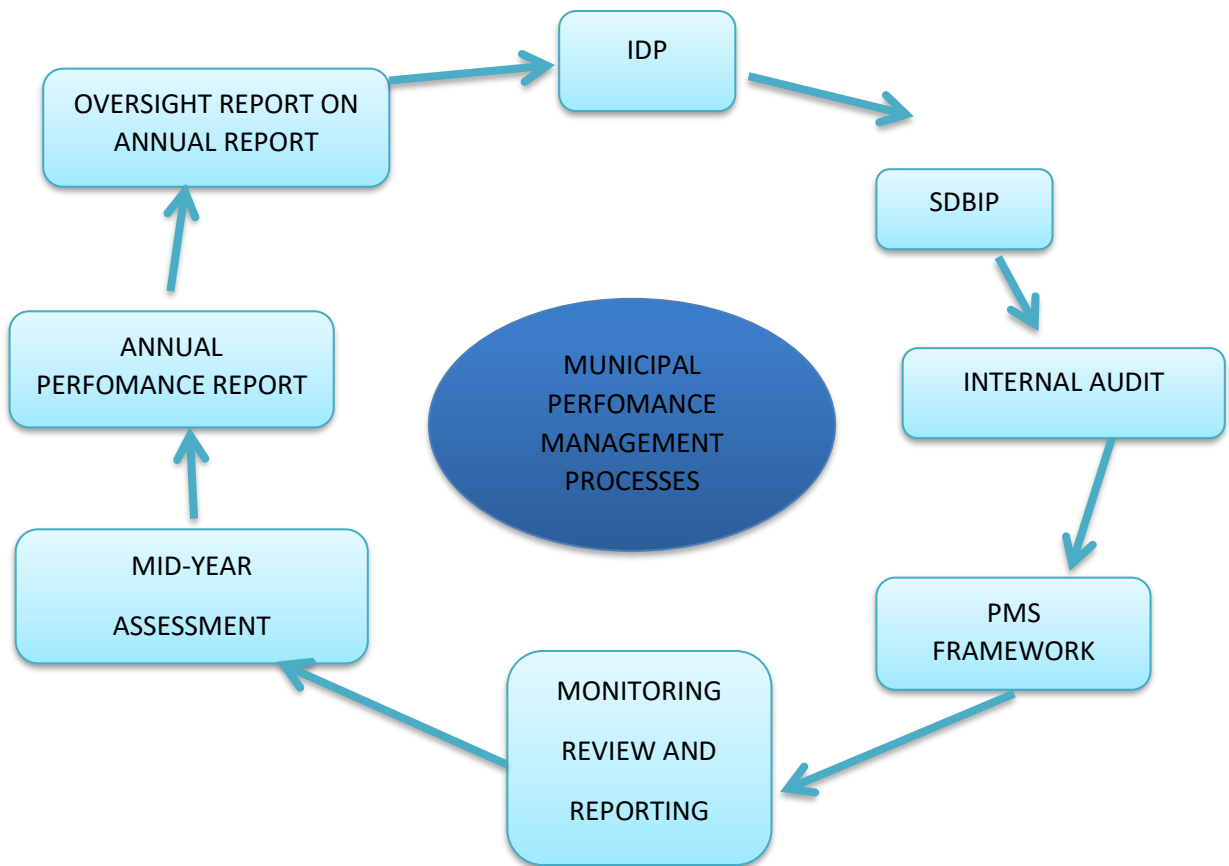

Figure no. 2: SDBIP system

1. PLANNING FRAMEWORK

1.1. Introduction

In this section, we provide a brief overview of (1) legislative context within which the 2025/2026 IDP document is developed, (2) institutional arrangement that are in place to drive the IDP process, (3) process overview in terms of steps and events (4) and inter-governmental relations protocol that would assist in the alignment, coordination and integration of service delivery programme in the municipality.

1.2. Legislative Background

The constitution of the Republic of South Africa (Act 108 of 1996) is the supreme law of the country and fundamentally aims to protect human rights and promote democratic governance. It therefore provides for a new approach to government on national, provincial and local government levels.

The new constitutional model redefines the relationship between the three spheres of government by replacing the system of the vertical hierarchy of tiers with three overlapping planning processes and sets of plans, each relating to a different sphere of the government.

The white paper on Local government expects from municipalities to be working with citizens and groups within the communities to find sustainable ways to meet their social, economic and material needs and improve the quality of their lives. Integrated Development Planning reinforces this aim through the system of the government. IDP is, thus not just another planning exercise, but will essentially link public expenditure to community priorities which are interpreted through vision, mission and strategies.

The municipal System (Act 32 of 2000) defines the IDP as one of the core functions of municipality and makes it legal requirements for every municipal council to adopt a single, inclusive and strategic plan (IDP) for the development of its municipality. This plan should link, integrate and coordinate plans and take into account community proposals for development of the municipality, it should also align the municipalities.

Resources and capacity with the implementation of the plan, it should form the policy framework and general basis on which annual budget must be based; and be compactable with national and provincial development plans and planning requirements.

Other laws that provide guidelines for the development of IDP's include:

- National Health Act, 2003;
- The Local Government Transition Act Second Amendment Act 1996 (Act 97 of 1996), which requires each local authority to compile an Integrate Development Plan for their jurisdiction;
- The Municipal Demarcation Act 1998 that provide the spatial framework for the on-going demarcation process;
- The Municipal Structure Act, 1998 that defines the institutional setting for municipalities and describe their core function and responsibility;
- Municipal System Act 32/2000 which defines the operation of the municipalities,
- Municipal Finance Management Act 1998;

- The National Environment Management Act, 1998;
- Regulations passed in term of the National Environment Management Act, 1998;
- The Water Service Act, 1997;
- National Water Act, 32 of 1998;
- Mineral and Petroleum Resource Development Act (MPRD) No 28 of 2002;
- Waste Act, 2008;
- Fire brigade services Act No.99 Of 1987 and
- Disaster management Act no: 57/2002.

1.3. Framing the 2026/2027 IDP

The IDP was prepared within the legal and policy requirements, opportunities provided and challenges posed by the local, provincial and national context.

1.4. The National Planning Context

The Greater Letaba Municipality is aware of the critical challenges facing the country as a whole, as well as the strategies priority areas to meet those challenges.

The government has identified priority areas for the next years:

- Creation of decent work and sustainable livelihoods;
- Education;
- Health; Water
- Rural development, food security and land reform and
- Fight against crime and corruption.
- Gender based violence
- Economic Reconstruction and Recovery

In order to achieve these objectives, the performance and developmental impact of the state will have to vastly be improved.

While capacity building, better systems, a greater focus on implementation and improved performance management will play a key part in this endeavour, integration, alignment and synergy between the actions of three spheres government are important

As decided by Cabinet around aligning the NSDP, LEGDP and IDPs the keys to this activity is ensuring that the three spheres of government use the common platform of "need/poverty" and "developmental potential" as espoused in the NSDP to analyse the space economy of their areas of

jurisdiction. In addition to this decision it requires for the role of the IDPs of the municipalities in determining and structuring public investment and development spending to be drastically strengthened. This means that municipalities should play a greater role in determining priorities and resources allocation to respond to the triple challenge of poverty, inequality and unemployment. The IDPs have to become far more decisive on the areas of need and development.

1.5. The National Development Plan

National Development Plan (NDP) offers a long term perspective. It defines as a destination and identifies the role of different sectors of the society that need to play in reaching the goal. Then NDP aims to eliminate poverty and reduce inequality by 2030.

According to the plan South Africa can realize these goals by drawing energy of its people, growing inclusive economy, building capabilities, enhancing the capacity of the state, prompting leadership and partnership throughout the society.

NDP objectives are:

- Increasing employment by 13m in 2010 to 24m in 2030;
- Raise per capita income from 50 000 in 2010 to 120 000m by 2030;
- Establish a competitive base of infrastructure, human resources and regulatory framework;
- Broaden ownership of assets to historical disadvantaged groups;
- Increase quality of education;
- Provide access to quality health care;
- Establish effective, safe and affordable transport;
- Ensure households food and nutrition security;
- Realise a food trade surplus, with one third produced by small scale farmers or households and
- Play a leading role in continental development, economic integration and human rights.

1.6. New Growth Path Framework

The Framework details government approach to job creation, reducing inequality and defeating poverty and it calls for:

- A more inclusive and greener economy;
- Government to prioritize its efforts and resources to support employment creation and equity;
- Business to take a challenge to invest in new areas and
- A vision to achieve more developed democratic, cohesive and equitable society.

1.7. The Provincial Planning Context

The primary influencing factor in the provincial domain is the LEGDP. The LEGDP sees the competitive advantage of the province in mining, agriculture, tourism and manufacturing. Clustering

is viewed as key to success in these sectors. In case of the district, the strategy emphasis investments in agriculture, forestry, tourism and to a lesser extent, trade. In order to give effect to the strategic objectives, as spelled out in the electorate mandate of the ruling party (the African National congress).

The provincial government of Limpopo has contextualized ten priority areas, as contained in the medium term strategic framework into key strategic priorities which will guide service delivery for the next five years.

Limpopo Employment, Growth and Development Plan (LEGDP) Focuses On:

- Ensuring more inclusive economic growth, decent work and sustainable livelihoods;
- Economic and social infrastructure;
- Rural development, food security and land reform;
- Access to quality education;
- Improved health care;
- Fighting crime and corruption;
- Cohesive and sustainable communities;
- Creation of better world and better Africa and
- Sustainable resource management and use.

The LEGDP also argues that IDP's should, in addition to the municipal focused on consider wider provincial and national issues. It also mentions that IDP's should strike a between interventions focused on addressing the social of citizens and promotion of economic growth. The LEGDP emphasizes on decent work and sustainable livelihoods as the foundation of the fight against poverty and inequality and its promotion should be the cornerstone of all the efforts.

1.8. The Local Planning Context

At the local level, a number of fundamental issues impact on the planning processing of the GLM. Firstly, the municipality is informed by national, provincial and district programmes such as ASGISA, NSDP, LEGDP, the district Growth and development summit (DGDS). Secondly, and most important its geographical location and key features such agro-processing and tourism if optimally utilised may see the rapid development.

The 2025/26 IDP is a continuation of the drive towards the alleviation of poverty over a short term and eliminating of endemic poverty over the longer period. This IDP also focuses on the presidential call around the alignment of the national spatial development perspective (NSDP), New District Development Model, Limpopo Employment growth and development plan (LEGDP) and Municipalities IDPs.

1.9. Alignment between IDP, Budget and PMS

It terms of the Municipal Systems Act; municipalities are required to prepare organisational performance management system that must be linked to the IDP. Extra efforts are needed to make sure that the process of aligning the IDP, Budget and Performance Management System (PMS) is done as per legislation requirements. The PMS should be linked and guided by the IDP and Budget.

The IDP, performance management systems and budget are all components of one overall development planning and management system:

The IDP set out what the municipality set to accomplish and how it will do it;

The PSM enable the municipality to check to what extent it is achieving its aims and

Budget provides the resources to achieve the municipal aims.

The linkage of the three processes is summarized in the following diagram:

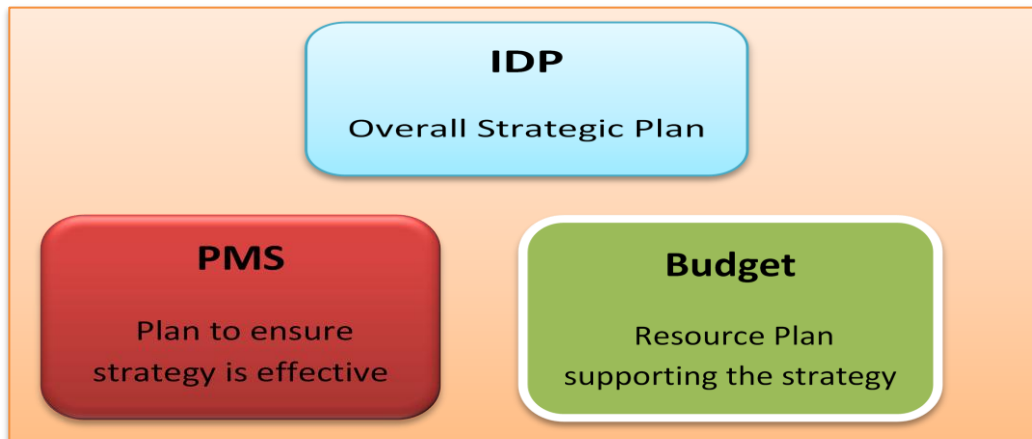

Figure no.3: Linkage of the IDP, PMS and Budget

1.10. Greater Letaba Municipality's Powers and Functions

- The provision and maintenance of child care facilities;
- Development of local tourism;
- Municipal planning;
- Municipal roads and public transport;
- Administer public regulations;
- Administer billboards and display of advertisements in public areas;
- Administer cemeteries, funerals parlours and crematoriums;
- Cleansing;
- Control of public nuisances;
- Control of undertakings that sell liquor to the public;
- Ensure the provision of facilities for the accommodation, care and burial of animals;
- Fencing and fences;

- Licensing and dogs;
- Licensing and control of undertakings that sell food to public;
- Administer and maintenance of local amenities;
- Development and maintenance of local sport facilities;
- Develop and administer markets;
- Development and maintenance of municipal parks and recreation;
- Regulate noise pollution;
- Administer pounds;
- Development and maintenance of disposal;
- Administer street trading;
- The imposition and collection of taxes and surcharges on fees as related to the municipal's function;
- Receipt and allocation of grants made to the municipalities;
- Imposition and collection of other taxes, levies and duties as related to the municipalities functions and
- Refuse removal, refuse dumps disposal.

2. IDP PROCESS PLAN

2.1. Introduction

Section 28 of the Municipal Systems Act, Act 32 of 2000 requires that each Municipal Council adopts a process plan that would guide the planning, drafting, adoption and review of the IDP and Budget. The Process Plan should have clear and established mechanisms, procedures and processes to ensure proper consultation with the local communities. It should indicate clearly how the IDP process will work, who will be responsible for what, time frames and milestones will be set and a budget will be aligned to the programme.

2.2. Content of the IDP Process Plan

This plan outlines the following:

- Mopani District Municipality framework.
- Structures that manage/drive the IDP.
- IDP/Budget Activities scheduled July 2025-June 2026
- Time scheduled for planning process.
- Roles and responsibilities.
- Public/community participation/involvement.

Stages/Phases of the IDP Process

IDP Phases	Activities
PREPARATORY July 2025	Identification and establishment of stakeholders and structures and sources of information.
ANALYSIS PHASE July-December 2025	Compilation of levels development and backlogs that suggest areas of interventions.
STRATEGIES PHASE January-March 2025	Reviewing the vision, mission, strategies and objectives.
PROJECTS PHASE October 2025-February 2026	Identification of possible projects and their fundings sources.
INTEGRATION PHASE January-February 2026	Sector plans summary inclusion and programmes of action.
Approval phase March-May 2026	<ul style="list-style-type: none"> - Submission of Draft IDP to Council - Roadshow on public participation - Amendments of Draft/Budget according to comments/ inputs, - Submission to council for approval and Adoption.

Table no.1: Stages/Phases of the IDP Process

2.3 Structures that manage/drive the IDP Process

The following table shows structures responsible to develop, review, implement and monitor the IDP process and has been aligned with that of the Mopani District Municipality.

Structure	Composition	Roles and Responsibilities
Council	Members of Council (Chair: Speaker)	Adopt the IDP Framework and Process plan.
Executive Committee	Mayor, Portfolio Heads, Municipal Manager, Directors, and IDP Manager (Chair: The Mayor)	<ul style="list-style-type: none"> • Provide political oversight in the development of the IDP • Assign responsibilities to Municipal Manager. • Deliberate and adopt IDP Framework and Process Plan. • Responsible for the overall management, co-ordination and monitoring of the planning process and drafting process, as delegated to the Municipal Manager and the IDP Technical Team. • Submit draft IDP to Council.
Portfolio Committee	Chairperson and members of Portfolio Committee (Chair: Head of Portfolio Committee)	<ul style="list-style-type: none"> • Manage the drafting of the IDP on behalf of the Executive Committee • Provide political oversight.
Ward Committees	Ward councillors; Ward committee members; Local Area Planning Facilitators (LAPs); and Community Development Workers (CDWs). Chair: Ward Councillor)	<ul style="list-style-type: none"> • Collect, discuss and prioritise ward needs. • Submit ward needs to IDP Unit Link the planning process to their respective constituencies, wards and Ward Committees. • Responsible for organizing public consultation and participation. • Ensure the annual business plans and municipal budget are linked to and based on the IDP. • Ensure the IDP is aligned with provincial and national departments' budgets.
IDP Steering Committee	Mayor, EXCO, Municipal Manager, All Sec 56 Managers, IDP Manager, PMS Manager & Budget Manager.	<ul style="list-style-type: none"> • Provide political oversight in the development of the IDP/Budget.

	(Chair: Mayor)	<ul style="list-style-type: none"> • Supervises the implementation of IDP/Budget planning process. • IDP/Budget consultation with various sectors. • Oversee that amendments made to the draft IDP/Budget are to the satisfaction of the Municipal Council. • Be responsible for the submission of the IDP/Budget to EXCO (for recommendation to Council) and MEC for CoGHSTA (for alignment). • Undertakes responsibilities, in response to proposals made by the MEC.
Municipal Manager	The Municipal Manager	<ul style="list-style-type: none"> • Oversees the whole process and takes responsibility therefore
IDP Manager	IDP Manager	<ul style="list-style-type: none"> • Managing the IDP process on a daily basis
Secretariat	Provided by the office of the Municipal Manager	<ul style="list-style-type: none"> • Records proceedings on a daily basic • Issue invites for all IDP meetings
IDP, Budget & PMS Representative Forum	Community structures, Non-profit making organisations, Traditional Leaders, Ward Councillors, Associations, Interest Groups, Government departments, Church leaders, Ward Committee Members and Mopani Sector Departments and Parastatals (Chair: The Mayor)	<ul style="list-style-type: none"> • Participate and ratify the completion of each phase of the IDP development and review process. • Represent the communities at strategic decision-making level.

Table no.2: IDP Structures, roles and responsibilities

2.3 IDP Process Overview for 2025-2026

The following are the activities that will be undertaken during Greater-Letaba Municipality IDP review.

Table no.3: Process Overview: Steps and events

Month	Activities	Time Frame	
		GLM	MDM
July 2025	Preparatory Phase: Identification of and establishment of stakeholders and or structures and source of information	July 2025	29 July 2025
August/September 2025	Analysis Phase: Management meets to discuss IDP Analysis Phase	14 August 2025	29 July-30 September 2025
	IDP Steering Committee: Analysis Phase	26 August 2025	Engagement Session:12-13 September 2025
	IDP Representative forum: Analysis phase	19 September 2025	
October 2025	Strategies Phase Management: Preparation for strategic planning session	10 October 2025	23 September 2025 to January 2025
January 2026	Strategic Planning Session: Strategies phase	21 -23 January 2026	Engagement Session 5 November 2025
	Management: consolidate strategic session discussion	04 November 2025	
	Projects Phase IDP Steering Committee: Projects phase	09 January 2026	
	IDP Rep Forum: Project Phase	06 February 2026	
	Integration Phase IDP Integration	20 February 2026	
February 2026	(Draft IDP) Management meeting: Draft IDP	06 March 2026	February 2026
March 2026	IDP Steering Committee: Draft IDP Discussion	13 March 2026	
	EXCO: consideration of the oversight report, draft IDP and Budget	20 March 2026	

	Council: Approval of the oversight report, draft IDP and Budget	27 March 2026	27 March 2026
	Submission of draft IDP to COGSTA for analysis, Publication of the draft IDP documents for inputs	03 April 2026	
April 2026	Public participation on draft IDP/ budget/ PMS	22 April 2026 to 04 May 2026	
	Approval Phase (Final IDP) IDP Steering committee: consideration of the inputs from the public participation process	29 April 2026	29 April- 13 May 2026
May 2026	Management: Effect changes to draft IDP and budget as per public comments and COGSTA	06 May 2026	29 May 2026
	IDP Rep Forum: Consider final Draft IDP/Budget	20 May 2026	
	EXCO: Final draft IDP/Budget	21 May 2026	
	Council Sitting: Approval of the Final Draft IDP and Budget	29 May 2026	
	Submit approved IDP/Budget CoGHSTA and District (within 10 working days after approval)	03 June 2026	

2.5. Public Participation

Greater Letaba Local Municipality will be responsible for monitoring its own IDP/Budget Process plan and ensure that the Framework is being followed as approved.

Monitoring mechanisms will include monthly progress reports on IDP/Budget implementation as per the SDBIP, submitted to the Mayor and quarterly IDP implementation reports to Municipal Council.

2.6. Publication of the Final IDP

- The System's Act requires that a summary of the IDP be made available to the public, within 14 working days from the date of final approval of the IDP.
- Copies of the IDP will be made available in all wards, local libraries and traditional offices.
- Copies of the IDP will be made available in both hardcopy and electronic forms to all Directorates within the Municipality.

- The IDP will also be published through the municipal website.
- Copies of the IDP will be sent to the District, Province, and National as per legislation.
- Potential investors and other IDP stakeholders will be afforded the opportunity to access the IDP, but only to the extent that the municipality can afford.

2.7. IDP Activity Flow

- The IDP Steering Committee shall be involved in the drafting of the Framework and IDP Process Plan
- The IDP Steering Committee shall submit the Framework and Process Plan to Portfolio Committee head.
- The IDP Steering committee shall further submit the Framework to the IDP Representative Forum through the Directorate
- The Portfolio Committee head of shall further submit the Framework and Process Plan to Executive Committee.
- Exco shall submit the Framework and Process Plan to Council
- The Municipal Manager shall facilitate the Steering Committee in the drafting of the IDP in all phases.
- Director Development and Town Planning and the Municipal Manager shall monitor the planning in all phases, ensuring involvement of communities and adherence to time frames throughout.
- The Draft IDP/Budget and PMS shall be submitted to the Portfolio Committee for oversight.
- The Draft IDP shall be submitted to EXCO for consideration.
- The Mayor shall submit the Draft IDP/Budget/PMS to the Council through the Portfolio head.
- The Mayor shall approve the SDBIP 28 days after the adoption of the Final IDP, Budget and PMS.

2.8. IDP Process Plan: Monitoring, Evaluation and Reporting

- Municipal Manager and the Portfolio Committee will be responsible for monitoring the Framework and Process Plan.
- The District IDP Office will monitor compliance with the District Framework and Process Plan
- Monthly progress reports will be submitted to Council through EXCO.

2.9. Inter-Governmental Relations

Office of the Premier (OTP) plays a central role IGR during the consultative processes of the IDP between the Greater Letaba, district municipality and sector department. MDM convenes and chairs

the forum with direct assistance from OTP. The forum comprises all sector departments, Coghsta, OTP and local municipalities within Mopani area of jurisdiction also in line with the DDM.

Greater Letaba also has a separate platform to interact with sector department during Representative forums. The district municipality is the convenor of the District Manager's forum, which is basically a key forum for strategic alignment, coordination and integration that serves as an IGR structure where the Sector Departmental Managers in the district meet with their municipal counterparts.

2.10. Conclusion

The Process plan adopted by Council shall be binding to all stakeholders in Greater Letaba Municipality and shall further provide transparency and accountability to the communities and stakeholders in Greater Letaba Municipality.

3. SITUATIONAL ANALYSIS

3.1 Description of the Municipal Area

The Greater Letaba Municipality (GLM) is situated in the north-eastern quadrant of the Limpopo Province within the Mopani District Municipality Area. Greater Letaba is bordered by Greater Tzaneen to the south, Greater Giyani to the east, Molemole to the west, and Makhado to the north. The “gates” to the municipal area are considered to be Sekgopo in the west and Modjadjiskloof in the south, Mamaila Kolobetona in the North and Makgakgapatse in the East. The land area of Greater Letaba Municipality extends over approximately 1891km². The Greater Letaba Municipality incorporates the proclaimed towns of Modjadjiskloof, and Ga-Kgapane, situated in the extreme south of the municipal area, and Senwamokgope towards the north-west of the area of jurisdiction. There are also 132 rural villages within the municipal area. The municipality consist of 30 wards.

Map: Greater Letaba Municipality Map

3.2 Demographic Profile

3.2.1 Greater Letaba Key Statistics

Name	2022	2011
Total population	261 038	213 932
Young children (0-14 years)	35,1%	34,5%
Working age population (15-64 years)	57,6%	58,5%
Elderly (65+ years)	7,4%	6,9%
Dependency ratio	73,7	70,8
Sex ratio	82,3	81,1
No schooling (20+ years)	23,7%	27,0%
Higher education (20+ years)	6,5%	5,8%
Number of households	65 220	58 612
Average household size	4,0	3,6
Formal dwellings	94,4%	91,8%
Flush toilets connected to sewerage	20,0%	10,2%
Weekly refuse disposal service	17,4%	8,5%

Name	2022	2011
Access to piped water in the dwelling	20,7%	10,1%
Electricity for lighting	97,0%	90,8%

3.3 Age and Gender Distribution

Graph no 1.: Sex and Age Distribution

4. SPATIAL RATIONALE

4.1 Purpose of Spatial Analysis

The purpose of the spatial analysis is to ensure that municipality's spatial strategies and land-use management decision is based on a general awareness of:

- Spatial constraints, problems and opportunities;
- Trends and patterns;
- The necessity for spatial restricting;
- The need for land reform and
- The spatial dimension for development issues

The Greater Letaba Municipal area has the following spatial characteristics:

- A land area with a radius of approximately 1 891km;
- A fragmented formal urban component comprising of Ga-Kgapane, Senwamokgope and Modjadjiskloof;
- The incidence of rural settlements is evenly spaced along the northern boundary and a lesser concentration of villages along the south-eastern boundary of the Municipality;
- The southern part of the municipal area comprises of mountainous terrain, which precludes urban development;
- Large tracts of arable land which are being used for intensive and extensive agricultural activities, these include tomatoes (central), timber (south and south east), game and cattle (central and north-west);
- Environmental degradation due to illegal dumping, inadequate sanitation facilities and overgrazing and
- Significant areas of land owned by the state under custodianship of tribal / traditional authorities.

There are three proclaimed towns within the Greater Letaba Municipal area, namely Modjadjiskloof, Ga-Kgapane and Senwamokgope. There is a process to develop Mokwakwaila to become the fourth township and that would increase economic development opportunities.

There is an opportunity for the municipality to start exploring possibility of expanding development in these townships but also assess areas where new township establishments can be established such as Modjadjiskloof Ext 4, Panorama and Kgapane.

4.2 Settlement Hierarchy

Settlement hierarchy of the municipality is usually based on the classification of individual's settlement as reflected below in the table:

Table no 12: Settlement Hierarchy

Type	Characteristics	Area
1 st Order Settlement	<ul style="list-style-type: none"> • Growth points. • Settlement located relatively close to each other. • Meaningful economic and social activities. • Services are available for potential business and • Higher level of services. 	Modjadjiskloof, Ga-Kgapane and Senwamokgope
2 nd Order Settlement-	<ul style="list-style-type: none"> • This group of settlements are located close to each other. • Have virtually no economic base. • The area has no infrastructure services and • Have a substantial number of people residing in this area. 	Mokwakwaila
3 rd Order Settlement	<ul style="list-style-type: none"> • The areas exhibit development potential based on population growth. • The areas are traditionally rural areas. • Have more than 500 inhabitants. • They don't form part of the cluster. • Most of these areas are relatively isolated in terms of surrounding settlement. 	Mapalle and Rotterdam

	<ul style="list-style-type: none"> • The potential of self-sustained development growth is limited and • Lack development opportunities. 	
4 th Order Settlement	<ul style="list-style-type: none"> • The settlements are traditional rural areas, whereby they are located in the manner that they are interdependent. • Settlements are linked together by social infrastructure e.g. (clinic, schools etc.) and • The settlements are small, and they have less than 1000 people per village. 	
5 th Order Settlement	<ul style="list-style-type: none"> • All small settlements are mainly rural villages, which do fall under 4th order of settlement. • No economic base in this area 	Motlhele

4.3 Land Use Composition and Management Tools-LUS and GIS

LUS determines and regulates the use and development of land in the municipal area in accordance with Town-Planning and Town Ordinance. Geographic Information System assists with the information regarding land development and upgrading, so the municipality has to upgrade the systems regularly.

4.4 Spatial Development Growth Points Areas

The table below indicates the growth points within the municipality.

Table no 13: Spatial Development Growth Points Areas

Provincial	District	Municipal
Modjadjiskloof	Ga-Kgapane Township	Mokwakwaila Senwamokgope

4.5 Land Claims and their Socio-Economic Implications

Greater Letaba has by far the majority of land claims (196); covering a land area of approximately 91812ha. At the moment 48% of the total area in the municipality is subjected to land claims. The extent of land claims in the municipality and the potential impact it may have depending on the outcome of investigations is quite substantial and may impact heavily on the Spatial Development Framework and other strategic plans.

Moreover, no development can take place on land that has been claimed until the claim is settled (unless such a claim has not been gazetted or if consent has been obtained from affected community(s); hampering development in all areas of the economy.

According to information received from the Land Claims Commissioner; only the land claim of the Pheeha, Rakwadu and Tshwale Communities have been settled by providing alternative land. The status of other land claims in the area has been investigated and notable progress has been observed.

Table no 14: Status of Land Claims

Total number of claims lodged	196
Total after consolidation	194
Total settled	3
Hectors restored	91812.01ha
Households Benefited	1923
Beneficiaries	17234
Outstanding claims	97284.02ha

Table no 15: Land Claims Settled

REF/KRA NO	Claimant
CPA-2001/0278/A	Pheeha Community
CPA-12/1299/A	Tshwale Community
	Rakwadu Community

Table no 16: Illegal Land Occupation

Property Description	Land Ownership	Comment(s)
Meshasheng in Ga-Kgapane	Greater Letaba Municipality	
Mokgoba in Modjadjiskloof	Greater Letaba Municipality	About 200 shacks has been built illegally in Mokgoba area
Portion 4 of the farm Mooiplats	Greater Letaba Municipality	About 100 shacks built illegally

4.6 Spatial Challenges:

- Large area in Modjadjiskloof town is privately owned and these create a challenge in terms of upgrading and expansion of the town.
- There's illegal settlements and land occupation in areas such as Mokgoba and Meshasheng and legal processes are underway to address such challenges.
- Sparse rural settlement and
- Building houses without building plans.

4.7 Spatial Opportunities

The municipality may also draw spatial opportunities from tourism. This is mainly because of the vast potential in terms of suitable resources in the municipality.

These may be summarized as follows:

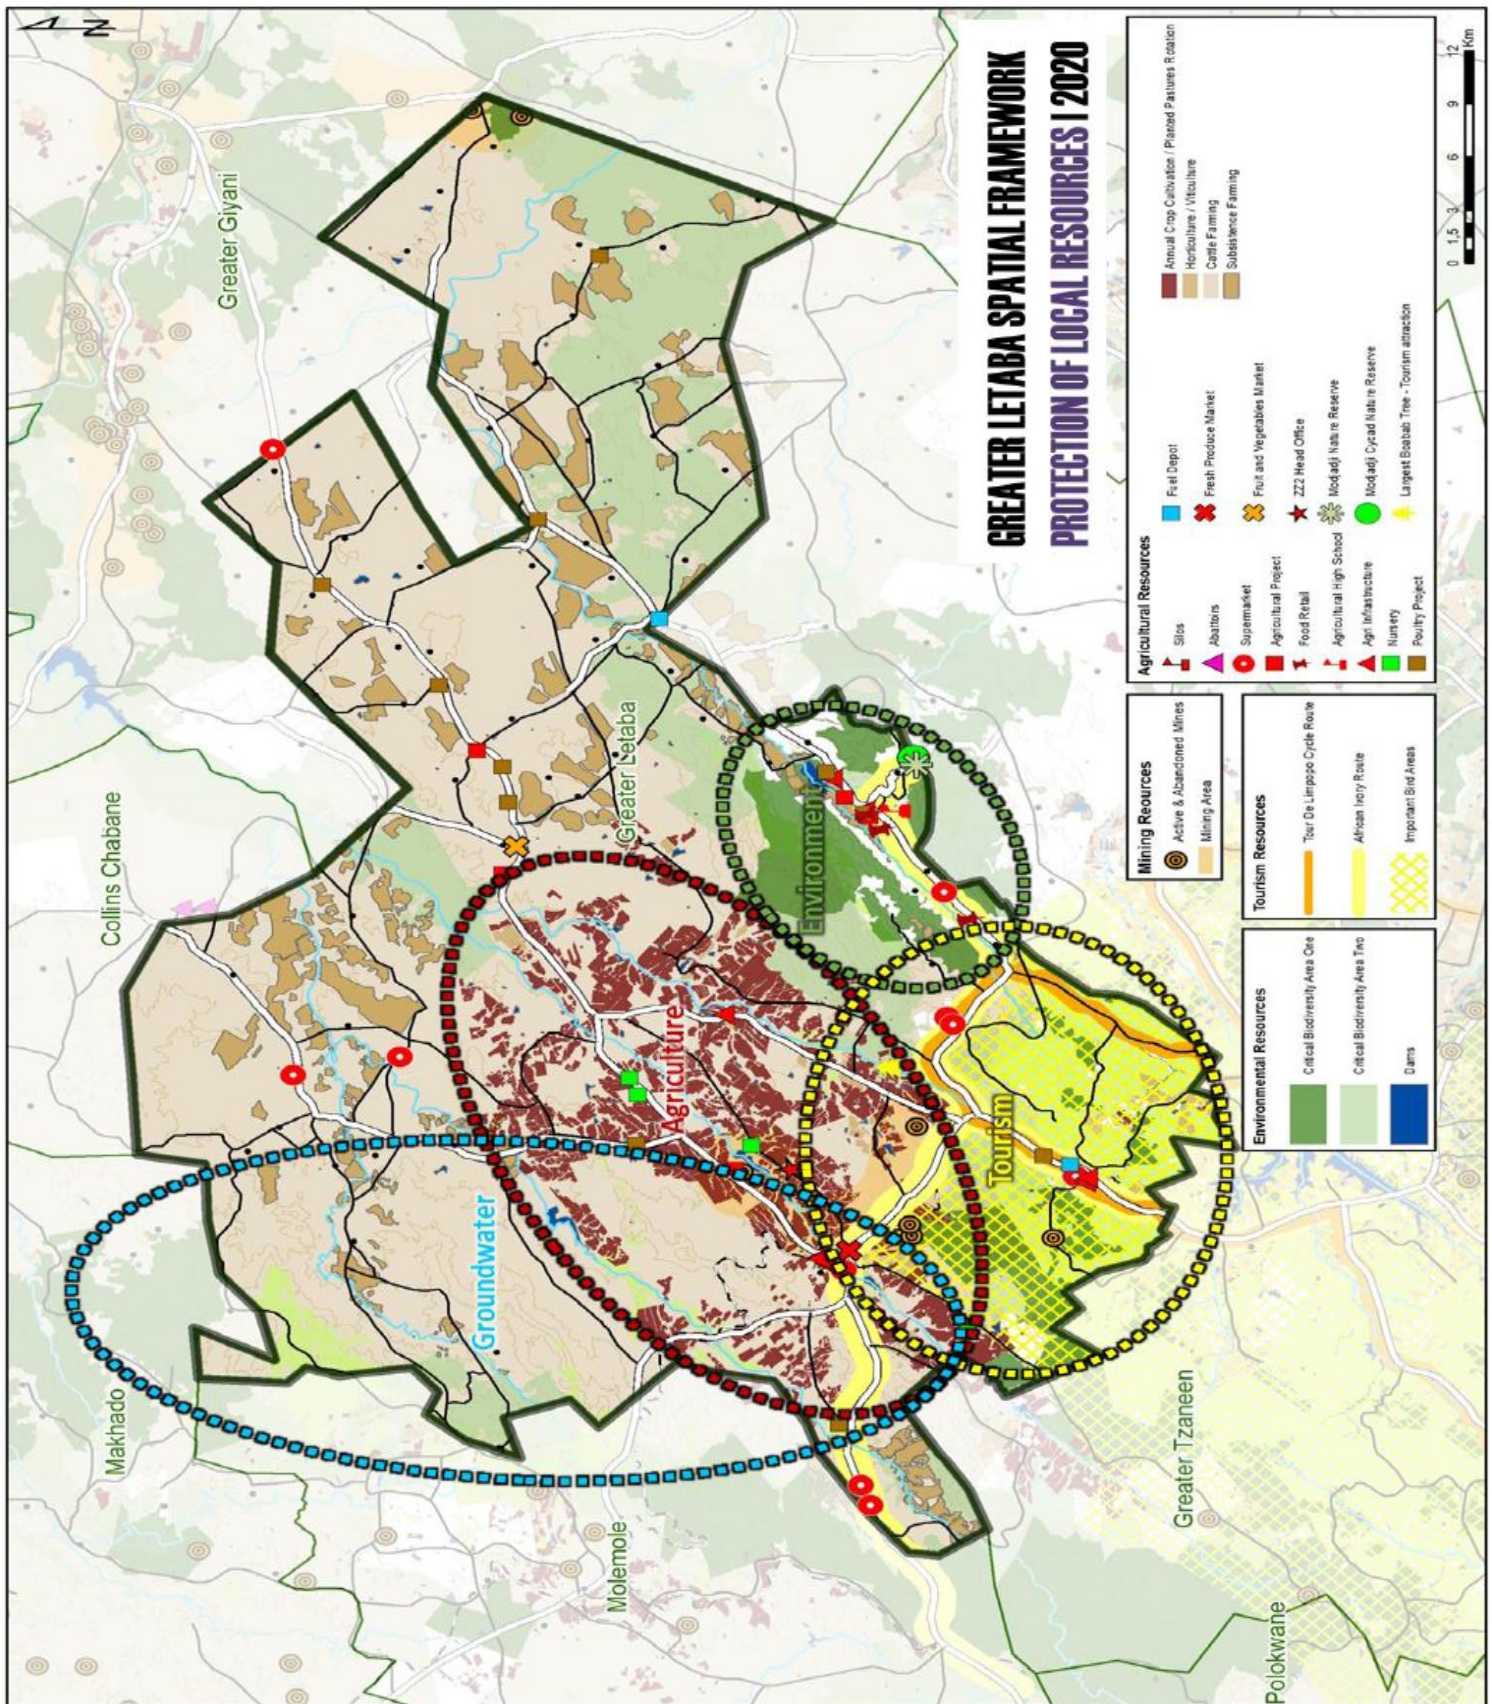

- The availability of the Rain Queen (Queen Modjadji) which may influence tourism related development along the Ga-Kgapane-Mokwakwaila Development Corridor;
- The African Ivory route that passes through Modjadjiskloof could bring unprecedented growth in both Modjadjiskloof as a town and the entire municipality.

Various development nodes exist in the municipality; each with a unique development opportunity. These nodal points may be enhanced utilizing Nodal Configuration Plans and linked to each other through networks thoroughly planned through the Spatial Development Framework of the municipality.

The following key elements present opportunities with tangible spatial impacts if explored adequately:

- Modjadji Nature reserve, with the Modjadji (Encephalartos Transversosus Cycad Forestry) only found here.
- Vast tomato plantations of ZZ2.
- Modjadjiskloof waterfalls.
- Walking trails both in the Caravan Park and in the nature reserve.
- Manokwe caves.
- Shidila Lodge and Nahakwe Mountain Lodge.
- Lebjene Reins
- Senopelwa / Matipane Showgrounds
- Modjadji Royal White House
- Township Establishment at Modjadjiskloof ext 4

4.8. Greater Letaba Spatial Economy

4.9 Strategically Located Land within the Greater Letaba Municipality

Small businesses and new retail developments have been the focal point of new developments in Modjadjiskloof, Ga-Kgapane and Senwamokgope towns in recent years. Large space of land is utilized for agricultural purposes, i.e. growing tomatoes, timber, cattle farming, etc.

However, the mountainous area of Modjadji, 'the Rain Queen' can potentially be utilized for eco-tourism. The availability of the palace can also be one of the opportunities for Tourism attraction given the Modjadji dynasty and heritage. There is a lack of private investment in certain places of the main town, and this has led to the deterioration of these areas and underutilization of existing infrastructure.

Moreover, the following areas have huge opportunities which the municipality may capitalize on for development, which include the following:

- Farms to the West of Ga-Kgapane located on a slightly flat terrain suitable for mixed use development including commercial and industrial. These include the farm Platland and Driehoek;
- The area between Ga-Kgapane and Modjadjiskloof constitute of the farm Spritsrand, Witkrans, Vrystaat and Hilldrop;(Modjadjisklook Ext 4)
- The area between Modjadjiskloof and Mokgoba may serve as a proper link between Mokgoba and the town; thereby attracting further investment in terms of both residential and commercial development.
- Goudplaas and Nooitgedaght with a potential for a new township establishment, extensive agriculture and industrial development.
- The vacant land parcel in Senwamokgope between the built area and the college would be ideal for Convenience Centre development.
- Mokwakwaila area on the farm Worcester 200-LT given potential by its centrality in Bolobedu and the municipality.
- Portions of the farms Vaalwater and Roerfontein adjoining the existing Senwamokgope to the South and East
- Mooketsi (area around the junction) which has a potential for growth as a convenience centre for tourism.

It is worth noting that the above areas are under the ownership of private individuals with the exception of the farms Worcester, Vaalwater and Roerfontein which are state owned. The

Municipality should conduct land audit in order to locate and unlock municipal land that can be used for development.

4.10 Spatial Development Consideration (Subject to Land Availability)

The following human settlement areas have been planned for future development:

- Proposed establishment of extension 11,12 and 13 of Kgapane
- Township establishment (286 sites) on the farm Vrystaat, covering 67 hectares: Portion 14;
- Township Establishment (600 sites) on farm Nooigedacht 342-LT.
- Township Establishment (279 sites): Modjadjiskloof Extension 1 and 2
- Township Establishment (4900 sites): Makhabeni Extension 1 on the farm Altydmooi 379-LT;
- Shopping Centre/ Mall on the farm Schoongelegen: Portion 01.
- Township development and Mall at Mokwakwaila
- Shopping Centre/Mall in Senwamokgope;
- Extension of Ga-Kgapane Shopping Centre

Table no 17: Spatial Rationale SWOT Analysis

5.ENVIRONMENTAL ANALYSIS

5.1. Environmental Setting

5.1.1. Land Cover and Land Use

The broader land use patterns that occur within the Greater Letaba Municipality are categorized into natural elements, primary economic activities and human settlements which is mostly influenced by diverse set of factors, that includes agriculture, forests, soils, and biodiversity. The Municipality offers more fertile soil, especially in the valleys and along river floodplains which is characterised by a mix of red and yellow, well-drained soils with massive to weak structures. While the region has some rocky areas and limited soil development, its conditions offer moderate potential for farming. (Source: Greater Letaba Municipality SDF)

5.1.2. Topography

The Municipality covers an area of approximately 1 891 km² with the average elevation of approximately 766 m above sea level. The Greater Letaba contains significant coverage of thicket and bushland, along with established forest plantations, indicating both natural and managed vegetation cover.

The southern portion of the municipality is characterised by mountainous terrain, which restrict urban development and the North-Eastern areas are less steep with gentler slopes and lower elevation. The South has denser timber-type vegetation while the North has more bushveld and grazing lands. (Source: SA Topographical Maps)

5.1.3. Geology

The geology of Greater Letaba Municipality is varied and complex and consist of mainly sedimentary rocks in the North and metamorphic and igneous rocks in the South. The granite and gneiss are recorded as rock types for parts of the Letaba area emanating from the Groot Letaba catchment with Modjadjiskloof as one of the towns that forms part of the catchment. Granitic rocks weathering results in silty and more sandy soil which affect agriculture and water infiltration. (DWS, Groot Letaba River Water Development Project)

5.2. Environmental Governance and Integrated Environmental Management

Greater Letaba Municipality draws its mandate from Section 24 of the Constitution of the Republic of South Africa which states that everyone has the right to an environment which is not harmful to their health or well-being and to have the environment protected for the benefit of present and future generations through reasonable legislative and other measures that prevent pollution and ecological degradation, promote conservation and secure ecologically sustainable

development and use of natural resources while promoting justifiable economic and social development. This right is further expressed by the National Environmental Management Act, 1998 (Act No. 107 of 1998) (“NEMA”) which intends to provide for co-operative environmental governance by establishing principles for decision-making on matters affecting the environment, institutions that will promote co-operative governance and procedures for co-ordinating environmental functions exercised by organs of state and the following Specific Environmental Management Acts (SEMAs):

- National Environmental Management: Air Quality Act, 2004 (Act No. 39 of 2004),
- National Environmental Management: Waste Act, 2008 (Act No. 59 of 2008);
- National Environmental Management: Biodiversity Act, 2004 (Act No. 10 of 2004); and
- Climate Change Act, 2024 (Act No. 22 of 2024).
- National Environmental Management Protected Area Act, 57 of 2003.

Integrated Environmental Management is emphasising that there should be a balanced consideration of environmental, socio-economic and cultural heritage in decision making, project planning and implementation including the formulation of programmes and policies. This is done to promote sustainable development in municipal planning processes.

To ensure that there is a balanced consideration of environmental and socio-economic factors in municipal projects planning, all infrastructure projects are screened to check whether an Environmental Impacts Assessment (EIA) might be required. This is in line with the EIA regulations enacted under the National Environmental Management Act, 1998 (Act No. 107 of 1998) (“NEMA”). The Specific Environmental Management Acts (SEMAs), as defined in the NEMA, are also considered. Compliance of projects to other legal requirements as outlined by other acts and regulations is also screened before project implementation. This includes compliance with Acts and regulations such as the National Water Act, 1998 (Act No. 36 of 1998), National Heritage Resources Act, 1999 (Act No. 25 of 1999), and other relevant international agreements.

Greater Letaba Municipality has established Environmental Management Forum to provide a structured platform for stakeholders to share information, develop solutions and coordinate actions to achieve effective and sustainable environmental management. Furthermore, the Municipality has a Climate Change forum which addresses local climate crisis. Moreover, GLM forms part of the Mopani District Environmental Management Forum, the Provincial-Municipal Air Quality Officers’ forum (facilitated by LEDET) as well as the Provincial Climate Change and Environmental Management Forum (Led by SALGA) which are convened quarterly to discuss

environment related issues (air quality, climate change, waste management, biodiversity, etc) in the province.

The Municipality does not have a dedicated environmental structure responsible for environmental management. The environmental management unit falls under Environment, Waste Management, Parks, Cemetery Section which covers general environmental issues.

5.3. Biodiversity and Conservation

Greater Letaba presents a more varied environmental picture. It includes sections of Critical Biodiversity Area 2 and Other Natural Areas, which still retain some natural features and ecological value. However, part of the area of Greater Letaba has been heavily altered, with no natural habitat remaining, indicating areas that have been transformed by agriculture, settlement, or infrastructure development. (Source: Greater Letaba Municipality SDF)

The Municipality has prolific vegetation such as timber and bushveld vegetation. The region includes forests, wetlands and unique vegetation type. One particularly notable site being Modjadji Nature Reserve which is a home to ancient cycads and unique cultural-ecological landscape.

Invasive species such as *Lantana camara* forms part of the challenges in the Municipality. Programmes such as Land-care project steered by Limpopo Department of Agriculture and Rural Development in Mamaila village targeting clearing of alien species (e.g. *lantana camara*) and restoring grazing veld were implemented in the Municipality. Furthermore, Deforestation and land-use change resulting from timber plantation and cutting of trees for fire purposes shifts the natural ecosystem. There is a need to allocate budget from the municipality to address issues of alien and Invasive species which could be done through the development of Alien Invasive Eradication Plans and Open Space Management Plans.

5.4. Agriculture and Forestry

Greater Letaba Municipality contributes 5.5% to the agricultural activity of the Mopani District, Agriculture plays a crucial role in the municipality as one of the major employers and key source of food security. GLM is a major producer of tomatoes in Limpopo and South Africa, as well as export quality avocados. Tomato production is mainly located in the Mooketsi area, under ZZZ. Greater Letaba Municipality offers more fertile soil, especially in the valleys and along river floodplains. The region is suitable for a variety of crops, including maize, sugarcane, vegetables, and citrus, as well as some fruit farming. It has better infrastructure and irrigation systems compared to other local municipalities within Mopani District Municipality, supporting both crop

farming and livestock production. The fertile soil and flat terrain allow for more intensive and large-scale farming in certain areas.

According to the Department of Rural Development and Land Reform Agri hub Toolkit, several forestry plantations in the Greater Letaba Local Municipality consist primarily of exotic plant species such as pines, eucalyptus, and mahoganies.

5.5. Natural Water Bodies

Greater Letaba Municipality is a home to Modjadji Dam, Modjadjiskloof Waterfall and Molototsi River which forms part of the tributaries feeding the Groot Letaba. (Greater Letaba Municipality SDF). There are also additional small dams within private properties in the Municipality.

Wetlands areas in the Municipality includes Thakalane, Malematja, Bodupe and Mokgoba and proper management of these areas could be of economic importance to the local communities.

5.6. Air Quality Management

The NEM: AQA 2004 aims to provide reasonable measures to prevent air pollution and give effect to Section 24 of the Constitution (South Africa, 1996). Section 15(2) of the NEM: AQA 2004 states that local authorities are required to develop an Air Quality Management Plans (AQMPs) which should be included in their Integrated Development Plans (IDP) (Act No. 39, 2005) as required in terms of Chapter 5 of the Municipal Systems Act (Act No. 32, 2000).

5.6.1. Air Quality By-Laws

Section 156(2) of the Constitution of the Republic of South Africa makes provision for a Local Municipality to make and administer by-laws for the effective administration of the matters which it has the right to administer as long as such by-laws do not conflict with National or Provincial legislation.

The Greater Letaba Municipality has not established an air quality by-law. The Department of Forestry, Fisheries and the Environmental (DFFE) has developed a generic air pollution control by-law for Municipalities (Government Notice No. 579, 2010) which deals with most of the air quality management challenges expected in South Africa. The aim of the generic air quality management by-law is to assist Municipalities in the development of their own air quality management by-law within their jurisdictions.

5.6.2. The status quo of Air quality in the Municipality

Municipalities are required to 'designate an Air Quality Officer to be responsible for coordinating matters pertaining to air quality management in the Municipality' (Act No. 39, 2005). The

appointed Air Quality Officer must be responsible for conducting air quality monitoring and addressing complaints related to air quality within the Municipality and ensure that before the District issues an Atmospheric Emission License (AEL) to industries within GLM, consultations are made with Local Municipality and a joint pre-licensing inspection is conducted.

Greater Letaba Municipality is led by Mopani District in conducting Air Quality Management compliance monitoring on a quarterly basis in the industries that are reporting on the South African Air Quality Information System (SAAQIS). Some of these industries include Khulani Timbers Industry in Modjadjiskloof and Tzaneen Treated Timbers, which negatively impact on air quality by emitting chemicals resulting from timber treatment.

A list of other factors affecting Air Quality in the municipality includes,

- Burning of Saw dust from Timber industries due to unavailability of disposal site,
- Domestic fuel usage for cooking and heating which comprises of animal dung, coal, paraffin and wood,
- Burning of waste,
- Biomass burning
- Human activities are attached to an increase in Carbon dioxide released from vehicles, especially heavy vehicles that drives from industries through Modjadjiskloof town and Sekgopo; and
- dust resulting from unpaved roads and constructions.

5.7. Climate Change

Climate Change refers to an ongoing trend of changes in the earth's general weather conditions as a result of an average rise in the temperature of the earth's surface often referred to as global warming. This rise in the average global temperature is due, primarily, to the increased concentration of gases known as greenhouse gases (GHGs) in the atmosphere that are emitted by human activities. These gases intensify a natural phenomenon called the "greenhouse effect" by forming an insulating layer in the atmosphere that reduces the amount of the sun's heat that radiates back into space and therefore has the effect of making the earth warmer.

Greenhouse gases (GHGs) are emitted from, and are reabsorbed by, a variety of natural sources, but the rate at which human economies and societies are emitting these gases far exceeds the capacity of natural ecosystems to reabsorb them. Increased industrial activity since the mid-18th century has led to a rapid increase in the atmospheric concentration of GHGs such as carbon

dioxide, methane and nitrous oxide, in large part due to the burning of fossil fuels derived from oil, coal and natural gas. (Source: DFFE, National Climate Change Information Systems)

5.7.1. Governance

The National Climate Change Response Policy (NCCRP) White Paper states that climate change considerations and constraints must be integrated into Municipal development planning tools such as Integrated Development Plans (IDPs) and Municipal service delivery programmes. Greater Letaba has developed a Climate Change Response Strategy in house, approved by council. There is a climate change champion at the municipal level, however, performs waste management, air quality and climate change related functions.

GLM convenes a climate change forum and its role is to coordinate the climate change response for the municipality. Different sector departments (Traffic, Disaster Management, LED, etc) in the municipality form part of the forum to ensure that climate change strategy is in cooperated in all sector development plans in the Municipality.

5.7.2. Climate Change Budget and projects

The Greater Letaba Municipality is in a process of developing a Climate Change Implementation Action Plan which outlines the potential Climate Change projects and Budget. The Municipality does not have a dedicated budget for climate change action; however, an operational budget is in place for overall operations. Climate Change benefits on project that are related to climate change within the Municipality.

Residential areas in Modjadjiskloof and other parts of the GLM have installed solar system for electricity backup, these include most businesses around the area and businesses in Ga-kgapane and Senwamokgope.

GLM has plans to implement retro-fitting projects i.e. printers that are environmentally friendly. Energy saving high mast lights have been installed at most areas within the municipality, to reduce the Municipality's carbon foot print. Furthermore, the municipality have installed solar panels for electricity backup in the main office and energy efficient lights (LED) have been installed in the offices to reduce energy.

VOLTALIA is in a process of constructing the largest South African renewable power plant in the Greater Letaba Municipality. The plant production will represent a volume equivalent to the annual electricity consumption of 425,000 inhabitants, avoiding more than 237,000 tons of CO2 emissions, which is equivalent to removing approximately 50,000 cars from the road. However, the plant will be feeding Richards Bay Minerals (RBM) which is located in the Kwa-Zulu Natal province.

5.7.3. Climate trends in Greater Letaba Municipality

Baseline (1961-1990) average annual temperatures for Mopani District Municipality, which Greater Letaba Municipality falls in, are between 20°C-24°C. The average rainfall ranges from 600mm-800mm and 85% of the rainfall in the municipality is received in summer (October to March) rather than in winter. Annual rainfall has declined significantly, while annual minimum and maximum temperatures have increased significantly.

Under a high emission scenario, average temperatures are projected to increase by about 2.0-2.2°C by 2050 in the district. (CSIR, Greenbook).

Risk and Vulnerability assessment was conducted in the Greater Letaba Municipality and the assessment found that most environmental sectors in the municipality are highly sensitive to climate change and the adaptation capacity ranges from low to medium within the sectors.

Table 1. below indicates different sectors, their vulnerability to climate change and adaptive capacity.

Sector	Vulnerability to climate change	Adaptive Capacity
Agriculture	High	medium
Water Supply	High	low
Energy	High	Low-Medium
Ecosystem	High	low
Waste Management	High	low
Transportation	High	Medium
Human Health	High	Low-Medium
Extreme weather	High	Low-Medium
Tourism	High	Medium-High
Industries	High	Low
Rural and Urban Livelihood	High	Low-Medium

Table 1: Sectors Vulnerability to Climate Change

5.8. Waste Management

GLM is collecting waste in Modjadjiskloof, Ga-Kgapane and Senwamokgope. The Municipality has extended the collection of waste to Mokgoba, Meidingen, Raphahlelo, Phooko, Mamaila-Kolobetona, Sekgopo, Jamela, Mamphakhathi, Madumeleng, Modubung, Madibeng, Kheshokholwe, and Matswi, Mooketsi market, Maphalle markets, Sekgosese area and Mokwakwaila business centre and various areas within the municipality. However, the municipality does not collect in some rural areas and informal settlement. Solid waste collection in these areas is done through containers that include skip bins. Skip Bins are procured continuously, depending on budget, each financial year to extend waste services within the municipality. Recycling initiatives, litter picking and clearing of illegal dumping sites are continuously conducted throughout the Municipality to minimise waste challenges. The municipality have recycling facilities that are operational which are located in Jamela, Mabulana, and Maphalle. Furthermore, GLM is in a process of developing Recycling and Waste Minimization Strategy.

There are two operational transfer stations located at Senwamokgope and Ga Kgapane for waste disposal as a temporary storage and one drop off centre for disposing garden waste at Modjadjiskloof. The garden refuse from old Modjadjiskloof dumping site is collected to ZZ2 for composting purpose. The Municipality has no landfill site and currently utilises Greater Tzaneen Landfill site, which is a costly service deliver option for the Municipality; however, phase 1 construction of the new landfill site has been in progress at Maphalle Village. Relevant service provider has been appointed for planning and designs to comply with the Environmental Waste Act 108 of 2008 and progress has been made to ensure complete implementation.

GLM has developed an Integrated Waste Management Plan (IWMP) in house, assisted by stakeholders i.e., LEDET, DFFE, DWS, and Dept. of Agriculture. The Integrated Waste Management Plan (IWMP) has been approved by the council and endorsed by the MEC of LEDET and is due for review. The Municipality has also appointed a manager that deals with environmental and waste management.

5.8.1. Refuse removal.

The Main types of waste generators in the district are households, businesses, and mining, farming and Health care facilities. Only 5.3% of the population in GLM receive waste removal services and a total of 43 556 tons of waste are produced annually (projected to be 67 500 t/a by 2026), that is 119 tons of waste per day of which roughly 33% is recyclable and 47% is compostable. 2885 households are services by the Municipality with 92 skip bins placed in rural communities. Some rural communities in Greater Letaba Municipality do not have access to

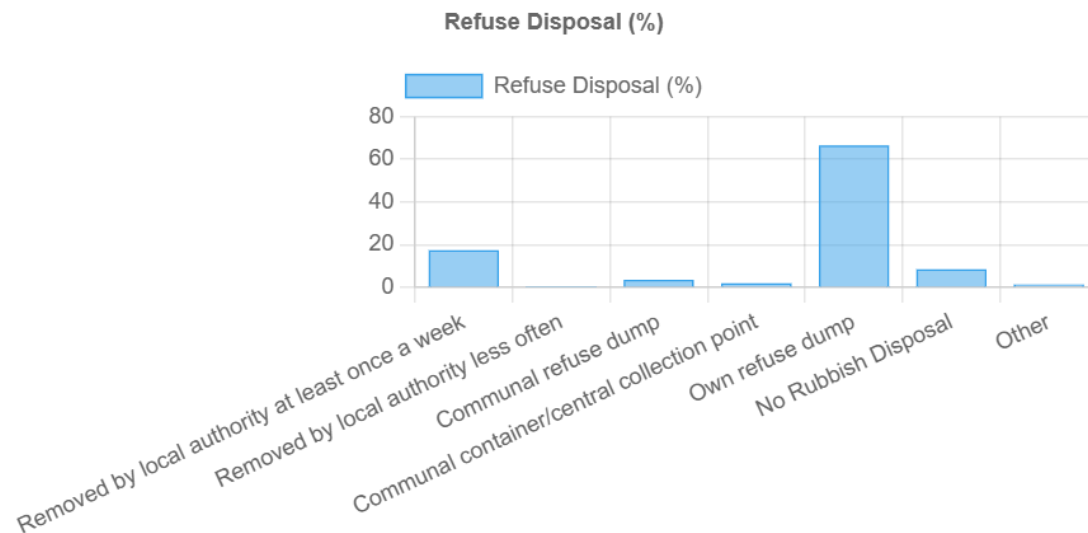

wastes removal services. GLM still need to purchase more skip bins to establish rural drop of centres and extension for communal refuse collection in various villages within the municipality.

Municipality	No of villages	Villages served	Service Provider	Comments
GLM	80	40	GLM	Maphalle markets, Mokwakwaila business centre, Sekgopo, Mamaila whole sale taxi rank, Mamaila Modubung, Mamphakhathi, Madumeleng, Madibeng, Kolobetona, Phooko, Raphahlelo, Matswi, Lenokwe, Mohlakamosoma, Rasewana and Jamela areas have been supplied with waste bins and the municipality is collecting them.

Table 2: Refuse removal in rural areas

Refuse removal service by the municipality has been focusing in urban and some business, markets at rural area (towns, rural business, markets and townships).

5.8.1.1. Access to refuse removal

Graph 1: Access to refuse removal weekly by the municipality (Source: StatsSA Census 2022)

5.8.1.2. Waste disposal

The Municipality has placed waste bins in town, villages and townships to address waste disposal challenges. Townships have also been provided with refuse bins in households to deal with issues of waste disposals. The construction of a buy-back centre has been completed but not yet operational.

5.9. Environmental Impact Assessments (EIAs)

Environmental Impact Assessment (EIA) is mandated by the National Environmental Management Act (NEMA), which provides a legal framework for environmental governance in the country. The South African constitution (1996) emphasizes the need for sustainable development, ensuring that economic, social and environmental needs are met without compromising future generations' ability to meet their needs.

Under the NEMA and other related legislations such as Environmental Impact Assessment Regulation developers are required to assess the environmental impact of certain projects. According to Section (2)(4)(f) of the NEMA the participation of all interested and affected parties

(I&APs) in environmental governance must be promoted and all people must have the opportunity to develop the understanding, skills and capacity necessary for achieving equitable and effective participation, and participation by vulnerable and disadvantaged persons must be ensured.

GLM as an affected party, receive EIA applications for developments in the municipality and monitor new land developments and Section 24 G Draft Assessment applications. Comments reports are then compiled in line with Environmental Impact Assessment Regulations.

5.9.1. Environmental Compliance & Enforcement

Currently, GLM has no designated Environmental Management Inspectors (EMI) to conduct environmental compliance and enforcement. The purpose of EMI is to ensure that development, industrial, mining and agricultural activities within the Municipality adhere to environmental legislation, hereby preventing degradation and promoting accountability. There is a need for appointment of an EMI in the Municipality or a designation of the current Environmental officer to enable such officer to perform enforcement and compliance function.

Compliance and Enforcement activities

- Monitoring compliance in terms of environmental management in local authorities as per National Environmental Management Act and its Specific Environmental Management Acts.
- Individual and joint routine and strategic inspections with other relevant authorities on environmental emission licences issued.
- Continuous update of the complaint's registers
- Investigate all environmental complaints and incidents received.
- Follow up / feedback and closure on complaints received.
- Issuing of notices, directives and fines on all non-compliant premises

5.10. Environmental Awareness Programmes

Section 2(4)(h) of the National Environmental Management Act, 107, 1998 mandates all organs of state that may significantly affect the environment to ensure that community wellbeing and empowerment are promoted through environmental education, the raising of environmental awareness, the sharing of knowledge and experience and other appropriate means.

Greater Letaba Municipality as part of the Local Environmental Forum plays a vital role in addressing issues of environment through education and awareness by facilitating programmes such as cleaning campaign, tree planting and by conducting environmental education and awareness in schools, tribal authorities and communities. The Municipality is in a process to develop Education and Awareness strategy. The Municipality also celebrate environmental calendar days, for example, tree planting is done in commemoration of Arbor Day, furthermore newsletters and community radio are utilised to deliver environmental messages to the communities.

GLM participate in a competition ran by LEDET, known as Greenest Municipality Competition (GMC), which is aimed at encouraging Municipalities to improve service delivery and the competition focuses on waste management, landscaping, tree planting and beautification, community empowerment and leadership.

Furthermore, Mopani District run programme known as the Clean Earth Campaign. The aim of the programme is to raise awareness on environmental issues within the district and to ensure that the community takes a stand in the fight against environmental degradation. This is done by educating and celebrating environmental calendar days with the community as well involving them in various projects that seek to identify and solve environmental problems in their immediate surroundings.

The programmes that are conducted under the campaign cover various aspects of the environment such as waste management, air quality management, climate change, biodiversity, water management, energy conservation, etc. Some of the activities which are conducted under the programme are: Greening/tree planting initiatives, clean-up campaign, beautification and recycling. Various schools within GLM participated in the programme and some of the schools came top in the school competition.

6. BASIC SERVICES AND INFRASTRUCTURE DEVELOPMENT

6.1 Background

The Constitution of the Republic of South Africa Section 152 (c) indicates that municipalities must “ensure the provision of service to communities in a sustainable manner”. The general state of water supply within the municipal area is not acceptable and therefore requires urgent intervention to improve the situation. The municipality often experiences unfortunate situation whereby communities are obliged to utilise uncleaned water collected from natural sources like rivers and springs for domestic use, which is health hazard.

It is imperative that additional water supply resources be provided, also that the existing once be extended and refurbished through the assistance of the Mopani District Municipality (MDM) which is the Water Services Authority (WSA) in the area.

6.2 Water and Sanitation Analysis

6.2.1 Water Supply

Greater Letaba Municipality and Mopani District Municipality have signed a Water Services Provider (WSP) contract which allowed GLM to undertake operation and maintenance function limited to reticulation network. The WSP agreement with Mopani has been signed and implementation of it will be monitored.

The provision of water supply within the municipal area is gradually worsening as a result of insufficient bulk water supply which is aggravated by factors like new developments and inadequate water resources which cannot meet the current demand. The communities which are adversely affected by the situation resort to polluted sources like springs, raw water dams, rivers or buy water from residents who have private boreholes.

There is a need to address shortage of bulk water through the upgrading of existing purification plants; refurbishment of some resources; provision of package plants and drilling or equipping of additional boreholes as a temporary relief measure. Currently 367 boreholes in GLM, 282 working, 85 not working, 56 needs to be electrified and 19 vandalised.

6.2.2 Access to Water

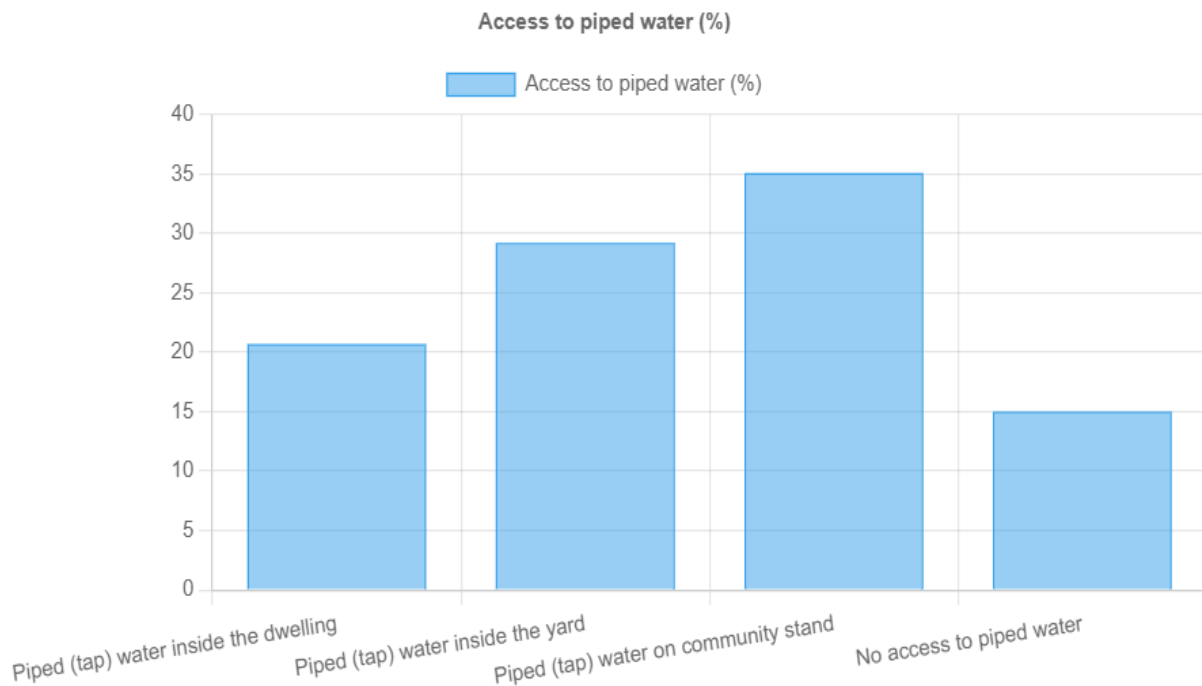

Greater Letaba Municipality strives to ensure that its residents have unhindered access to water services in accordance with the norms and standard required by law. According to the Census 2022, approximately 75% of the residents draw water from less than 200 m radius; which is the maximum required walking distance to tap water according to the RDP standards.

The municipality already supplies at least 30%-40% of the villages with water tanker per week to address issues of water scarcity.

The table below shows that 20.7% of households in the municipality have access to tap water inside the dwellings, while the average for the District Municipality is 16.8 %. The percentage of households with access to tap water inside the yard is 29.2 %. The table further shows that majority of the households have access to tap water on community stands, above the acceptable walking distance 200m as required by standards.

The challenge of water results with desperate community members walking for a long distance to access water. It should also be noted that 15% of households in the Municipality have no access to tap water where the District Municipality percentage is 15.8%. It is worrying that some households in the Municipality still rely on springs, rain-water tanks, stagnant water or dams, rivers and vendors as primary sources of water which may cause health hazard to the residents.

Table no 20: Piped Water

Census 2022

6.2.3 Sources of Water

Table no 21: Sources of Water

Source	Benefiting Areas
Tzaneen/Modjadjiskloof Water Scheme	Politsi, Mokgoba, Modjadjiskloof, Ga-Kgapane and surrounding farms
Modjadji RWS Water Scheme	Mamphakhathi, Bodupe, Moshakga, Motsinoni, Ramphenyane and Mokwasele, Ga Modjadji (Sehlakoni), Sekhuting, Modubung, Motsinoni, Malematja, Mokwasele, Motlhakong, Ga Kgapane, Medingen, Madibeng, Ramphenyana, Koope, Ga Matswi, Ga Mabulana,
Middle Letaba RWS -Magoro Water Scheme	Sephukhubje, Ga Phooko, Ga Raphahlelo, Tshabelane, Khomanani, Masakona
Worcester Water Scheme	Polaseng, Mokwakwaila, Mothobekhi, Ramaroka, Femane, Senakwe ,Mohokoni ,Ga Ntana, Maekgwe and other surrounding
Lower Molototsi Rural water Supply scheme	Jokong, Mpepule, Thlothlokwe, Motlhele, Kuranta, Ramodumo, Buqa, Abele, Taulome and the surrounding villages.
Middle Letaba Babangu water scheme	Rotterdam
Sekgosese Water Scheme	Sekgosese
Middle Letaba Bolobedu Water Scheme	Sedibeng Maphalle, Mohlabaneng, Jamela, Sefofotse, Bellevue, Mamaila Mphotwane, Nakampe, Refilwe and Makgakgapatse, Molototsi, Nakampe, Mamokgadi, Ditshoseng, Mohlabaneng, Swawela,
Sekgopo Rural Water Supply Scheme	Sekgopo comprises of 15 villages of which solely depend on ground water. No bulk water Supply, the entire area depend on ground water supply

6.2.4 Access to Sanitation

According to Census 2022; about 71% of the households within the municipality are either without sanitation facilities or have sub-standard toilets like those without ventilation; bucket system and chemical toilets. The 71% figure might as well be translated into a backlog and that implies that progress in providing sanitation facilities is not satisfactory.

Table no 22: Households Access to Sanitation

Source: (Census 2022)

6.2.5 Water and Sanitation Challenges

- Ageing of water and sanitation infrastructure (Modjadjiskloof, Senwamokgope and Ga-Kgapane);
- Ever reliance on boreholes (Sekgopo and Sekgosese areas).
- Theft and vandalism.
- Continuous diesel Water pumps breakdowns.
- non-payments of services.
- Illegal connection by car washes.
- Lack of maintenance of existing infrastructure and
- Poor quality of drinking water.

- Shortage of water because of drought
- Continuous boreholes breakdowns.

6.2.6 Free Basic Water and Free Basic Sanitation

The threshold for provision of Free Basic Water is a maximum of six (6) kilolitres per household per month. The municipality has 143 households which reside in the proclaimed towns, and they do not pay for the first 6kl of water as reflected in their service accounts.

There is a total of 132 villages which receive unmetered free water supply, which is presumed to be above the FBW threshold. In areas where there are deficiencies in water availability; water supply is supplemented by water tankers without cost.

Table no 24: Indigent Households receiving Free Basic Water and Sanitation

Service	No. Indigent Households	Access	Backlog
Water	28	28	0
Sanitation	28	28	0

Source: Municipal Indigent Register

6.3 Energy and Electricity

6.3.1 Status of Electricity Network in Modjadjiskloof

Greater Letaba Municipality has electricity distribution license granted by National Electricity Regulator of South Africa (NERSA) in accordance with the Electricity Act, 1987 (Act No. 41 of 1987) to supply electricity in Modjadjiskloof.

ESKOM is responsible for distributing electricity to other areas except in Modjadjiskloof and Mokgoba village which is an extension of Modjadjiskloof where prepaid meters have been connected to address also issues of illegal connection.

The infrastructure maintenance is important to address issues of power outages especially during storms and winter season. High voltage and low voltage electrical network lines are still having challenges in terms of ageing although the municipality is still busy with refurbishment. The municipality purchases electricity from ESKOM. The Notified Maximum Demand (NMD) is 3 000kVA. The recorded Maximum Demand of June 2021 was 2 979kVA.

The GLM has applied to Eskom for MND to increase to 5000KVA due to the over usage of the what the municipality has leading to penalties. The Greater Letaba Municipality has upgraded electrical network as per National Energy Regulator (NERSA) standards in substation sites and mini substations.

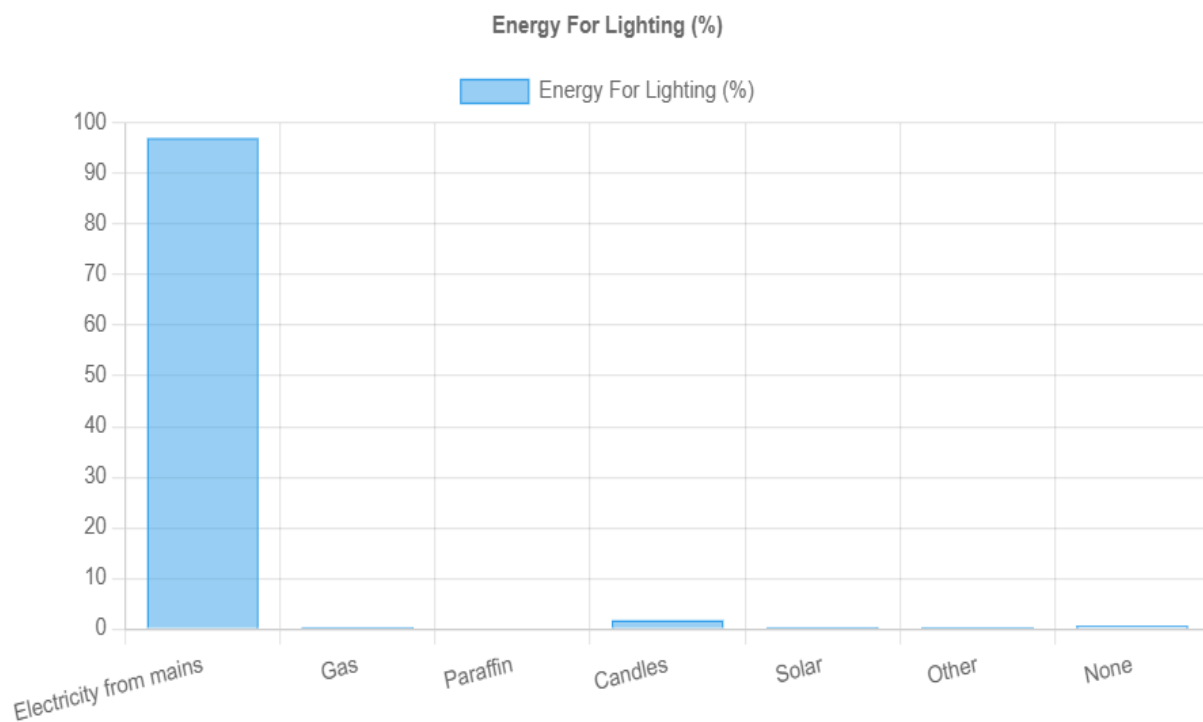

6.3.2 Sources of Energy

- Electricity.
- Solar.
- Paraffin
- Wood and Gas.

6.3.3 Electricity Backlogs

Energy distribution has important economic development implications with a potential to make considerable impact. This impact relates to improved living conditions, increased productivity and greater sustainability of environment.

The provision of electricity to households has been achieved to the larger extent. About 96,6% of the households in Greater Letaba Municipality have access to electricity. See figure below:

Access to electricity (Source: Census 2022)

Given its capacity of the figure above, Greater Letaba Municipality and the MTEF allocation, it is clear that all households will have access to electricity except new household's extensions.

6.3.4 Free Basic Electricity

The maximum allowable consumption for Free Basic Electrification is 50kwh per qualifying household per month. The municipality has received 144 beneficiaries (for the municipality's licensed area) for FBE of which all beneficiaries are currently connected. ESKOM administers applications and collection of FBE in areas under their distribution licence.

6.4 Roads and Storm Water

6.4.1 Road Networks

Transportation infrastructure makes a major contribution to the facilitation of economic activities. The assessment of Municipal Road Network completed by the Department of Transport in 2020 revealed that the municipality has a total road network of 1213km.

The majority of gravel roads are internal streets in rural areas which require intervention to improve access to houses, businesses and public amenities. There is a total of approximately 8km which are gravel in the three (3) proclaimed towns within the municipality.

A major progress has been made in improving the condition of the roads in the municipality whereby 91.08km streets have been paved through concrete interlock paving blocks and this has reduced the backlog to 696.08km.

Table no 25: Classification of Roads in GLM

National Tarred Roads

6.4.2 Road and Storm Water Drainage Backlog

The municipality has a backlog of storm water drainage in all gravel streets and roads. The backlog is estimated at 696 Km road including storm water drainage. And the upgrading of some internal streets from gravel to concrete paving blocks in various villages and township is continuous.

6.4.3 Public Transport

Greater Letaba municipality public transport is accessible to communities, whereby some commuters take less than 10 minutes' walk to access public transport. Whereas some commuters take more than 10 minutes to access public transport which is above service norms and standards.

6.4.4 Types of Transport

Municipality have three types of transport mode:

- Taxis.
- Rail operations (goods) and
- Bus transport.

6.4.4.1 Bus Operations

Bus operation is one of the dominant modes used for public transport in the municipality.

The dominant travel pattern of passengers is "home to work" in the morning and return trip in the evening. On most routes the demand peaks during the morning forward trip and evening return trip.

6.4.4.2 Taxi Operations and Taxi Ranks

In Greater Letaba Municipality and the district, taxis form a major high percentage of public transport. In Greater Letaba Municipality alone, there are 10 taxi ranks. Some of the taxi ranks are informal and therefore do not have the necessary facilities. There are plans to improve Modjadjikloof taxi rank in order to meet township standards.

Table no 28: List of Taxi Ranks

Name of Taxi Rank	Location	Formal/ Informal	Facilities	Utilized route
Modjadjiskloof Taxi Rank	Modjadjiskloof-on street	Formal	Shelter, hawker facilities, loading bays, offices and ablution blocks	Tzaneen and Ga-Kgapane
Ga-Kgapane Taxi Rank	Ga-Kgapane-off street	Formal	Shelter, loading bays and ablution blocks, hawkers' facilities	Tzaneen, Modjadjiskloof and Mokwakwaila
Sekgopo Taxi Rank	Ga-Sekgopo on Polokwane-Modjadjiskloof Road	Formal	Shelter, loading bays and ablution blocks	Modjadjiskloof and Polokwane
Sekgosese Taxi Rank	Wholesale complex-off	Formal	Shelter, ablution facilities, paving and fence	Modjadjiskloof, Polokwane; Makhado and Morebeng
Mokwakwaila Taxi Rank	Mokwakwaila Village-off-street	Formal	Shelter, loading bays and ablution facilities, hawkers.	Ga-Kgapane
Maphalle Taxi Rank	Giyani-Mooketsi Road at Maphalle Village	Formal	Shelter, loading bays and ablution facilities	Modjadjiskloof and Giyani
Khosothopa Taxi Rank	Giyani-Mooketsi road-off-street	Formal	Shelter, loading bays and ablution facilities	Giyani and Mokwakwaila
Phaphadi Taxi Tank	Mamaila village-on-street	Informal		Giyani

Mamphakhathi Rank	Taxi	Mamphakhathi Village on-street	Informal		Mokwakwaila
Kheshokhole Rank	Taxi	Matswi village on-street	Formal	Shelter, ablution facilities, paving and fence	Kgapane, Mokwakwaila

6.4.4.3 Rail Operations

There is minimal usage of railway operations as mode of transport. Rail is used mainly as goods carriers.

Public Transport Challenges and Opportunities

- Integrated transport plan not reviewed.
- Lack of transport by-laws.
- Infighting among taxis operators for routes
- Railway if utilised could relieve the burden of road usage.

6.4.6 SWOT Analysis

Table no 29: SWOT analysis

Strength	Weakness
<ul style="list-style-type: none"> • Refuse collected in townships and various villages • Most household have access to basic services such as electricity. • Water awareness campaigns 	<ul style="list-style-type: none"> • Maintenance of infrastructure • Low applications of free basic service and water
Opportunities	Threats
Alternative energy source (solar)	<ul style="list-style-type: none"> • In fighting among taxi operators for routes • Ageing water and sanitation infrastructure (Asbestos pipes)

7. SOCIAL SERVICES

7.1 Background

The historic imbalances in South African society resulted in the majority of our people living without land and housing, access to safe water and sanitation for all, affordable and sustainable energy sources, illiteracy, poor quality education and training, poor and inaccessible health services.

The following is the socio-analytic reflection of GLM:

GOGHSTA and the municipality have a mandate to facilitate between the community and department in terms of housing provision.

Table no 30: Type of Dwelling

Source: Census (2022)

7.2 Housing Backlog

According to municipal information the current housing backlog exists in urban and rural area is estimated at 3600 households. The municipality has the Housing Charter that outlines how the backlog will be eradicated.

However, there are integrated housing developments in Maphalle and Jamela. There are also development proposals in Modjadjiskloof Ext 4, Kgapane in order to address issues of housing.

7.3 Challenges

There is a need to unlock challenges of housing provision in Kgapane and Senwamokgope as well as unblocking of various projects in villages.

7.4 Informal Settlement

Informal settlement has major negative effect to the environment in that area occupied by structure without consideration of environmental potential. The areas affected by informal settlements are Mokgoba in Modjadjiskloof and Meshasheng at Ga-Kgapane. The major causes of informal settlement include poverty; unemployment; population growth and urbanization. This also creates environmental problems; unregulated building patterns and it destroys vegetation when buildings are built.

7.5 Health and Social Development

The challenge of the health sector in South Africa is to develop a unified national system capable of delivering quality health care to all citizens efficiently and in a caring environment.

7.6 Health and Social Development Services Standards

According to the Department of Health and Social Development there is 1 hospital, 2 health centre and 20 clinics within the Greater Letaba Municipal area.

Table no 31: Health Facilities

Village Name	Clinic Name	Hospital/Health Centre
Ga-Kgapane	Ga-Kgapane Clinic	Ga-Kgapane Hospital
Meidingen	Meidingen Clinic

7.7 Access to Health Care

Report from StatsSA indicates that within the GLM area, 42% of communities reside within 20 km of a hospital, 4% of communities reside within 10 km of a Health Centre and 91% of communities live within 5 km of a clinic with additional of 165 mobile clinics. With the exception of the very low Health Centre statistic, GLM compares favourably with the other local municipalities in the Mopani District.

The distance norm to rate accessibility does not take into consideration other restrictive factors, such as bad state of roads and therefore health facilities are in all probability less accessible to communities than reflected by the Department of Health criteria.

Many of the residents of the municipal area make use of health facilities in adjacent areas, such as the Tzaneen Private Hospital, the Van Velden Hospital at Tzaneen, Nkhensani (Giyani), Elim (Makhado) and the Polokwane Private Hospital for a variety of reasons.

The area is well served by clinics although primary health care is relatively not sufficiently accessible to people in the villages, as there are limited mobile clinics in use which operates from the Ga-Kgapane clinic.

Table no 32: Ga-Kgapane Hospital Beds Statistics

Hospital Classification	Approved Beds	Usable Beds	Current Bed Occupancy (%)
District	400	269	68%

Source: Department of Health, 2025

7.8 Health Facilities Challenges

- Insufficient mobile and visiting points.
- High vacancy rate e.g., doctors.
- A need for health centres in Sekgopo, Senwamokgope and Mokwakwaila;
- Lack of infrastructure for the required standards of health service.
- Acquiring a suitable site for the construction of a more capacitated clinic in Modjadjiskloof
- A need for EMS at Sekgopo and Mokwakwaila.
- Inaccessible road networks for ambulances.

7.9 Prevalence of Range of Diseases

The growth of HIV/AIDs in the past 10 years has been exponential growth rather than lineal growth. This has been caused by the following factors:

- Migration.
- Alcohol and substance abuse.
- High unemployment rate.
- Cross border gates and National route.
- Increase in commercialization of sexual activities and
- High Illiteracy rate.

Although the epidemic affects all sectors of society, poor household carry the greatest burden and have least resources available to cope with the impact of the disease. There are number of non-

governmental organization focusing on HIV/AIDS education, awareness and prevention programme.

7.11 Community Lifestyle

In GLM community lifestyle as well contribute to health problems such as stress, hypertension, heart diseases, diabetes and other health problems related to the lifestyle.

The rate at which the residents in GLM are attacked by the abovementioned diseases is high. Therefore, there is a need for facilities such as outdoor gyms, sports complex, youth center and as well as the old age facilities. These facilities will go a long way to promote healthy lifestyle within communities in the municipality.

Other prevalent diseases in the community are Diarrhea; Pneumonia; Tuberculosis; Malaria; Sexual Transmitted Infection and Cholera

7.12 Safety and Security

The South African Police Service (SAPS) is responsible for public safety and security in the municipality. Community Policing Forums (C.P.F) has been established within the municipality, although not fully functional, working in partnership with the police to curb crime in communities. There is a need for police station in Sekgopo and active Community safety forums.

Table no 33: Police Stations and Satellites

Name	Location	Satellite/ Police Station
Bolobedu	Ga-Kgapane	Police Station
Modjadjiskloof	Modjadjiskloof	Police Station
Sekgosese	Senwamokgope	Police Station
Mokwakwaila	Mokwakwaila	Police Station
Bellevue	Bellevue	Satellite
Sekgopo	Sekgopo	Satellite

Source: Dept. of Safety & Security

According to Regional SAPS office, there are not enough police officers in the Region, including GLM. This is one area that the district needs to prioritize. The highest crimes in this municipality which are still posing challenges to communities are theft, burglary and assault.

Table no 34: Crime Hotspots

Crime categories	Highly vulnerable areas/Hot Spots
Theft	Meidingeng, Ga-Kgapane, Makaba, Sedibeng Village, Lemondokop, Raphahlelo, Itieleng, Sephokhubje ,Mamaila, VaalWater, Westfalia, Mokgoba, Sekgopo, Mooketsi.
Burglary	Ga-Kgapane Township, Medingen Village, Mokwakwaila next to filling station and Sekgopo
Assault	Mokgoba, Mooketsi, Sekgopo
GBH	Ga-Kgapane Township, Burkina Faso, Mohlabaneng, Sekgopo

The following areas need satellites police station:

- Rotterdam
- Mothlele

7.13 Education

GLM has a number of existing schools and their condition leaves much to be desired. The maintenance and improvements of the schools in the municipality needs attention with libraries, adequate toilets and infrastructure.

Table no 35: Number of Existing Schools

Schools	ECD	Primary	Secondary	Independent	
	99				
Mopani East		81	57	4	142
Mopani West		42	24	4	70

in most of the schools in Greater Letaba Municipality. There is infrastructure backlog in both high and primary schools in relation to infrastructure such as water, and sanitation.

7.17 Literacy Level

In terms of Census 2022, the statistics shows decline in the level of illiteracy below 15 %. Although the progress is therefore satisfactory, but the level of illiteracy is still worrying since it impacts on the employability of the population. Therefore, interventions such as Adults Basic Education, libraries and excellence awards are necessary to arrest the situation.

With regard to the teacher/learner ratio for primary Schools, GLM needs to be facilitated in order to comply with the norms and standard as well as the secondary school is within the framework of the national norms and standard, therefore the situation has areas that needs to be monitored to ensure compliance. The performance of primary schools in terms of annual assessment is not satisfactory as learner cannot read and write, this has a long-term impact on Grade 12 results.

7.18 Sports, Arts and Culture

Greater Letaba Municipality has Sports, Arts and Culture Portfolio Committee to coordinate sports, arts and cultural activities; this is done in liaison with the Department of Arts, Sports and Culture in the province. The status of sports facilities in the municipality is as following.

Facilities	Status
Mokwawkwaila Stadium	Complete
Senwamokgope stadium	Complete
Ga-Kgapane stadium	Complete
Shaamiriri sports complex	Complete
Sekgopo sports complex	Complete
Lebaka sports complex	Complete
Madumeleng sports complex	Under construction
Rotterdam sports complex	Complete
Thakgalang sports complex	Complete
Mamanyoha sports complex	Complete

The municipality has outdoor gyms in the following areas:

- Modjadjiskloof; Ga-Kgapane; Senwamokgope; Sekgopo; Maphalle; Ga-Kuranta, Ga-Abel , Bodupe , Rotterdam and Matshwi.

The municipality has functional community halls in the following area:

- Sehlakong; Shotong; Ramaroka; Mamaila Mphotwane (Chris Hani); Lebaka(Thabo Mbeki); Ga-Kgapane(Sasko hall); Itieleng; Mahekgwe; Senwamokgope, Mokwakwaila, Matswi; Bodupe ;Mamaila-Kolobetona,Ntata, Sekgopo, Mohlele Thakgalang, Rotterdam , Goudplass, Mokwakwaila Stadium Hall , Senwamokgope Stadium hall.

The municipality should develop a maintenance plan and the utilisation of facilities to avoid dilapidations. There is relatively progress in terms of the community halls in various wards but more can still be done.

7.18.1 Sports, Arts and Culture Backlog

7.18.1.1 Libraries Facilities

In terms of libraries, shortage of books makes it difficult for people to develop academically. The Modjadjiskloof Library, Soetfontein Library, Sekgopo Ga-Kgapane Library, Mokwakwaila, Maphalle Library are the only libraries currently operational.

The state of school libraries leaves much to be desired, there are no libraries in most of the schools and they have converted classrooms to be utilized as libraries and they are under resourced with books and personnel.

The library facilities have been completed in the following area:

- Senwamokgope and Shotong library but need to be resourced to become fully operational.

7.18.1.2 Gravel Playgrounds Facilities

In terms of the playgrounds, there are also backlogs in relation to play grounds in areas where there are no stadiums and there's a need for the municipality to embark on the programme of developing playgrounds in rural areas or to upgrade the existing ones to the acceptable standards. There is a need to look into areas like Bodupe and other mountainous areas to assist them with grading for playgrounds. One other important factor to consider is the maintenance of the existing infrastructure.

7.19 Heritage Sites

GLM has number of sites which can be identified, celebrated and declared as heritage sites and such sites are:

- Modjadji Cycad Forest.
- The Rain Queen White House.
- Lebjene Ruins.
- Manokwe Cave.
- Khelobedu Dialects and
- Mamatlepa Kgashane Grave.
- Modjadjiskloof Waterfall

7.20 Thusong Centre Services

The Municipality has one Thusong Centre which is currently operational at Mokwakwaila. The Mokwakwaila thusong centre has been awarded the Most Improved Centre Nationally and the Center Manager also received the Best Center Manager Award for the year 2023/2024. This is positive indication in terms of how the municipality continues to serve communities with various stakeholders involved.

There is a backlog in terms of establishment of additional Thusong Centres in Sekgopo, Soetfontein and Rotterdam. The establishment of these centres would empower the poor and disadvantaged through access to information services and resources from governmental organization, parastatals, business and etc.

The following organizations provide services in the centres:

- SAPS.
- Post Office.
- Social Development.
- Early childhood development centre.
- Scrapyard.
- Youth centre.
- Greater Letaba Municipality and

- Electricity Utility.

7.21 Post Office and Telecommunications

The telecommunication infrastructure plays an important role in the development of other socio-economic sectors. An effective telecommunication infrastructure that includes universal access is essential to enable the delivery of basic services and the reconstruction and the development of the deprived areas. Guest Wi-Fi services are available at all GLM offices for public to have access.

7.21 Number of Post Offices

GLM have several post offices which include Moeketsi, Modjadjiskloof, Sekgopo, Sehlakong; Gakgapane post office and Soetfontein post office in Sekgosese area. Satellites post offices have been installed in the villages where the post offices are far away from villages in question.

7.22 Network Infrastructure Challenges

There are areas in the municipality which experienced network infrastructure challenges as indicated below by ICASA.

WARD	VILLAGE	CHALLENGES OF NETWORK (Radio, TV reception, Cellphone & Post office)
12	Thakgalang Itieleng Goedplaas	All Cellphone Network All Cellphone Network All Cellphone Network
13	Senwamokgope Itieleng Chabelane	Vodacom Mtn Mtn

Table no: 37: Icasa communication challenges

7.23 Post Office and Telecommunications Backlogs

7.23.1 Post office

The Greater Letaba Municipality have areas which don't have post offices and such areas are Rotterdam and Thakgalang.

7.24 Fire and Rescue Services, Disaster and Risk Management

7.24.1 Background Information

The disaster management is a continuous, integrated multi-sectoral, multi-disciplinary process of planning and implementation of measures aimed at disaster prevention, mitigation, preparedness, response, recovery and rehabilitation (Disaster Management Act 57 of 2002).

Greater Letaba Municipality has identified the following major disaster risks challenges:

Table no 38: Major Disaster Risks Prevalent in the Municipality

No.	Type	Risks
1	Hydro meteorological hazards	Draught, floods and fire
2	Biological hazards	Food poisoning, foot & Mouth diseases.
3	Technological hazard	Dam failure, road accidents
4	Environmental degradation	Deforestation, soil erosion, land degradation, and water pollution.

7.23 Flood disasters in Greater Letaba.

The heavy rain in January to march 2026 have caused widespread destruction of infrastructure and loss of life in the province. Government has declared the floods as a national disaster, thus allowing for mobilisation of resources and response across all levels of government. In Greater

Letaba most of the roads and bridges have been washed away, which require urgent intervention. Intervention is also needed to assist households that have been affected by the disaster, leaving many families without place to stay. Assessment has been done to determine how many houses have collapsed, services that have been affected and estimates of infrastructure needed. Below are images of areas that have been affected by floods

8. SPATIAL RATIONALE

8.1 Overview of the Local Economic Development

The purpose of local economic development (LED) is to build up the economic capacity of a local area to improve its economic future and the quality of life for all. It is a process by which public, business and nongovernmental sector partners work collectively to create better conditions for economic growth and employment generation.

The constitution is the overarching legislation in South Africa and all other policies, legislation and strategies have to align to it. It mandates all levels and spheres of government, to promote social and economic development.

Section 152 and 153 of the Constitution relates to economic development by stating the following objectives of local government:

- To promote social and economic development.
- To promote democratic and accountable government for local communities;
- To ensure the provision of services to communities in a sustainable manner;
- To promote a safe and healthy environment; and
- To encourage the involvement of communities and community organisations in the matters of local government.

Key Greater Letaba LED goals include:

- To create an enabling environment for business to opportunities;
- Supporting small and medium sized enterprises (SMMES);
- Encouraging the formation of new enterprises,
 - Enhancing coordination with agriculture and tourism sectors
- Attracting external investment (nationally and internationally);
- Investing in the developmental state of the municipality;
- Investing in soft infrastructure (educational and workforce development, institutional support systems and regulatory issues);

- Supporting the growth of particular clusters of businesses;
- Targeting particular parts of the locals for regeneration or growth (areas based initiatives);
- Supporting informal and newly emerging businesses.
 - Formalization of the business undertaking

8.2 Local Economic Profile

8.3.1 Employment Distribution by Category

Graph no 4: Employment Distribution by Category

Source: (Census 2022)

Table no 39: Employment Distribution by sector

Type of Sector	No of people employed
Agriculture	3 421
Mining (Sand)	664
Manufacturing	2 673
Electricity	350

Construction	2 476
Transport	1 584
Trade	11 258
Finance	2 112
Community Services	8 730
Household	1 228

8.4 Comparative and Competitive Advantage of Greater Letaba Municipality

8.4.1 Agricultural Sector

Agriculture in GLM plays a crucial role in economic development and employment opportunities. Emerging black farmers with potential for economic growth are compromised by lack of funding and therefore need financial assistance.

The most important factor limiting agricultural production and development in GLM is the availability of water. This is also true for the majority of Limpopo Province, which is located in the dry Savannah sub-region. In general, the province experience hot summer and mild winters, with the average annual rainfall ranging between 300-400 and 600 mm. The province also encompasses a wide range in respect of its topography, with its elevation varying between 600m-900m above sea level.

Large portion of the municipality have land capabilities of moderate potential arable land, concentrated mainly in the central parts of the municipality. Much of this land is currently under private ownership and is already utilised for cultivation. The North Western parts of the municipality mainly have land capability of marginal potential arable land and non-arable, low to moderate potential grazing land. These parts are almost extensively under Tribal Authority custodianship and may possibly be available for further development. However, given the largely limited potential for cultivation, further development potential in these parts of the municipality are limited, allowing mainly for grazing purpose. Despite this, there are number of plant options that could be considered for production in the municipality and need to be explored further.

Since most environmental factors that determine the habitat of specific crops can only be controlled or changed on a very small scale by the farmer, crops should be chosen that are adaptable to the environment.

Commercial farming in GLM comprises mainly mangoes, and avocados, with litchis and nuts also being farmed in the regions surrounding the municipality on a commercial scale. The largest tomato farm in Southern Africa, ZZ2 is located in the Mooketsi valley within GLM.

8.4.2 Forestry Sector

The location of forestry plantations in the southern parts of the Municipality creates opportunities for the beneficiation of timber products from these plantations. Forestry plantations in the Municipality are mainly owned by Mondi, Kulani, Montina (privately owned) and the with these companies largely undertaking processing enterprises themselves. Other existing processing undertaken in the Municipality includes sawmills, the dipping and production of electrification poles.

The location of these timber plantations within the municipal boundaries allows further value-adding opportunities through the manufacturing of timber construction materials.

These products could include timber beams and trusses, window and door frames, wooden flooring etc. The production of these construction materials could be of particular value in serving the local communities.

Possible further value-adding activities related to the timber plantations could also include the establishment of a furniture factory in Modjadjiskloof, close to the timber plantations. Support should be given for the establishment of SMMEs in the timber manufacturing industry and could include enterprises such as small scale furniture and coffin making.

8.4.3 Tourism Sector

GLM draws its comparative and competitive advantage from tourism. This is mainly because of the vast potential in terms of suitable resources in the municipality. These potentials are reflected hereunder:

- Rain Queen (Queen Modjadji);
- Modjadji Nature reserve, with the Modjadji (Encephalartos Transverse Cycad Forestry only found here);
- Vast tomato plantations of ZZ2;
- Shidila Lodge
- Modjadjiskloof waterfalls;
- Modjadjiskloof Lodge and caravan Park;

- Walking trails;
- Grootbosch;
- Manokwe Caves ;
- Nehakwe Mountains Lodge.
- Meloko
- The Modjadji Royal White House

8.4.4 Retail Sector

8.4.4.1 Formal Trading Activities

The formal trading activities in Greater Letaba Municipality takes place mainly in Modjadjiskloof e.g. Dusort, Kulani timbers Lone sawmill, Spar super market, U-save and Ga-Kgapane were there is Modjadji Plaza. E.g. Shoprite, KFC, Nedbank, Capitec bank as well as the ATMs for all banks (Standard bank, ABSA, FNB), Mashwi ,Usave Modjadjiskloof ,Usave, Mamaila Mall, Sekgopo Usave, Rob spices .

8.4.4.2 Informal Trading Activities

The informal sector plays a key role in supplying goods to the local communities. Main activities are located around taxi ranks, along key road segments and through the rural settlement.

8.5 Opportunity for Economic Growth and Employment

Greater Letaba Municipality has the following major economic pillars:

- Agriculture, including Agro processing which is already the largest part of formal employment;
- Tourism, which is the key sector with significant opportunities for expansion and growth.
- Retails and service businesses.

8.6 Local Skill Base

Greater Letaba Municipality should concentrate on three priority sectors namely agriculture, tourism, manufacturing and retail. There is general shortage of skills in these sectors. The municipality relies on the Department of Agriculture and Rural Development on agricultural technical skills. The municipality is an agricultural and tourism based potential, and skills can be invested in those sectors.

8.7 Strategically Located Land for Economic Development

There are three nodal points in the municipality which are strategically located for LED growth including:

- Ga-Kgapane nodal point which is largely doing well in terms of retail services;
- Senwamokgope nodal point is strategically located for shopping complex and
- Mokwakwaila nodal point could do well in terms of development of shopping complex and residential area also because of its centrality.
- Modjadjiskloof Extension 4

8.8 Challenges in the Municipal Economic Development

The following are challenges that hamper economic development in the municipality:

8.8.1 Land Claims

Vast majority of the land in greater letaba is privately owned and subjected to land claims. There is progress in terms of other claims that have been settled but much can be done so that opportunities can be unlocked to develop the municipality. The process of land claims is a lengthy one and has as yet not been resolved by the Land Claims Commission.

This not only creates a high level of uncertainty with regard to existing commercial farmers and their ability to expand or employ more people but also creates an uncertain climate that deters investment in the area.

8.8.2 Lack of Funding or Financial Support

Another constraining factor in respect of development in Greater Letaba Municipality is related to the large areas of land (approximately 50%) registered in the name of the state and under the custodianship of traditional authorities. As such, small farmers are farming on communal land, to which they cannot get title deed, but only have permission to occupy.

Therefore, farming on communal land precludes small farmers from obtaining financial support through commercial institutions such as banks, which prevents these farmers from expanding their farming enterprises or obtaining the necessary Assets such as specialised machinery. Furthermore, access to funding, even for minor, necessary improvements to public and private sector products in the tourism industry, is extremely difficult to secure.

8.8.3 Lack of Skills

The majority of the labour force in Greater Letaba Municipal area has no, or very limited basic skills, necessitating on-the-job training. Training is particularly necessary in the processing of fruit and vegetables and in the timber industry, which requires somewhat higher skills levels. The lack of these skills largely constrains the development of manufacturing and agro-processing industries in the municipal area.

Municipality has agricultural and tourism opportunities to tap in. In this respect, there are particular challenge in terms of the transfer of skills and mentorship from successful business people to entrepreneurs and small business owners.

Many of the small-scale farmers are illiterate to some extent or lack the knowledge in respect of writing business plans for their businesses. This is also the case for tourism development, where no sufficient practical support is given to emerging tourism entrepreneurs or SMMEs in terms of pre-feasibility, feasibility and business planning.

8.8.4 Access to Markets

Most of the small-scale farmers and manufacturers do not have access to the larger markets outside of the municipal area or even their respective villages. This forces them to sell their products to the local communities and prevents the expansion of their businesses.

Access to markets for small-scale farmers is further constrained by accessibility issues and the poor condition of roads in the remote rural areas. The municipality envisages developing the shopping complexes at Senwamokgope.

8.8.5 Lack of Adequate Water

A further constraining factor is the lack of water, particularly in the northern parts of the municipality. Many of the small-scale farmers are located alongside perennial rivers but a large proportion of farmers are located away from these rivers.

The water supply is not sufficient in terms of irrigation and many small-scale farmers therefore rely on dry-land farming. Furthermore, the main agricultural products only naturally occur in the southern parts of the municipal area. Agricultural production and expansion would therefore not be viable development options for the northern areas of the Municipality, which have a drier climate.

8.8.6 Lack of Industrial Park

In terms of manufacturing, a major constraining factor is the lack of a defined industrial area in the municipality, with some manufacturing plants being located among the business premises in Modjadjiskloof. Furthermore, industrial plants in Greater Letaba Municipality do not receive preferential rates in respect of electricity and water but are paying urban rates.

The establishment of an industrial estate with incentives for development could attract factories and other manufacturing industries to the municipality. Politsi industries and surrounding areas were shifted to Tzaneen after the Municipal Boundaries Demarcation in 2000.

8.8.7 Lack of Man-made Tourism Infrastructure

GLM does not currently have a large range of accommodation, conference or tourism facilities, which hampers the development of the tourism sector in the municipality. The town of Modjadjiskloof also has very little to offer as a place to stop for refreshments or supplies. In addition, if a critical mass of attractive and innovative products is not created at Modjadji, and adequately marketed, the few products that have been created will fail to perform in the highly competitive situation that prevails in South African tourism as a whole.

Furthermore, the lack of coordination in terms of an integrated tourism development plan for Modjadji is a serious threat, which could result in one of Limpopo's most important tourism icons never reaching its full potential.

8.9 LED Projects in Greater Letaba Municipality

The municipality is embarking on various LED projects with the aim of growing the economy through identifying and assisting various SMMEs within the municipality to be self-sustaining and create employment. In the past financial year, the municipality was able to assist local farmers through farming inputs (seeds, boreholes, fencing, fertilizers, water tanks, drips). The LED section continues to monitor and work with various local business within the LED forums to address issues around economic development in the municipality. The LED section plans to rejuvenate the tourism sector, trade and industry and agriculture sector for the municipality to attract employment and capital investment and unlock hidden heritage sites. Manokwe Cave, Mokwakwaila factor business center, operationalisation of Senopelwa Showground, Caravan Park are some of the plans the municipality will embark on in the 2025/26 financial year. In terms of Tourism, the municipality plans to have tourism signage in all tourism establishment.

8.10 SWOT Analysis: Local Economic Development

STRENGTH	WEAKNESSES
<ul style="list-style-type: none"> • Functional LED Forum • Available tourism natural resources • Available of Arable land • Updated LED Strategy • Available of Business Registration Centre 	<ul style="list-style-type: none"> • Limited economic viable areas; • General shortage of skills in three priority sectors: agriculture, tourism and retail; • Lack of land for industrial development • Lack of infrastructure for development • Poor road networks to economic development areas. • Economic dependence on government for employment and revenue and • Insufficient funds to maintaining existing infrastructure.
• Opportunities	Threats
<ul style="list-style-type: none"> • Growing retail opportunities. • Potential tourism growth • Growing Agricultural economy • Agro-Processing • Formalisation of business undertakings 	<ul style="list-style-type: none"> • High unemployment and high proportion of discouraged workers. • Excessive reliance on un-qualified ground water resources. • HIV afflicting the economically irrational active people and governance structures. • Climate change • Stock theft • Shortage of water

Table no 42: Local Economic Development SWOT Analysis:

9. MUNICIPAL FINANCIAL VIABILITY AND MANAGEMENT

9.1 Introduction

The purpose of analysing the financials of the municipality is to determine the financial soundness of the institution so that the municipality can improve its financial management capacity and revenue. However, grants dependency is a serious financial constraint to the municipality.

9.2 Financial Health Status

The municipality had total revenue of **R596,739,610** in 2025/24 when compared to **R526,582,212** in 2024/23. This marked an increase of **R70 157 398** (13,32%) when compared to the 2024/23 financial year. The municipal revenue is categorized into internal and external sources. The internal sources of revenue contributed **R 100 702 630** which is 16.87% of the total revenue while external sources contributed 83.13%.

Total expenditure for the 2025/24 stood at **R 501 437 348** which illustrate a increase of **R6 942 849 (1.3%)** when compared to **R494 494 499** in 2024/23. The overall expenditure led to a surplus of **R92 503 668** comparison to a surplus of **R28 676 971** in 2024/23 financial year. It is further recommended that this section be read together with the Unaudited Annual Financial Statements.

9.2 Statement of Financial Performance

9.2.1 Revenue

	2025	2024
Revenue from exchange transactions		
Service charges	31,629,028	32,143,338
Construction contracts	16,940,187	9,561,739

Total capital assets	137 540 978.21	133 960 978.21	97.40

9.3 Asset and Liability Management

The table below is a summary is a summary of the audited consolidated statement of financial positions as of 30 June 2025.in comparison with 30 June 2024.

Statement of Financial Position as of June 30,2025

Figures in Rand	2025	2024	
			Restated*
Assets			
Current Assets	69,551,184		57,808,195
Non-Current Assets	1,281,427,713		1,211,010,042
Total Assets	1,350,978,897		1,268,818,237
Liabilities			
Current Liabilities	107,269,324		115,796,022
Non-Current Liabilities	25,246,178		27,062,489
Total Liabilities	132,515,502		142,858,511
Net Assets	1,218,463,395		1,125,959,726
Accumulated surplus	1,218,439,652		1,125,959,726
Total Net Assets	1,218,439,652		1,125,959,726

The total actual assets value as at the year ended 30 June 2025 amounted to R 1.350 billion in comparison with the prior year 2023/2024 which amounted to R 1.268 billion , thus indicating an increase of about R82 million. The total liabilities including current and non-current liabilities for the reported period ended 30 June 2025 amounted to R 132.5 million in comparison with the prior year of 30 June 2024 which amounted to R142.8 million thus indicating an decrease of about R10.3 million.

9.4 Cash Flow and Investment Management.

The table below is the summary of cash flow for the year ended 30 June 2025 thus indicating the cash inflows and outflows:

Cash Flow Statement

Figures in Rand	2025	2024	
			Restated*
Net cash flows from operating activities	123,772,048		99,459,947
Net cash flows from investing activities	(121,146,097)		(90,317,925)
Cash flows from financing activities	(2,560,284)		(238,360)
Net increase/(decrease) in cash and cash equivalents	65,667		8,903,662
Cash and cash equivalents at the beginning of the year	12,486,446		3,582,784
Cash and cash equivalents at the end of the year	12,552,113		12,486,446

The cash generated from operating activities amounts to R123.7 million for the reported period ended 30 June 2025 and indicates an increase of about R24.3 million rand in comparison with R99.4 million for the prior year ended 30 June 2024. The cash and cash equivalents balance amounts to R12.5 million. The Municipality does not have loans.

9.5 Other Financial Matters

9.5.1 Supply Chain Management

The municipality has established three committees, namely The Bid Specification Committee, Bid Evaluation Committee and Bid Adjudication Committee in consistent with the MFMA Supply Chain Management Regulations. The members of the respective committees have been appointed by the Accounting Officer in written. The Treasury department has assisted the municipality in training of the bids committee members. All supply chain management quarterly reports were consistently reported to the Mayor as required by regulation 6 (3) of the supply chain management of 27636 dated 30 May 2005 issued by National Treasury which stipulates that "Municipal Manager must within ten (10) days of the end of each quarter, submit a report on the implementation of supply chain management policy to the Mayor of the Municipality or the board of directors of the municipal entity"

9.5.2 Accounting Services and Reporting

The annual financial statements of the municipality were prepared on an actual basis of accounting in accordance with standards of the General Recognized Accounting Practice (GRAP) including any interpretations, guidelines and directives issued by the Accounting Standards Board (ASB) which forms part of GRAP reporting framework. GRAP is the acronym for **Generally Recognized Accounting Practice**, and it provides the rules by which municipalities are required to maintain their financial accounts. Successful GRAP compliance will ensure that municipal accounts are comparable and more informative for the municipality. It will also ensure that the municipality is more accountable to its citizens and other stakeholders. Information on GRAP compliance is needed to enable National Treasury to assess the pace of progress and consider the implications. The annual financial statements were also presented to the municipal Audit Committee.

9.2 Financial Management System

The financial management system comprises of policies, procedures, personnel and equipment. The municipality has financial management policies and procedures.

The following financial management policies and procedures were approved by Council:

9.2.1 Credit Control and Debt Collection Procedures/Policies

The municipality has a credit control policy which outlines methods and procedure for debt collections in terms of non-compliance. The Credit Control and Debt Collection Policy was reviewed, the policy is credible, sustainable, manageable and informed by affordability and value for money. There has been a need to review certain components to achieve a higher collection rate. Some of the revisions included the lowering of the credit periods for the down payment of debts.

9.7 Billing System

The municipality has an effective billing system which enables the municipality to collect revenue.

9.8 Revenue Management

The municipality has mechanisms in place to ensure revenue enhancing capacity within the municipality. Due to reliance on grants and low collection on rates and services, the municipality has developed the revenue enhancement strategy to assist the municipality to effectively generate income. The purpose of the strategy is to stabilize the financial and economic sustainability of the municipality to broaden the income base and increase revenue and reduce proportionally high costs to affordable levels and to Create an environment which enhances

development, growth and service delivery. There is a need for the municipality to embark on collections in different properties owned by the municipality but services not being paid by the people utilising these properties.

9.9 Investment Policy

The municipality has developed an investment policy which guides all investment activities and the utilization of the proceeds from such investments.

9.10 Tariffs policy

The municipality's tariff policy provides a broad framework within which the council can determine fair, transparent and affordable charges that promote sustainable delivery. This policy is also applicable to all sundry tariffs, as provided for in the Tariff listing of Greater Letaba Municipality.

9.11 Indigent policy

In terms of the municipality's indigent policy, households with a total monthly gross income as determined by Council qualifies to a subsidy on property rates and services charges for sewerage and refuse removal and will additionally receive 6kl of water per month free of charge. The free basic electricity households are also covered in the Indigent policy. The policy gives priority to the basic needs of the community, promote the social and economic development of the community and ensure that all residents and communities in the municipality have access to at least the minimum level of basic municipal services.

9.12 Rates policy

The Rates policy allows the municipality to exercise their power to impose rates within a statutory framework which enhance certainty, uniformity and simplicity across the nation, and which takes account of historical imbalances and the burden of rates on the poor. The objective of this policy is to give effect to the implementation of the Rates policy as contemplated in Section 6 of the Municipal Property Rates Act.

9.13 Submission of Financial Statements to the Office of the Auditor General of South Africa (AGSA)

The municipality also adheres to the stipulated timeframes with regard to submission of financial statements and addresses audit raised timeously.

9.14 Corrective Measures on Auditor General Reports

Audit action plan was developed to address findings raised by Auditor General. The Audit Steering committee was also established to track progress during audit and monitor implementation of the AGSA's matters.

9.15 Financial Viability SWOT

STRENGTH	WEAKNESS	OPPORTUNITIES	THREATS
<ul style="list-style-type: none"> • Sound cash flow and budget management • Non-reliance on overdrafts and loans • 100% spending of conditional grants • MFMA compliance • Improved SCM controls 	<ul style="list-style-type: none"> • Grant dependency • Small revenue base • Debt collection • Unfunded budget 	<ul style="list-style-type: none"> • Intergovernmental support • MSCOA system • Township establishment in Vrystat for additional revenue sources 	<ul style="list-style-type: none"> • Cyber attacks • Fraud

10. GOOD GOVERNANCE AND PUBLIC PARTICIPATION

10.1 Background

Section 152 of the constitution reflects that one of the objectives of the Local government is to encourage the involvement of communities. The white paper on local government expects the municipality to be working with citizens and groups within the community to find sustainable ways to meet their economic, social and material needs and improve the quality of lives.

Greater Letaba Municipality is using a number of ways and systems to involve communities and improve governance such as:

- Public participation.
- IDP representative forum.
- Imbizos.
- Quarterly meeting of Traditional leaders.
- Inter- governmental forum at local level;
- Community input through wards committee and
- Environmental-Forum.

10.2 Municipal Council and Committees

The Municipal Council Committees such as the Executive and Portfolio committees are fully functional. Council meeting are held quarterly with special council meetings convened when needs arise.

10.3 Relationship with Traditional Council

GLM has a good relationship with the 10 traditional council. These traditional leaders sit in the council of the municipality. The municipality has established a Traditional Leader's Forum which sits on quarterly basis with the Mayor.

10.4 Inter-governmental Relations

GLM is responsible for facilitating inter-governmental relations within its area of jurisdiction. The municipality is the convenor of the manager's forum for strategic alignment, coordination and integration. It serves as an intergovernmental structure where sector Departmental managers in the municipality.

10.5 Community Input

The municipality will appoint ward committees in all wards that assist the municipality in getting community inputs.

The municipality has functional ward committees in all 30 wards. They attend all municipal activities as expected. Public meetings are held where communities are given progress reports and continuous seeking mandate.

10.6 Ward Committees

The municipality established 30 ward committees which assist council in term of liaising with the community. They play a role as a link between the community and the municipality and facilitate development of long-term vision. Ward committees ensure that the needs of the community are captured in the IDP by attending public participation meetings and submitting inputs to the municipality.

The municipality has developed a ward committee policy to ensure the effectiveness and efficiency of the system. The ward committees assist in terms of monitoring municipal institutional performance. The ward committee's reports get evaluated every month for the purpose of monitoring their functionality and effectiveness.

10.7 Community Development Workers

The municipality has 18 CDW's against 30 wards, meaning some of these CDW's are allocated in more than one ward. These impacts on the effectiveness of their operation.

10.8 Oversight Committees

10.8.1 Municipal Public Account Committee (MPAC)

The municipality has established a Municipal Public Accounts Committee in terms of Sections 33 and 79 of the Municipal Structures Act 1998. This committee plays an oversight role of the council.

The committee consists of nine non-executive councillors.

10.8.2 Municipal Council Committees

Greater Letaba Municipality has established Council Committees to assist with various processing of issues and reporting to EXCO.

10.9 Internal Audit and Anti-fraud Corruption

10.9.1 Internal Audit

Risk based audits are conducted and reports are submitted to management and audit committee. The municipality has its own audit committee which performs its responsibility in terms of Sections 165 and 166 of the MFMA

10.9.1 Antifraud-Corruption Strategy

The municipality has developed the antifraud-corruption strategy; whose objectives are:

- To prevent and combat fraud and corruption and related corruption activities.
- To punish perpetrators of corruption and fraud
- To safeguard GLM properties, funds, business, and interest.
-

10. Risk Management

- The risk management report provides extensive information on the strategic risks facing the municipality, and the manner in which they will be mitigated and the impact on the municipal objectives. The following risks were identified.

10.10 Risk Management

The risk management report provides extensive information on the strategic risks facing the municipality, and the manner in which they will be mitigated and the impact on the municipal objectives. The following risks were identified.

STRATEGIC RISK 2026/2027				
No	Strategic objectives	Risk	Root causes	Action Plan
1	Access to sustainable quality basic services.	Basic services interruptions	<ol style="list-style-type: none"> 1. Critical damage to infrastructure due to vandalism or natural disaster 2. Inadequate maintenance of infrastructure 3. Ineffective inter-governmental relation 4. Inadequate access to communication networks 5. Electricity supply instability 6. Poor quality of project deliveries by service providers 7. Changes in monetary or fiscal policy that can impact economic stability 8. Inflation and currency fluctuations. 9. Reductions in local government funding can impact services delivery 10. Strikes 	<ol style="list-style-type: none"> 1. Installation of inventor systems 2. Implementation of electricity infrastructure maintenance plan 3. Implementation of road maintenance plan 4. Ensure functionality of the local IGR 5. Implementation of the Bylaws. 6. 6	Improved and inclusive local economy	Unsustainability of economic initiatives	<ol style="list-style-type: none"> 1. Land claims 2. Limited access to credit and financial service SMEs 3. Lack of skills 4. Difficulty in accessing larger markets due to geographical or logistical barriers. 5. Lack of adequate water 6. Lack of a defined industrial area 7. Lack of tourism infrastructure and coordination in terms of an integrated tourism development plan 8. Underutilised economic potential 9. Uncoordinated informal and street trading 	<ol style="list-style-type: none"> 1. Installation tourism signage in all tourism establishment. 2. Rejuvenate the tourism sector, trade and industry and agriculture sector for the municipality to attract employment and capital investment 3. Provide financial assistance to SMMEs 4. Identification of tourism heritage sites to be recognised by tourism council 5. Coordinating training of SMMEs with Provincial Treasury 6. Establishment of business development center 7. Conduct door to door campaigns for unregistered businesses. 8. Implementation of Street trading by-Laws 9. Identification of dedicated trading areas 11. Coordination of LED forums 12. Employment of locals within the service delivery projects 13. Bursaries offered to members of the

				community 14. Implementation of LED strategy
7	Improved governance and organisational excellence	Non-compliance with laws and regulations	<ol style="list-style-type: none"> 1. Compliance complexities in sustainability reporting. 2. Changes to current regulations that can alter compliance requirements 3. Changes in Legislation and Regulations 	<ol style="list-style-type: none"> 1. Regularly evaluate the regulatory landscape relevant to the municipality 2. Maintain communication with regulators and industry associations to stay informed about potential changes 3. Establish compliance programs to ensure adherence to regulations 4. Consult legal experts to navigate complexities 5. Fostering a culture to quickly respond to regulatory changes 6. Creating awareness on new legislation developments.
8	Improved governance and organisational excellence	Unfavourable audit opinion	<ol style="list-style-type: none"> 1. Material misstatement in AFS and APR 2. Inaccuracy of revenue from exchange transactions 3. Valuation of Contingent Liabilities 4. Material irregularity 5. Completeness of UIFWE 6. Existence and completeness of Property Plant and Equipment 7. Ineffective use of consultants 8. Inadequate internal control 9. Non-compliance with accounting standard 10. Inadequate accounting records 11. Inadequate review of AFS and APR by stakeholders 	<ol style="list-style-type: none"> 1. Implement internal controls to ensure accurate financial reporting and compliance with regulations ensuring proper checks and financial reporting. 2. Training of finance teams on IFRS and GRAP-based accounting standard to improve accuracy of reporting 3. Review procedures to guide reporting practices. 4. Review financial statements before the external audit to identify discrepancies. 5. Conduct internal audits to assess the effectiveness of controls and compliance with policies. 6. Implementation and monitoring of recommendation from external and internal audit action plans. 7. Regularly convening of audit steering committee (Weekly) after the conclusion

				<p>of the external audit.</p> <p>8. Conduct quarterly audits of inventory/ assets to prevent leakage</p> <p>9. Establishment of record management system</p> <p>Compilation of the quarterly financial statement that are due 60 days after the end of the quarter</p>
9	Integrated sustainable development	Uncoordinated development	<p>1. Inability to fund spatial development projects</p> <p>2. Land claims and disputes</p> <p>3.Red Tape in approval processes for development purposes</p> <p>4. Land invasions</p>	<p>1. Submission of proposals for infrastructure funding development</p> <p>2. Establishment a GIS unit within the Municipality</p> <p>3. Review of intergrated transport plan (ITP)</p> <p>4. Develop service standards for processing of applications</p>
10	Sustainable financial institution	High contiigent liabilities	Municipality facing various public liability lawsuits	<p>1.Request thorough case evaluation and affordable defense solutions for ongoing legal proceedings</p> <p>2.Conduct root cause analysis on current cases to address control gaps and inform staff awareness programs</p> <p>3.Appropriate accruals for contingent liabilities as per IAS37</p>

10.11 Supply Chain Committees

The municipality has established supply chain committees in terms of supply chain regulation of local government. The Bid specification, evaluation and adjudication committees are established and functional.

10.12 Complaints Management System

The municipality has established a complaints management system in order to address service delivery related complaints. Through this system the municipality is able to attend and address issues concerning the municipality. The municipality has established the batho pele committee The premier complaints forum and the presidential hotline are also in place are also in place.

10.13 Audit Outcome for the Past Five (5) Financial Years

The table below depicts the audit outcomes of Greater Letaba Municipality for the past five (5) financial years.

Table no 43: Municipal Audit Outcomes from 2019/2020 to 2023/2024

2019/2020	2020/2021	2021/2022	2022/2023	2023/2024
Unqualified	Unqualified	Unqualified	Unqualified	Unqualified

Source: Auditor General Report

10.14 Public Participation Programme

The municipality has developed an annual public participation programme. The programme targets all wards and specific villages. These meetings afford politicians opportunity to report back on progress made and direct contact with ordinary community members. The municipality will conduct IDP/Budget public participation during the month of April 2025. These meetings were well attended and are spread across the 4 municipal clusters from 22 April to 30 April 2025.

10.15 Communication System

The municipality has a communication strategy which is reviewed annually and has a communication unit. These initiatives have improved communications amongst stakeholders around key municipal activities and programmes.

10.16 Special Programme for Council

The special activities of council are namely:

- Gender desk;

- Youth desk and
- Disability desk.
- HIV/ AIDS Council

These desk have been established in the office of the mayor to coordinate the interest, promote needs of special groups in the programmes and activities of the municipality. The needs of the special groups amongst others are:

- Skills development;
- Employment opportunities and
- Assistance devices like wheelchairs, walking sticks, hearing aids etc.

10.17 Organizational Structure and Alignment to Powers and Functions

The municipality had developed an organogram which has been adopted by council. The total composition of the staff establishment is 321 with 279 posts filled. This indicates a vacancy of 56 posts which is 17%. The filling of posts is done in terms of the need that is informed by the IDP and Budget. The organogram was done in line with the powers and functions of the municipality. All the positions are aligned to the powers and functions.

10.18 Special Groups

10.18.1 Youth and Children

Youth constitute the highest population in GLM and they represent the most vulnerable group in the society.

Table no 44: Needs and Challenges of Youth and Children

Needs	Challenges
Recreational parks	Child Abuse
Youth information Centre	High school drop-out
Bursaries	Teenage Pregnancy
Community Libraries	Alcohol and substance abuse
Job creation	HIV/AIDS
Sports complex	Unemployment

10.18.2 Women and Elderly

In GLM women constitute about over 55% of the general population. Elderly women are as well regarded as vulnerable group in the society and they are faced with serious challenges.

Table no 45: Needs and Challenges of Women and Elderly

Needs	Challenges
Old age facilities	Abuse and neglect
Family support programme	Sexism
Women sports development	Inequality and patriarchy
Community poverty alleviation project	Vulnerable
Jobs	Illiteracy

Table no 46: Challenges Faced by Disability

Needs	Challenges
Disability friendly RDP houses (toilet inside)	Abuse and neglect
Braille and sign language interpretation in public events	Inequality
Disability sports and sports facilities	Accessibility of public transport and infrastructure
Automated wheelchairs	Unavailability of assistive devices

10.19 HIV/ AIDS Mainstreaming in the Housing Sector

Poor housing and infrastructure affect persons with HIV/AIDS and those with it in turn affect the production of housing, the ownership status of the houses, repayments and the sustainability of the concerned institutions.

Some of the connections between housing and HIV/AIDS:

- Evictions and homelessness
- Overcrowding
- Stretched household budgets.

11. MUNICIPAL TRANSFORMATION AND INSTITUTIONAL DEVELOPMENT

11.1 Background

The purpose of conducting an institutional analysis is to ensure that the municipal development strategies take existing institutional capacities into consideration and that institutional shortcomings are addressed. The Greater Letaba Local Municipality was established in 2000 in terms of the Municipal Structures Act, 1998 (Act No. 117 of 1998).

11.2 Political Structure

11.2.1 Political Component

GLM is a category B type municipality and is graded at Level 3. It has an executive committee system. The political component of the municipality comprises of 60 councillors, 30 of them are ward councillors with each representing their constituencies. The Mayor is the political head of the municipality. The Speaker presides over the council. By comparison, there is a political stability in the municipality.

11.2.3 The Executive Committee

There are 10 (ten) executive committee members. The Mayor chairs the executive committee meetings. The Executive Committee consist of the following councillors:

Table no 47: Executive Committee Members

Cllr. Mamanyoha T.D	The Mayor
Cllr. Lebeko F	Corporate and Shared Services
Cllr. Kgapano T.J	Budget and Treasury
Cllr. Ramaremela M.J	Economic Development, Housing and Spatial Planning
Cllr. Lebepe T.P	Environment Affairs
Cllr Mohlele M	Public Transport and Roads
Cllr. Baloyi R.G	Infrastructure
Cllr. Selowa M.G	Water and Sanitation Services
Cllr. Mosila R	Community Services
Cllr. Ramaano K.E	Sport, Recreation, Arts and Culture

Table no 48: MPAC Committee Members

MPAC Chairperson	Cllr. Manyama M
Committee Members	Cllr. Mohale R.W Cllr. Lekitima M.V Cllr. Mohale M.J Cllr. Monyela K.B Cllr. Selowa D.L Cllr. Ramapuputla L Cllr. Ndimba B.H Cllr. Mabidilala E Cllr. Mangena M.S

Greater Letaba Municipality Organogram

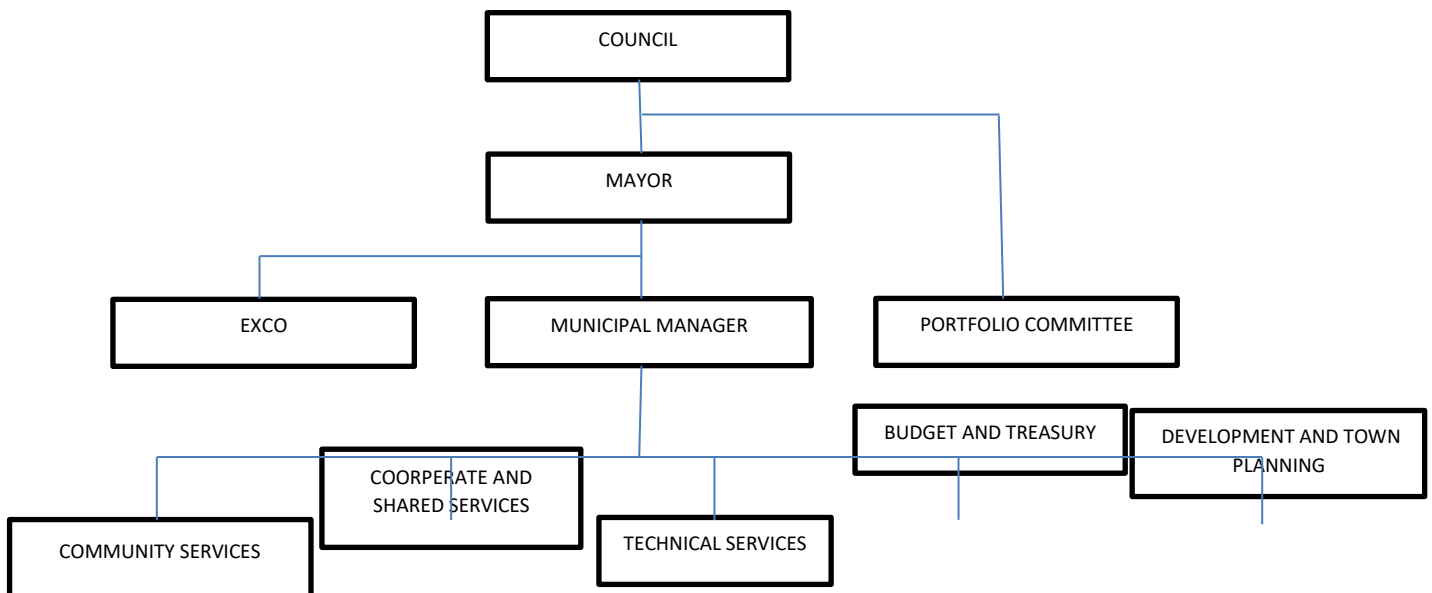

Figure no:1 GLM Organogram

11.3 Greater Letaba Municipality Employment Equity

The Greater Letaba Municipality Employment Equity Plan was approved by the council. The plan was last reviewed in July 2022 and it deals with identified employment barriers as well target to achieve demographic representation. The plan is reviewed annually.

Table no 49: Employment demographics

Occupational level	Male		Female		TOTAL
	African	White	African	White	
Top management (section 57)	01		00	0	01
Senior management (level 02)	03		02		05
Professionally qualified and experienced specialist and mid management (level 03)	34	1	13	01	48
Skilled technical and academically qualified workers, junior management, supervisors, foreman, and superintendents	29	0	23	0	52
Semi-skilled and discretionary decision making	49	0	38	0	87
Unskilled and defined decision making	35	01	51	0	87
Total	151	01	127	01	280

11.4 Greater Letaba Municipality’s Powers and Functions

- The provision and maintenance of childcare facilities.
- Development of local tourism.
- Municipal planning.

- Municipal roads and public transport.
- Administer public regulations.
- Administer billboards and display of advertisements in public areas.
- Administer cemeteries, funerals parlours and crematoriums.
- Cleansing.
- Control of public nuisances.
- Control of undertakings that sell liquor to the public.
- Ensure the provision of facilities for the accommodation, care and burial of animals.
- Fencing and fences.
- Licensing and dogs.
- Licensing and control of undertakings that sell food to public.
- Administer and maintenance of local amenities.
- Development and maintenance of local sport facilities.
- Develop and administer markets.
- Development and maintenance of municipal parks and recreation.
- Regulate noise pollution.
- Administer pounds.
- Development and maintenance of disposal.
- Administer street trading.
- The imposition and collection of taxes and charges on fees as related to the municipal's function.
- Receipt and allocation of grants made to the municipalities.
- Imposition and collection of other taxes, levies and duties as related to the municipality's functions and
- Refuse removal, refuse dumps disposal.

11.5 Administrative Component

The Municipal Manager is the head of the administrative arm of the municipality. There are Six (6) directorates in the municipality namely:

- Municipal manager and Mayor's office
- Budget and Treasury Office.
- Technical Services.
- Corporate and Shared Services.
- Community Services and Social Development
- Development and Town Planning.

Each directorate is headed by a director who is accountable to the Municipal Manager. The office of the Municipal Manager is organized purposefully to give administrative support to council sittings, executive committee meetings, office of the mayor, the speaker, the chief whip and three other full-time councillors. The rest of the other councillors utilize the office of the mayor and their respective directorates for administrative and service delivery purposes.

Table no 50: Municipal Directorates and their Functions

Directorate/Office	Purpose of the Directorate
Corporate And Shared Services	To ensure efficient and effective operation of council services, human resources management, legal services and the provision of high-quality customer orientated administrative systems. Ensuring 100% compliance to the Skills Development Plan.
Budget and Treasury	To secure sound and sustainable management of the financial affairs of GLM by managing the budget and treasury office and advisory services to all council providing structures and assist the accounting officer and other directors in their duties and delegation contained in the MFMA. Ensuring that GLM is 100% financially viable when it comes to Cost Coverage and to manage the Grant Revenue of the municipality so that no grant funding is foregone.
Technical Services	To ensure that the service delivery requirements for roads are met and maintenance of water, sewerage and electricity are conducted for access to basic services. To ensure all allocated grants are fully spent (INEP and MIG).
Development and Town Planning	Investment growth through appropriate town and infrastructure planning in order that an environment is created whereby all residents will have a sustainable income.
Community Services and Social Development	To co-ordinate Environmental Health Services, Sports Arts and culture, Education, Libraries, Safety and security, Environmental and Waste management, Health and Social development programmes as well as Disaster management to decrease community affected by disasters.
Office of the Municipal Manager	To lead, direct, manage, motivate and inspire workforce and account to the Greater Letaba Municipal Council as the Accounting Officer for long term Municipal sustainability. To achieve a good credit rating by the municipality. To ensure institutional performance and compliance with relevant legislation. To monitor the performance of the following units: Performance

	Management System, Risk management, Legal services, Internal audit, Communication and events, Gender and Disability, Special programmes, Youth/HIV and Aids, Public participation.
--	--

11.6 Management Information System

The Municipality has an effective and efficient Information Communication and Technology (ICT) systems, governed by the Policy manual.

The following policies are approved by the Council:

- ICT Governance Framework;
- ICT acceptable usage policy;
- ICT backup policy;
- ICT email policy;
- ICT internet policy;
- ICT user account management policy;
- ICT External Service Providers (ESP) contractors;
- ICT equipment policy;
- ICT Firewall Policy;
- ICT patch management policy;
- ICT Service Continuity Policy;
- ICT Data Centre Physical Access and Environmental Control Policy;
- ICT Anti-Virus Policy;
- ICT Security Policy and
- ICT Change Management Policy.

11.7 Community Participation

The Constitution of South Africa (1996) and the Municipal Systems Act (2000) require municipalities to involve communities in municipal governance. GLM has a communication strategy which addresses issues of community participation.

Mechanisms used by the municipality to involve communities are:

- Radio talks consultative;
- The IDP/Budget processes;
- Ward based planning;
- Consultative processes on issues of development i.e. by-laws, municipal demarcation;

- Imbizos;
- Petitions;
- Submission of inputs and Campaigns.

11.8 Human Resource Management System

The focus of human resource management in the municipality is to develop the necessary capacity internally so that the organisation can execute its developmental mandate.

The following human resource policies are approved by the Council:

- Communication policy;
- Cellular phone policy;
- Contract of employment policy;
- Bursary policy for members of the public;
- Conditions of service policy;
- Internship and experiential programme policy;
- HIV/AIDS policy;
- Employee assistance programme policy;
- Labour relations policy;
- Occupational health and safety policy;
- Language policy;
- Performance management system policy;
- Skills development policy;
- Recruitment and selection policy;
- Protective clothing allowance policy;
- Smoking policy;
- Subsistence allowance policy;
- Succession planning policy;

- Travel allowance policy for councillors;
- Telephone management policy;
- Anti-fraud and corruption policy;
- Whistle blowing policy;
- Car allowance policy;
- Career management and retention policy;
- Transport control policy and
- Sports policy.
- Leave management policy
- Ward committee policy
- EPWP policy
- Danger allowance policy
- Covid-19 policy

11.9 Employment Equity Plan and Challenges

The Municipality has an employment equity plan to ensure equitable representation of all groups, particularly the previously disadvantaged groups.

The Employment Equity Plan (EEP) has been approved by council to address previous shortcomings. The municipality has members of designated groups in different categories of the workforce areas.

People with disability are not represented at the management level. However, there are challenges in terms of achieving employment targets which include amongst others the reluctance by members of the designated groups to apply for positions at management level despite the management efforts encouraging them to apply during advertisement. When they have applied the issue of capacity becomes a challenge.

11.10 Vacancy Rate within the Municipality

The vacancy rate of Greater Letaba Municipality is at 15% (48 vacant posts).

11.11 Skills Needs within the Municipality

Greater Letaba Municipality has a need for skills such as Finance, Tourism Engineering and Built Environment, and Information Technology

11.12 Performance Management System

Performance Management is a tool that is used to measure the performance of an organisation. It involves setting of desired strategic objectives, outcomes, indicators and targets, alignment of programmes, projects and processes directly to the organisation.

In terms of Chapters 5 and 6 of the Municipal Systems Act, 2000 (Act No. 32 of 2000), local government is required to:

- Develop a performance management system;
- Set targets, monitor and review performance, based on indicators linked to the Integrated Development Plan (IDP);
- Publish an annual report on performance of the councillors, staff, the public and other spheres of government;
- Incorporate and report on a set of general indicators prescribed nationally by the minister responsible for local government.
- Conduct an internal audit on performance before tabling the report.
- Have the annual performance report audited by the Auditor-General.
- Involve the community in setting indicators targets and reviewing municipal performance.

GLM's performance management system aims at ensuring that all the departments within the municipality are working coherently to achieve optimum desired results. This is done by planning, reviewing, implementing, monitoring, measuring and reporting on its activities.

The development of Greater Letaba municipality's Performance Management Framework was guided by different pieces of legislations which include amongst others the following:

- Constitution of the Republic of South Africa, Chapter 7 of Act 108 (1996);
- White Paper on Local Government 1998;
- Municipal Systems Act, 2000 (Act No. 32 of 2000);

- Municipal Finance Management Act, (Act No. 56 2003);
- Regulation 393 of 2009: Local Government Municipal Finance Management Act Municipal Budget and Reporting Regulation;
- Municipal Performance Regulations for Municipal Managers and Managers directly accountable to the Municipal Manager (2006);
- Municipal Planning and Performance Management Regulations (2001) and Batho Pele Principle

The municipality has introduced a new automated system to ensure implementation and improve performance management reporting.

12. Prioritization

Government does not have sufficient resources to address all issues identified by communities. Primarily, prioritization assists government especially the municipality in allocating scarce resources.

12.1. Priorities of Greater Letaba Municipality

The following are the priorities of the municipality:

- Provision of water and sanitation services
- Provision of road and public transport
- Refuse removal, waste and environmental management.
- Provision of social amenities (sports facilities)
- Provision of educational infrastructure and services
- Job creation and livelihoods
- Safety and security
- Provision health and safety
- Land use management and land ownership

12.2. Community Priorities

In order to understand the extent of the challenges faced by communities, the ward priorities were analysed on most raised challenges. The table below summarise ward priorities in Greater Letaba Municipality:

Ward Priority Needs

Focus Area	Sub-Focus Area	Priorities	Comments and Projections
Spatial Development	Shortage of land for development	Land for development and human settlement in Ga-Kgapane and Modjadjiskloof (Ext 4) and Sekgosese Mokwakwaila Development Land Audit	Need to address land invasion around Kgapane -Enforce Court orders. Modjadjiskloof Ext 4 -Liaise with Coghsta and MDM on funding and support they will provide Prioritise Mokwakwaila development. Need for Land Audit Budget
	SDF	Implementation of SDF in all wards	Adopted by Council
Infrastructure Development	Water	<ul style="list-style-type: none"> • Water reticulation in all villages • Maintenance of boreholes and pump water in all villages 	<ul style="list-style-type: none"> • MDM to intervene • Strategic Planning Resolved for the Municipality to meet with MDM on issues of water

			<ul style="list-style-type: none"> • Currently 367 boreholes in GLM, 282 working, 85 not working, 56 needs to be electrified, 19 vandalised
	Sanitation	<ul style="list-style-type: none"> • Replacement of the ageing sewer system in Ga-Kgapane, Modjadjiskloof, Senwamokgope • VIP toilets in all villages (Reported about 7000 Needs across ward) • Connection of sewer system from Mokgoba to Modjadjiskloof 	<ul style="list-style-type: none"> • MDM to intervene on issues of sewer
	Bridges and Storm water	<ul style="list-style-type: none"> • Low level bridge across various wards, over 100 reported • Technical to assess for costing. • Grading and rehabilitation of streets 	<p>Currently 13 bridges that need intervention namely:</p> <ul style="list-style-type: none"> • Sekgopo (bridge to moshate ; • Motsinoni-Mamakata bridge. • Boshakhe bridge

			<ul style="list-style-type: none"> • Sephokhubje-Mamaila bridge. • Shaamiriri bridge (mpepule to shamfana). • Rotterdam - Sephokhubje bridge. • Rotterdam bridge. • Abel - Shamfana bridge. • Mapaana - Medingen bridge. • Ramodumo-Kuranta bridge • Setaseng - Moshate bridge • Polaseng-Matipane bridge. • Mokwasele - Rabothata bridge • Mabulane to Mothobekhi bridge <p>The following low-level bridges will be constructed through the MDRG</p>
--	--	--	--

			<p>(Municipal Disaster Response Grant) in the current fy 2023/24:</p> <ul style="list-style-type: none"> • Tshamahansi low-level bridge • Mokwasele low-level bridge • Sekgopo Ramoadi low-level bridge • Ramaroka low-level bridge
	Roads and Pavements	<p>Bemuda Roads</p> <ol style="list-style-type: none"> 1. Sekgopo Street Paving ph2 (2km)(Public Works) 2. Mokgoba Street paving Ph2 (500m) 3. Moshakga/Makaba Street Paving Ph2 (2,5km) 4. Itieleng Street Paving Ph2 (600m) 5. Thakgalang Street Paving 	<p>There is a backlog of 696km of roads that need intervention.</p> <p>Other roads to be prioritised for Regraveling programmes.</p> <p>5.6km of Critical Backlog pavements</p>

		<p>2. 1,2 Access Road at Itieleng (Ward 3)</p> <p>3. Upgrading of 600m at Tlhabeng access road</p> <p>Gravel Roads in need of paving: Flat Terrain</p> <p>1. Upgrading of 600m access road to cemetery at Mamaila Mphotwane</p> <p>2. Upgrading of 1.8km road from Mphebatho to the borehole</p> <p>3. Upgrading of 800m access road at Kwetane Village</p> <p>4. Upgrading of 500m via Mmola street at Lemondokop</p> <p>5. Upgrading of 500m access road passing over the low-level bridge at Mothobekhi</p>	<p>Over 11km of roads that require attention</p>
--	--	---	--

		<p>6. Upgrading of 900m access road at Mamatlepa</p> <p>7. Upgrading of 1,5km access road at Rampepe</p> <p>8. Upgrading of 800m Joe -Smiley Street</p> <p>9. Upgrading of 1,8km access road Mpepule</p> <p>10. Mogano Section 800m Access Road (Sekgopo)</p>	
	Electricity	<ul style="list-style-type: none"> • Electrification of the remaining households • High mast lights in all wards (167 in total so far) • Maintenance of existing high mast lights in all wards • Street lights in junctions 	<p>In terms of High Mast backlog Bodupe, Hlobola, Kotana, Shawela B,, Sefofotse, Tsatsa and Sekgothi have no High mast installed.</p> <p>Maphalle, Matshwi, Rapitsi, Manningburg, Mamaila, Whole Sale, Sephokubje, Ntata have high rate of</p>

		<ul style="list-style-type: none"> • Free Basic Electricity 	<p>Housebreaking and theft and High mast should be prioritised.</p> <p>Total High mast Across wards is 167</p>
Economic Development	Local Economic Development	<ul style="list-style-type: none"> • Unlock Agriculture Opportunities • Exploiting existing economic opportunities e.g. <p>Caravan park (Leasing), Waterfalls</p> <p>Manokwe Cave</p> <p>Agro Processing In GLM</p> <p>Mokwakwaila has a potential in terms of its centrality</p> <p>Tourism and Accommodation</p> <p>Modjadji Nature Reserve and Modjadji Nursery</p> <p>Modjadji Queenship and Development of a palace</p>	<p>Need to increase SMME Support Programme in order to create jobs and grow the economy Economy</p> <p>Letaba TVET College as a Key Stakeholder in Skills development</p> <p>Improve relations with ZZ2</p>

		Refurbishment of the market stalls in Maphalle, Kgapane Taxi Rank, Wholesale in Sekgosese.	
Environmental and Waste Management	Refuse removal	<ul style="list-style-type: none"> • Removal of waste in all wards • Additional Skip bins in areas of backlog (About 70 Across wards) • Landfill site 	<ul style="list-style-type: none"> • Currently 120 skip bins across wards, There is a backlog across other outstanding villages but attention needed for extra skip bins around Modjadjiskloof, Kgapane, Madumeleng, Mokwakwaila, Maphalle, Senwamokgope ,ZZ2, Shoprite Usave Sekgopo, Matswi uSave, Mamaila Usave, Mamaila Mall ,All Joy ,Mooketsi Drive Through (22 skip bins with potential for revenue) , this are areas with economic activities and as a results of flee markets and other

			factors bins regularly needs to be collected
Social Services	Housing	<ul style="list-style-type: none"> • RDP houses and completion of the blocked RDP houses in all wards • Backlog of 3800 • Over 10000 Reported across wards 	<ul style="list-style-type: none"> • 106 Allocation
	Communities Facilities	<ul style="list-style-type: none"> • Maintenance and building of community facilities in all wards • 21 Community Halls • 8 Stadia and 6 Libraries 	<ul style="list-style-type: none"> • Community services has put aside budget to continuously maintain facilities • Service providers for maintenance on advert
	Health	<ul style="list-style-type: none"> • Mobile clinics • Additional new clinics • 24 Hour clinic operational 	<ul style="list-style-type: none"> • Department of health to intervene
	Transport, Safety and Security	<ul style="list-style-type: none"> • Satellites police stations 	<ul style="list-style-type: none"> • Sekgopo needs Police station.

		<ul style="list-style-type: none"> • Mokwakwaila and Senwamokgope DLTC 	<ul style="list-style-type: none"> • Rotterdam and Mohlele need satellite Station
	Education	<ul style="list-style-type: none"> • Establishment of new school in Goudplaas and other needy areas • Institution of higher learning e.g. TVET • Extra classrooms and additional blocks in needy schools • Resourcing of Libraries

9	Access to sustainable quality basic services	Skip Bins	Ward 30: 2 skip bins	120 SKIP bins provided so far across wards, no budget for skip bins 2022/23			

13. STRATEGIES PHASE

13.1. Introductions

Greater Letaba Municipality Integrated Development Plan (IDP) maps the need of the community and also determines strategies and plans to address the needs highlighted by the communities through the process of constitution. This section outlines the vision, objectives and strategies by the municipality to achieve the developmental aims. The approach adopted in this section is based on developing a strategic intent which is firmly entrenched. Responding to the gap analysis and ensuring a developmental approach and an integrated response.

13.2. SWOT Analysis

The situational analysis and the institutional analysis emanating from the various reports presented during the strategic planning session has played a vital role in the reviewing of the strength, weaknesses, opportunities and threats within the municipality. The SWOT analysis as conducted during the strategic planning sessions set a good tone for leaders to make effective decisions set the framework for reviewing the strategic direction an organisation has planned to take considering various factors. Greater Letaba Municipality has conducted a review of the strength, weaknesses, opportunities and threats considering several factors as highlighted by the situational and institutional analysis. The outcome of the SWOT analysis is outlined below.

Table no: 52: Strategic SWOT Analyses

STRENGTH	WEAKNESSES
Positive audit outcome	Inadequate monitoring and supervision of staff
Political stability	Insufficient office space
Functional governance structures	Poor conditions of the road networks
Good governance	Limited landfill sites
Sound labour relations	No gender balance within workforce
Improved record management	Low revenue collection
Improved adherence to internal controls	Inadequate maintenance of infrastructure
OPPORTUNITIES	THREATS
Heritage and Tourism attraction areas	Ageing infrastructure
Availability of natural resources	Land invasion
Existence of agro-processing plant	Drug abuse and crime
Availability arable land	Land claims and counter land claims
Resuscitation of communal farming	Service delivery protests
Job creation	Illegal connections on water

	Poor intergovernmental relations High prevalence of HIV/AIDS Low investor confidence Gender Based Violence The effects of communicable diseases
--	---

13.3 Developmental Strategies

13.3.1. Strategic Intent of Greater Letaba Municipality

Based on the SWOT analysis conducted, the municipality was then able to develop its strategic intent which ultimately is a summary of what the municipalities' intents to achieve. The foundation established through strategic planning will assist Greater Letaba Municipality to focus all efforts and action towards the attainment of objective identified, enabling municipality to live up to the expections on their communities.

13.3.2. The Greater Letaba Municipality Vision

A vision provides a compelling picture of the future and it channels all efforts of an organisation and the energy for everyone linked to it to perform in a motivated and inspired manner. Following a thorough engagement on the vision of the municipality, in the final analysis it was reviewed to cater for the mandate of local government and ensure alignment between the vision, strategy and the resource allocations.

The vision of the municipality is therefore as follows:

“To be the leading municipality in the delivery of quality services for the promotion of socio-economic development”

13.3.3. The Greater Letaba Municipality Mission (Aim)

According to Ehlers and Lazenby (2005:51), the mission statement is an enduring statement of purpose that distinguishes an organisation from other similar organisations. They further argue that it identifies the scope of the organisation's operations in terms of product, market and technology.

In the context of municipalities, it means that the mission statement must assist to differentiate municipalities based on issues such as the purpose considering their environment, the strategic intent, competitive edge and the organisational culture. Therefore, the mission statement for Greater Letaba Municipality was captured as follows:

To ensure an effective, efficient and economically viable municipality through:

- *Promotion of accountable, transparent and consultative and co-operative governance;*
- *Promotion of local economic development and poverty alleviation;*
- *Provision of sustainable and affordable services and*
- *Ensuring a compliant, safe and healthy environment*
- *Utilisation of smart technology*

13.3.4 Greater Letaba Municipality's Values

Values identify the principles for the conduct of the institution in carrying out its mission. In working towards the achievement of its vision and mission, Greater Letaba Municipality subscribes to the following internal values which are in line with the *Batho-Pele* principles:

Table no. 53: Values

VALUES	DESCRIPTION
Teamwork	Mean that Greater Letaba Municipality representatives will cooperate, using their individual skills and providing constructive feedback, for the achievement of the municipality vision and mission. Is a combined effort, or the actions of a group, to achieve a common purpose or goal
Commitment	The state or quality of being dedicated to a cause or activity. Willingness to give time and energy to the municipality activities
Integrity	Living this value means that Greater Letaba Municipality representatives will display behaviour, attitudes and actions informed by honesty, commitment to the company, its policies, procedures and processes.
Value for money	Living this value means that Greater Letaba Municipality representatives ensure that the municipality has obtained the maximum benefit from the goods and services it both acquires and provides, within the resources available to it
Consultation	Living this value means Greater Letaba Municipality representatives will seek and give advice, information, and/or opinion, usually involving a consideration

Transparency	The obligation to act in an open and transparent manner.
Accountability	The obligation to account. To take responsibility for one's actions.
Courtesy	The obligation to show politeness in one's attitude and behaviour towards others
Innovation	Living this value means that Greater Letaba Municipality representatives should translate ideas or invention into a goods or services that creates value for the municipality and the community it serves

13.4 Key Performance Areas – Greater Letaba Municipality

The situational and institutional analysis has paved the way for the revision of the vision, re-confirmation of the mission statement and values of the municipality. In keeping with the requirement to ensure alignment, the key performance areas were reviewed with an addition as highlighted :

- Municipal Transformation and organisational Development
- Basic service Delivery and Infrastructure development
- Local Economic Development and Spatial Rationale
- Municipal Financial viability and management
- Good governance and public participation

13.5. Strategic Objectives

Strategic objective of the municipality is intended to support the achievement of the vision and the allocation of resources. The strategic objectives of the municipality are as follows:

- **Improve quality of life**

The municipality wanted to improve the quality of life of its residence through access to basic services.

- **Improved and Inclusive local economy**

Local economic development within the Greater Letaba Municipality is important to create jobs and alleviate poverty.

- **Integrated sustainable development.**

There is a need for the municipality to address current challenges within the municipality, while taking into account the needs of the future generation.

- **Financially Sustainable institution**

The need to improve financial position is important to the municipality because it will assist in the delivery of service.

- **Improve governance and organisational excellence**

To improve effectiveness and efficiency, standardised policies and procedures need to be established within the municipality. This will lead to open and transparent decision-making and sound governance practices.

- **Access to sustainable quality basic services**

It is important for the community to access basic services in order for the municipality to become effective and efficient in-terms of service delivery

- **Integrated human settlements**

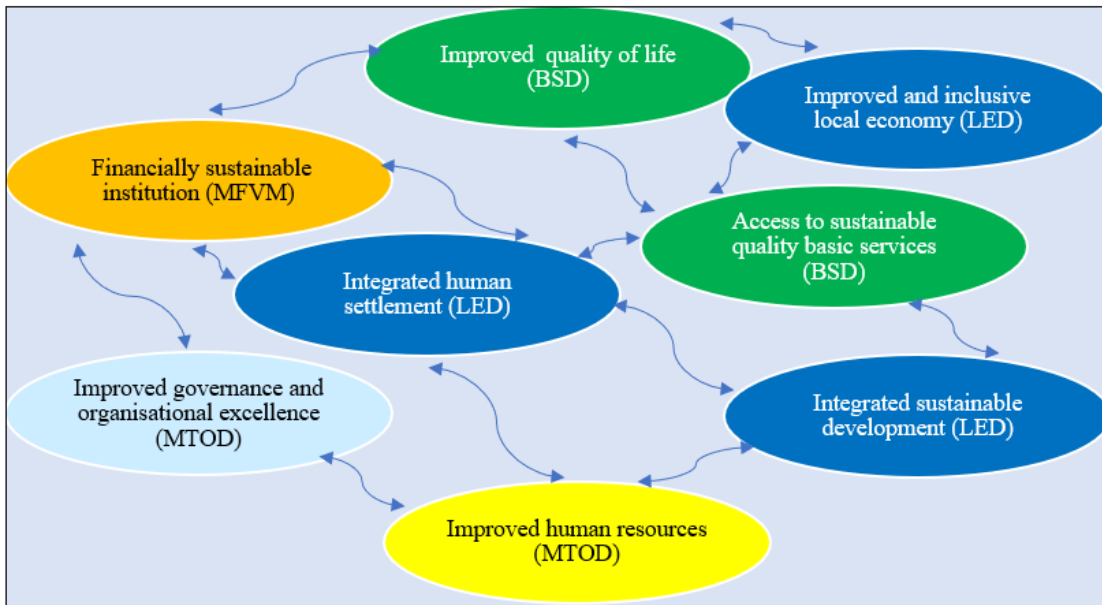

There is a need for the municipality to plan for future human settlement development so that we address the injustices of the past.

- **Improve human resource**

In order for the municipality to deliver on its mandate there is a need to develop and capacitate the workforce.

13.6 Strategic Map (Figure no 5)

Strategic Map outlines objectives that the Greater Letaba municipality aims to achieve.

13.7. Alignment with Provincial and National Priorities/Strategies

Greater Letaba Municipality takes cognisance of the various priorities and strategies of all spheres of government as outlined below:

13.7.1. National Priority Areas

- Creation of decent work and sustainable livelihoods.
- Education.
- Health.
- Rural development, food security and land reform and
- The fight against crime and corruption

In-terms of the municipal system act (32 of 2000), section 26, it indicates that the municipality should develop the operational strategies. Greater Letaba Municipality has achieved these by linking programmes implemented within the municipality to the KPA's identified and linked to the strategic objectives. The operational strategies are represented below in-terms of the different KPA's.

13.8.1. Programmes/Projects, KPI's and Targets

The table below will highlight the programmes/projects for each key performance area then determine the key performance indicators and targets in line with the Medium-Term Expenditure Framework

KEY PERFORMANCE AREA - SPARTIAL RETIONALE

Strategic Objective	Programme	Challenge / Issue	Recommended Solutions / Strategies			Strategic KPI
			Short Term	Medium Term	Long Term	
Integrated human settlement	Implementation of Land invasion strategy	Illegal occupation of municipal land	Issuing of non-compliance notices	Securing of court interdicts and court orders	Well-coordinated integrated human settlement	# of land invasion incidence reported
Integrated human settlement	Land use management	Non-adherence to SPLUMA-By Law	Issuing of non-compliance notices	Securing of court interdict	Well-coordinated integrated human settlement	# Of land use and land development applications processed
	Development of Senwamokgope Cemetery	Shortage of burial site in Senwamokgope	Appointment of service provider Inception report	Technical studies	Designs and land approval	Approved land for new cemetery
Integrated human settlement	Processing of Building plans and building inspection conducted	Building without approved plans	Issuing of Non-compliances notices	Take actions for non-compliance	Ensure compliance with the building regulations and safe human settlement	# of building plan processed and # of building inspection conduction
	Land audit report	Unaudited land parcels in the municipality	Report on land parcels in municipality	To make land available for development	Optimum utilisation of land in the municipality	# of land audit report developed
Integrated human settlement	Implementation of housing Beneficiary policy	Disorganized allocation of housing units t beneficiaries	Approved housing beneficiary policy	Well-coordinated implementation housing allocation	Well-coordinated allocation of human settlement to the marginalised	# of Housing beneficiaries allocated units

KEY PERFORMANCE AREA – LOCAL ECONOMIC DEVELOPMENT

Strategic Objective	Programme	Challenge / Issue	Recommended Solutions / Strategies			Strategic KPI
			Short Term	Medium Term	Long Term	
Improved and Inclusive Local Economy	Review LED Strategy	Outdated LED Strategy	Development of term of reference	A reviewed LED Strategy that responds to the economic conditions of our Municipality.	LED strategy that contributes to the growth of the economy of the municipality	# of LED strategy reviewed
	Business Registration and monitoring	Formalization and Non-Compliance of Businesses	To conduct compliance business campaigns	Formalization and registration of businesses	Well-coordinated and formalised business sector in the municipality	Business registration register and # of Blitz conducted
	LED Forums	Non-coordination of business Stakeholders	Coordination of the business activities and organising of the business sector	Strengthen relations between business and government stakeholders for the growth of the Municipal Economy	Organised business and government stakeholders to promote economic growth and development.	# of LED Forum conducted
	Marketing Initiative	Lack of exposure to Markets	Attending various Expos and Exhibitions	Exposure of businesses to various market opportunities	Exposure of businesses to various market opportunities	Number of Marketing Initiative conducted
Inclusive Local Economy	SMME Support	Poverty and Unemployment	Financial and Non-Financial Support to SMMEs	Expanding support to reach more SMMEs	Improved economic opportunities and increased employment	# of SMME's supported

Inclusive Local Economy	SMMEs Training	Lack of business skills	Providing training to SMMEs	Forging partnerships with government and other stakeholders for provision of various training needs	Sustainable and well-trained business sector	# of SMME's training conducted
Inclusive Local Economy	Report on Revival of Heritage and Tourism Sites	Neglected heritage and tourism attractions	Identify Tourism and Heritage sites for resuscitation.	Resuscitation of viable tourism attractions	Attracting investment opportunities and more tourists into our heritage sites.	# of reports on Revival of Heritage & Tourism attraction areas
Inclusive Local Economy	Business Compliance and enforcement	Mushrooming of illegal and non-compliant businesses	Business registration, Inspection and Compliance	Increase the number of compliant businesses	Organised and compliant business sector in the Municipality	# of campaigns and enforcement conducted

KEY PERFORMANCE AREA – GOOD GOVERNANCE AND PUBLIC PARTICIPATION

Strategic Objective	Programme	Challenge / Issue	Recommended Solutions / Strategies			Strategic KPI
			Short Term	Medium Term	Long Term	
Improved Governance	Internal audit Action plan	Unresolved internal audit findings	100% implementation of the Internal Audit findings	100% implementation of the Internal Audit Findings	100% implementation of the Internal Audit Findings	% of internal Audit recommendation implemented
Improved Governance	External Audit Action Plan	Recurring AG findings	100% implementation of the AG Action Plan	100% implementation of the AG Action Plan	100% implementation of the AG Action Plan	% of AG recommendation implemented

Improved Governance	Municipal by laws (electricity & housing)	Inability to enforce regulations and municipal policies	Develop the electricity and housing by-laws, council adoption and public consultation	Implementation of the Gazetted by-laws	Implementation of the Gazetted by-laws	# Gazetted By-laws
Improved Governance	Fraud and corruption	Lack of accountability	Implementation of the Anti-Fraud & Corruption Strategy	Implementation of the Anti-Fraud and corruption Strategy	Eradication of the Fraud & corruption cases in the municipality	% of Fraud & corruption cases reported
Improved Governance	Risk Management	Risk mitigation actions not fully implemented	Implementation of risk mitigation actions	Implementation of risk mitigation actions	Implementation of risk mitigation actions	% of risk miion actions implemented
Improved Governance	Public participation	Lack of public participation policy	Development of public participation policy, inclusive of all channels of public participation	Implementation of public participation policy	Implementation of public participation policy	Approved public participation policy
Improved Governance	Regular community feedback meetings	Service Delivery protests	Convening of community feedback meetings	Convening of community feedback meetings	Convening of community feedback meetings	Number of communities feedback meetings held
Improved Governance	Electronic Record Management System	Loss of information/data	Procurement of Electronic Record Management System	Implementation of electronic record management system	Implementation of electronic record management system	Electronic Record Management System

MUNICIPAL TRANSFORMATION AND ORGANISATIONAL DEVELOPMENT

Strategic Objective	Programme	Challenge / Issue	Recommended Solutions / Strategies			Strategic KPI
			Short Term	Medium Term	Long Term	
Improved Human Resource	Training and Development Interventions	Non-implementation of the WSP	Implementation of the WSP	Implementation of the WSP	Implementation of the WSP	Number of trainings conducted as per WSP
Improved Human Resource	Legal Services	Municipality involved in number of litigations	Make assessments of all litigations and conduct awareness for employees	Mediate on cases before defending	Mediate on cases before defending	# of cases resolved
Improved Human Resource	Change management strategy	Resistance to change by staff	Awareness campaigns	Implementation of change management strategy	Monitoring and review	Approved change management strategy
Improved Human Resource	Oversight	Lack of effective oversight roles by portfolio committees	Identify trainers and training needs for portfolio committees	Implement capacity building program.	Implement capacity building program	Capacity building program

KEY PERFORMANCE AREA – FINANCIAL VIABILITY AND MANAGEMENT

Strategic Objective	Programme	Challenge / Issue	Recommended Solutions / Strategies			Strategic KPI
			Short Term	Medium Term	Long Term	
To improve on revenue collection	Revenue management	<ul style="list-style-type: none"> • Low Revenue Collection • Extension 5 stands registered under the municipal name (About 32 stands not paying property rates and owing balance for the stand) 	<ul style="list-style-type: none"> • Full implementation of credit control and debt management policy (cut-off with 14 days on current account). • Implementation of Revenue Enhancement Strategy • Split service invoice for Letaba and Mopani (water services) • Implementation of 60/40 restrictions on prepaid electricity purchases • Automated statements, payments and 	Implementation of Revenue Enhancement Strategy	Issuing summons and listing the defaulting customers to the credit bureau.	<ul style="list-style-type: none"> • % of Revenue collection vs billing (95%) • % of Revenue Collection vs Debt Book (10%) • Data cleansing (50/100 of our costumers annually) • Cut-off and Disconnection of defaulting account holder(No of cut-offs per quarter for people owing more than 90days-Modjadjiskoof) • Revenue enhancement Strategy implementation (no of meeting held by the committee per

			<p>letter of demands on the financial system</p> <ul style="list-style-type: none"> • Repayment arrangement with Mopani • Invite affected customers to sign a valid sale agreement with the municipality 			quarter)

Quality Basic Services						
Access to sustainable Quality Basic Services	Waste Collection	Provision of clean environment	Provision of waste collections to all proclaimed areas.	Provision of waste collections to all proclaimed areas.	Provision of waste collections to all proclaimed areas.	Number of households with access to kerbside waste collection
Improved quality of life	Climate Change	Inadequate response to current and future climate change impacts			Implementation of climate change response strategy	Climate change Action plan
Access to Sustainable Quality Basic Services	Simple count of the number of Environmental Awareness campaigns held	To educate community members about keeping the environment clean	Reduce and prevent littering and Illegal dumping sites	Reduce and prevent littering and Illegal dumping sites	To have clean and healthy living environment	Number of Environmental Awareness campaigns

14. PROJECT PHASE

14.1 Introduction

During the strategy phase, strategic objectives were developed on how the municipality is going to achieve the strategic themes and ultimate goals of service delivery to and a better life for the community. These strategic objectives must now be operationalized through the identification of projects that will enable the municipality to deliver on its commitment to the community.

Projects are identified through needs experienced by the community and the councilors in their areas or villages, municipal departments and officials from departmental plans, sector plans, specialist studies and maintenance programmes, and strategic planning exercises might identify projects of strategic importance.

When deciding on the implementation of projects, the municipality must ensure that priority issues and needs are addressed and that projects be implemented where it will benefit the municipality the most. Also very important is that the municipality must ensure that with its limited financial and human resources, due regard is given to priority issues and maintenance projects during the distribution of resources.

The community must also be involved and informed regarding the decision to implement projects. Community involvement will rule out biasness towards certain community grouping and will ensure buy-in from community members in implementation of projects. Community involvement is achieved through; inter alia, the IDP Representative forum. Budgets need to be allocated to projects, quarterly targets and activities established to ensure that the municipality will be in a position to fund and implement identified projects within time and budget.

REVENUE SUMMARY

BUDGET FOR 2026-2027, 2027-2028 and 2028-2029					
Description	Budget 2025-26	Adjusted Bududget 2025-26	Budget 2026-27	Budget 2027-28	Budget 2028-29

15. INTEGRATION PHASE

Major Outputs of this phase is the integration of plans and Programmes

15.1 Status of the Plans

Sector Plans	Date of Approval	Last Date of Review	Current Status
SDF	2010	2023	Approved, awaiting Gazetting
Employment Equity Plan	2017	30/09/2022	Review Process
LED Strategy	2022	2022	Reviewed
Workplace Skills Plan	2005	30/04/2024	approved
Disaster Management Plan		2026	Awaiting council approval
Housing Chapter		Annual	Annual
Audit Plan		Annual	Annual
Institutional Plan & HR Policies	2012	15/05/2023	Reviewed 2024
Integrated Transport Plan		2020	Review Process
Anti-Corruption Plan		Annual	Reviewed 2023
Risk Management Plan		Annual	Reviewed 2024

Table no 57: Status of the Plans

The following integrated sector plans and programmes will now be discussed:

- Integrated waste management plan;
- Spatial development framework, which proposes a broad spatial development for the municipal area and demonstrates compliance of the Greater Letaba IDP with spatial principles and strategies;

Poverty reduction and equity programme, which demonstrates compliance of the Greater Letaba IDP with policy guidelines related to poverty and gender specific monitoring.

- Integrated Environmental Management Plan which demonstrates compliance of the IDP with environmental policies and contributes towards environmental impact monitoring through an awareness of legislative requirements for environmental impact assessment;
- Local Economic Development Plan, which provides an overview of measures to promote economic development and employment generation within the Greater Letaba Municipal area;

- Integrated HIV/AIDS plan, which illustrates the extend of the epidemic and the proposed efforts and actions of the municipality to address the problem;
- Municipal Institutional Plan, which will spell out the management reforms and organizational arrangements the municipality intends implementing in order to achieve the development goals of the IDP;
- Disaster Management Plan, which will outline the preparedness of the municipality; and finally.
- Integrated Performance Management System, comprising key performance indicators, activity related milestones, and output targets.

15.2. Sectoral Plans and Programmes

15.2.1. Integrated Waste Management Plan (IWMP)

The Greater Letaba Municipality has developed an Integrated Waste Management Plan (IWMP) in house using the DEA portal.

The Integrated Waste Management Plan of the municipality has been taken into consideration and the following issues were highlighted in the IWMP:

The Main types of waste generators in the district are households, businesses, and mining, farming and Health care facilities. Only 5.3% of the population in GLM receive waste removal services and a total of 43 556 tons of waste are produced annually (projected to be 67 500 t/a by 2026), that is 119 tons of waste per day of which roughly 33% is recyclable and 47% is compostable. Both the Modjadjiskloof and Kgapane hospitals generate medical waste that is burned in an incinerator, while general waste is removed by the municipality.

15.2.2. Spatial Development Framework

Municipal Systems Act, 32 of 2000) requires a municipality to compile a Spatial Development Framework (SDF) for its area of jurisdiction to serve as a core component of its IDP. The Spatial Development Framework (SDF), which forms part of the Mopani District Municipality in the Limpopo Province, was approved by the council in 2022 financial year and is therefore being considered for gazetting in line with the requirements of the Spatial Planning and Land Use Management Act, 2013. The SDF is also an essential component for the formulation of an appropriate land use management system.

The following spatial characteristics attributable to the Greater Letaba Municipal area were identified during the Analysis Phase:

- A land area of approximately 1891 km²;
- A fragmented formal urban component comprising Ga-Kgapane, Senwamokgope and Modjadjiskloof;
- The incidence of rural settlements evenly spaced along the northern boundary, and a lesser concentration of villages along the south-eastern boundary, of the Municipality;

The southern part of the municipal area comprises mountainous terrain, which precludes urban development;

- Large tracts of arable land, which are being used for intensive and extensive agricultural activity. These include tomatoes (central), timber (south and south east), game and cattle (central and north-west).
- Significant areas of land owned by the state under custodianship of tribal/traditional authorities;
- Almost half the land area in the municipal area (48%) is subject to the 159 land claims which have been lodged in terms of the Land Restitution Act..

During the Strategies Phase, the following localized spatial principles were formulated to achieve the general principles listed in the Spatial Planning and Land Use Management Act, 2013 (Act 16 of 2013).

- That development initiatives such as housing projects, business or industrial development, extension of infrastructure networks, be used to normalize distorted spatial patterns.
- The adoption and implementation of policies / design criteria to achieve integration diversity of land uses and densification of development.
- The consideration of the environmental impact of development initiatives to minimize environmental degradation.
- The consideration of the land reform potential of each development initiative and the extension of strategies and projects to incorporate this dimension.
- Active intervention by Council with reference to land availability for settlement purposes.
- Facilitation of tenure through interaction with role-players.

The spatial development framework is aimed at the application of resources to achieve optimum benefit for the resident community. This would include:

The integration of land uses to afford residents the opportunity to live near their workplace and have easy access to facilities.

- The conservation of land as a scarce resource by limiting wastage through the adjustment of norms to promote compact urban design and densification;
- Timeous preparation for urban extension (planning, survey, services), to pre-empt land invasion.

Modjadjiskloof has been identified as a provincial node, Ga-Kgapane as a district node and Senwamokgope as a municipal growth node. Development initiatives and projects should be directed to those areas where development potential is present. Suitable land should be identified and reserved for development at each nodal point.

To this end a projected land use budget should be prepared during the Spatial Development Plan project to ensure that sufficient land is reserved for urban expansion commensurate with the development potential of each node.

The following spatial manipulation could be effected by the GLM to strengthen the emerging hierarchical pattern:

- Placement/redirection of housing allocations to places with development momentum;
- The utilization of housing allocations to unlock further allocations;
- Promotion of industrial development in proximity to Ga-Kgapane;
- Promotion of the development of complementary business functions at Ga-Kgapane and Modjadjiskloof;
- The development of secondary service nodes within the rural areas;
- The promotion of Senwamokgope as service centre for the north-western part of the municipal area; and
- Limited formal and informal business and industry at lower-order nodes.

The SDF is currently being reviewed to align to the Spatial Rationale for the Limpopo Province and the SDF of the Mopani District Municipality. The Spatial Development Framework also needs to be extended to include a Land Use Management System.

15.2.3. Employment Equity Plan

Greater Letaba Municipality has taken into cognizance the history of apartheid laws and practices which resulted in disparities and inequities in South Africa and as such, spirit of Employment Equity Act is geared towards achieving employment equity across all occupational levels and categories. Employment Equity Act is further committed to uphold the equity rights as clearly enshrined in the Constitution of the Republic of South Africa.

The purpose of the employment Equity plan in GLM is to enable the employer "to achieve reasonable progress towards employment Equity", to assist in eliminating unfair discrimination in the workplace, and to achieve equitable representation of employees from designated groups also by means of affirmative action measures.

Attempts will be made in order to ensure that the work force is a true reflection of the demographics of the municipal area, the province and the country. The plan is also aimed at ensuring that South Africa fulfils her obligations as a member of the International Labor Organization.

15.2.3.1. Objectives

- To do away with all forms of unfair discrimination with regard to employment practices and policies;
- To develop and communicate a sexual harassment policy that is in line with the code of conduct on sexual harassment;
- To eradicate all barriers that may hamper the advancement of the designated groups;
- To create a corporate culture that affirms and exploits workplace diversity;
- To ensure that management is actively committed to implement equity;

To create IDP related strategies that can be employed to make reasonable and serious progress on employment equity on all occupational levels and categories.

15.2.4. Integrated Environmental Management Plan

The Integrated Environmental Management Plan strives to achieve co-operation between the municipality and the Department of Economic Development and Tourism to monitor existing and future development so as to promote the conservation of the environment and to prevent actions and practices which could have detrimental effect to the environment.

The following factors are considered to be risks to the environment in the Greater Letaba Area:

- Soil erosion;
- Inadequate solid waste disposal systems;
- Urban sprawl;
- Degradation of the natural environment due to gathering of firewood;
- Sub-standard monitoring of factory effluent and
- Inadequate sanitation systems.

The following strategic guidelines and legislative framework are relative to environmental management:

15.2.4.1. Key Focus Areas (Guidelines)

- Waste and Pollution Management (WMP=Waste Management Plan);
- Air Quality, Energy Efficiency and Noise Pollution;
- Water and Surface Pollution Management Plans;
- Sanitation Programs (Sewage & disposal);
- Bio-diversity Management (Nature);
- Land use planning/Spatial development management;
- Cultural heritage protection;
- Eco-system protection and
- Environmental/Public Health Education.

15.2.5. Legislative Framework:

15.2.5.1. Environmental Conservation Act (Act 73/1989)

- Waste Management & Littering;
- Sewage & Disposal;
- Disposal sites;
- EIA - Certain activities require EIA and
- PNE & Limited Development (Protected Natural Environment).

15.2.5.2. National Environmental Management Act (Act 107/1998)

- Cradle to grave;
- Polluter pays;
- Minimization;
- Recycling;
- National Water Act (Act 36/1998);
- Atmospheric Pollution Act (Act 45/1965);
- Constitution (Act 108/1996);
- Health Act (Act 63/1977);
- National Forest Acts (Act 84/1998) and
- Conservation of Agricultural Resources Act (Act 43/1983)

15.2.6. Local Economic Development Plan

The Local Economic Development is aligned to the National Development Plan (NDP), New Growth Path, Limpopo Employment, Growth and Development Plan (LEGDP), Mopani LED strategy, GLM IDP and other national, provincial and local plans that guide development within the Republic of South Africa. The Local Economic Development Plan for Greater Letaba proposes the implementation of a consistent and conducive set of measures to promote viable local economic activities by the judicious manipulation of municipal projects and programmes to benefit the local population by the creation of direct and indirect employment.

The local economy within Greater Letaba has the following characteristics:

- Stagnation of the formal economy and the saturation of the labor market in the agricultural sector;
- High unemployment rates;
- Low skills levels within the potential labor market;
- Low per-capita income;
- High crime rate;
- Potential for economic expansion within the informal sector, and

- Potential for economic growth within the tourism sector.

15.2.7. Integrated HIV/AIDS Plan

The apparent complacency of the Greater Letaba community in respect of HIV/AIDS is a cause for concern, (only 2 wards listed HIV/AIDS as an issue). The current HIV/AIDS epidemic will place ever-increasing pressure on the economy as well as on the Municipality both directly and indirectly.

The contributory factors for high prevalence of HIV/AIDS and related diseases amongst others are:

- Poverty, gender inequality and orphanage;
- Rapid urbanization and cultural modernization;
- Cross border gates and national routes;
- Dynamics of growing economy;
- Increased in the commercialization of sexual activities;
- High employment rate;
- Low literacy rate;
- Alcohol and substance abuse and
- High crime rate

The municipality has developed an HIV/AIDS programme in line with the national policies and guidelines.

In order to curb the spread of HIV/AIDS, the following strategies have been proposed:

Strategy 1: Provide access to basic health care for all residents of the GLM.

Strategy 2: Enter into public/private partnership with all health care service providers in order to render better services for GLM residents.

Strategy 3: Conduct health education programs to prevent & reduce the spread of communicable diseases, especially HIV/AIDS.

Strategy 4: Enter into a public/private partnership with all organizations for the purpose of funding for dealing with HIV/AIDS and sustaining HIV/AIDS centre.

The following activities forms part of the HIV/AIDS programme:

- A policy in respect of life threatening diseases in the workplace should be adopted by Council;
- Establish a HIV/AIDS Council in order to amalgamate & co-ordinate all current activities by various stakeholders in the GLM;
- Draft and implement appropriate awareness programmes;
- Promote public awareness in conjunction with Government and NGO's and
- Establish a HIV/AIDS centre to provide education, testing, counselling, etc.

The above actions are to be addressed in collaboration with provincial & national authorities. A concerted effort by all role-players is required to address this issue.

15.2.8. Municipal Institutional Plan

The primary objective of this institutional plan is to implement the municipal transformation and organizational development key performance area of Local Government Strategic Agenda. The primary objectives will ensure the following benefits:

- Those available resources are properly allocated to implement the IDP;
- That the desired goals as stipulated in the IDP document are achieved;
- Improved service delivery;
- Improved organizational effectiveness and efficiency;
- Enhanced credibility of the IDP;
- Reduced audit housekeeping matters contributing to clean audit;
- Enhanced stakeholders' relations and
- Realistic capacity assessment amenable to municipal powers and functions.

The municipal institutional plan that addresses the challenges highlighted and prioritized in the analysis phase such as addressing scarce skills, meeting employment equity targets etc.

15.2.9. Workplace Skills Plan

The municipality have developed the Workplace Skills Plan which is approved by Council. The Workplace Skills Plan aims to capacitate the municipality's personnel in line with the Skills Development Act of 97 of 1998. GLM recognizes that the competence of its human resources is a critical factor for its future progress and prosperity especially in the face of global competition. It

further recognizes that in order to meet the skill challenges in the Municipality, it is strategically necessary to invest in the education, training and skills development of its employees.

The Municipality shall assist employees who wish to develop themselves as individuals and as employees academically and through attending short courses, seminars, conferences etc.

Amongst others the following challenges were identified as critical:

- Supply chain management;
- Engineering;
- Agriculture;
- Tourism;
- Information technology and
- Finance.

These scarce skills were confirmed by council decision to establish a bursary scheme which support matriculates from needy families to go and study fields outlined above.

15.2.10. Succession and Retention Plan

GLM has realized the municipality's inability to attract and retain human capital. The phenomenon has a potential to frustrate and disable the municipal efforts toward the attainment of the municipal strategic objectives as depicted in the municipality's integrated development plan. It is on this premise that the municipality developed the strategy that seeks to address the long term goals of the municipality as reflected in the IDP. The municipality has developed the strategy to recruit and retain staff members whose services are regarded as critical to the achievement of the municipality's long term goals.

The following are the objectives for the HR Strategy:

- To position GLM as an Employer of choice;
- To increase the grading or category of the municipality
- To attract and retain human capital especially those whose skills are crucial to the municipality achievement of strategic objectives;
- To enhance career development and retention of key personnel whose service are regarded as crucial;

- To identify the employees' potential for assuming a higher degree of responsibility, nurturing and cultivating it;
- To classify roles of managers' / line managers with regard to staff retention;
- To strengthen employees' health and wellness programmes;
- To ensure employees participation in all processes of staff retention;
- To reduce costs associated with staff loss and brain-drain through creation of a conducive and harmonious working environment for the workforce;
- To position Greater Letaba Municipality as an employer of choice.

15.2.11. Disaster Management Plan

Although disaster management is essentially a function of the Mopani District Municipality, it is required that GLM, as an important component of the Disaster District, actively participates in, and slots into plans and strategies towards preparedness for emergencies and/or natural disasters. The disaster management plan of the municipality currently has been reviewed and will be tabled for council approval in 2026.

The aim of the GLM Disaster Management Plan is to outline a plan of action for the efficient deployment, and coordination of the municipal services, role players and personnel to provide the earliest possible response in or to:

- Protect and preserve life and property;
- Assist the Mopani District Municipality and/or other municipality as per request;
- Minimize the effects of the emergency or disaster; and
- Restore essential services.

The purpose of the Letaba Disaster Management protocol is to provide structure and coordination for the pre- and post-management of emergencies and disasters. This is to provide for an effective and efficient response that will:

- Save lives;
- Reduce risk;
- Reduce suffering;
- Protect property;

- Protect the environment;
- Reduce economic and social losses and
- Provide for the safety and health of all respondents.

The Incident Command System shall integrate risk management into regular functions. Risk management provides a base for the following:

- Standard evaluation of any emergency or disaster or the potential for such a situation;
- Strategic decision making
- Tactical planning;
- Planning evaluation and revision and
- Operational command and control.

The following are also components of the Disaster Management Plan

15.2.11.1. Risk Analysis:

- The timely identification of potential emergencies/disasters;
- Their impact thereof must be completed by each department;
- Should the department be unable to cope with the emergency, the Joint Operational Centre (JOC) will assume responsibility and
- The evaluation and risk analysis should be completed in conjunction with the relevant departments and Disaster Management.

15.2.11.2. Reporting Procedures

- This principle of the utmost importance as the management of any emergency situations starts here;
- When a department identifies a problem that they cannot deal, with the JOC will assume responsibility;
- All detail and incoming information must be made available to Disaster Management, JOC and Management;
- Disaster Management will activate the role players within the joint operational center and

- The Disaster Management offices will act as the information center and help desk for the duration of the disaster.

15.3. Communication

The effectiveness of any relief activities will be seriously restricted without effective communication. Thus JOC will require the use of all radios etc., within the Council. Each department shall make available any requirements related to communications.

15.4. Public Relations (Media Coordinator)

- The public will be informed at all times regarding pending and immediate dangers as well as all actions underway.
- The office of the Municipal Manager will assume full responsibility for all press releases and related communications and assisted by the JOC and
- VIP's will be briefed by JOC.

15.5. Control and Cordoning at the Scene

If required, the scene of the incident will be cordoned off to protect all involved. The Fire Brigade will take responsibility for securing the scene of the incident and surrounding area. They will also declare the scene safe and clear away any debris, etc. The police and emergency services will also take joint responsibility for maintaining the situation and safety of all present.

15.6. Documentation

This is essential to the effective management of any situation. JOC will ensure that all aspects are documented during and after the event.

The office of Corporate Services is responsible for taking minutes of all meetings and assist in the documentation preparation and control. Such documentation will be required in an evaluation after the event.

15.7. Emergency Medical Post

It may be necessary to establish an emergency medical post at the scene or in proximity. This service will be rendered by the Fire Brigade and paramedics. Further medical assistance will be called upon, should it be deemed necessary.

15.8. Recovery and Rehabilitation

The normalization process after an event will take a short period of time but is most important. This includes any cleaning up, repairs, or related work to the area. This will be coordinated by the JOC and Disaster Management.

15.9. Resource Management

Each Functionary will be in control of his own resources, but a central resource list must be kept by the Joint Operational Centre.

This will ensure about that all resources will be managed centrally. Each functionary will be responsible for the maintenance of equipment and support personnel.

15.10. Introduction and Usage of Joint Operational Centre

In the event of an emergency a Joint Operational Centre (JOC) will be established. The Disaster Management Committee and many other role players congregate and work together at the JOC to make decisions, share information and provide support as required to mitigate the effects of the emergency. The Disaster Manager is responsible for the coordination of all operations within the JOC.

- A meeting room for the Disaster Management Committee;
- A communications room;
- Rooms for support and advisory staff and other groups as required and
- A media Information Centre and Press Conference Area.

15.11. Communications Manager - JOC Communication Room

The communications Manager will be responsible for:

- Providing the Disaster Manager with reports on the emergency situation and any other pertinent information at regular intervals, or as requested;
- Providing assistance to the communicators in relation to communication equipment problems, where possible and practical;
- Coordinating and prioritizing the flow of messages between the Communication Room and the Disaster Management Committee, and other desired groups or locations;
- Maintenance of chronological log of significant communications and events;
- Maintenance of a situation or status board and

- Maintenance of a map(s) containing vital information relative to the emergency.

15.12. Organizational Performance Management Systems (OPMS)

15.12.1. Introduction

Performance Management is introduced to municipalities through legislation to, amongst others, achieves the Objects of Local Government (S152) of the Constitution, which is the following:

- Democratic and Accountable Governance;
- Sustainable services;
- Social and Economic Development;
- Safe and Healthy environment and
- Encourage Community Involvement.

The Municipal Structures Act s19 (1) also stipulates that a municipal council must strive within its capacity to achieve objectives set out in s152 of the Constitution and s19 (2) and it must review its overall performance annually. The Executive Committee must ensure an evaluation of the progress on implementation of the Strategies, Programmes and services, KPI's of the municipality and also to review its performance in order to improve on its economy, efficiency and effectiveness, credit control, revenue and debt collection.

The Municipal Systems Act, Chapter 6 indicates that a municipality must establish a PM system, must promote a culture of Performance management and administer its affairs economically, effectively, efficiently and in an accountable manner.

Also that a municipality must establish mechanisms to monitor and review its Performance Management System, must set Key Performance Indicators as a yardstick for measuring performance targets, monitor performance, measure and review performance at least once per year and take steps to improve performance where performance targets are not met. A municipality must also prepare for each financial year a performance report which must form part of its annual report, it must make known, internally and to the general public, its KPI's and performance targets. The results of performance measurements must be audited by its internal auditing processes; and annually by the Auditor-General.

15.13. Other Important Documents:

The documents referred to in Phase 2 Strategic Intent, specifically on National and Provincial Intent should be read in conjunction with the abovementioned legislation as those priorities

informed the Strategic Intent of GLM and its performance management system. In summary the following documents are relevant:

- The Medium Term Strategic Framework (MTSF, 2009-2014)¹ which builds on the success of our democracy;
- *Together Doing More and Better Medium Term Strategic Framework: A framework to guide government's programmes in the electoral mandate period (2009-2014)*, which provides the summary of strategic priorities in terms of the MTSF to be achieved;
- The Green Paper: National Strategic Planning (2009)² which indicates how key functions undertaken by the presidency are interconnected and complement each other and it provides ideas on planning and coordination to achieve the identified priorities;
- Local Government Turnaround Strategy (LGTAS);
- Limpopo's Provincial Employment Development and Growth Plan.

Performance Management is taking action in response to actual performance to make outcomes better than they would otherwise be (*IDA and Audit commission (UK)*). Performance management can be defined as "a strategic approach to management, which equips leaders, managers, workers and stakeholders at different levels with a set of tools and techniques to regularly plan, continuously monitor, periodically measure and review performance of Council in terms of indicators to determine the efficiency, effectiveness and impact; thereby ensuring improved delivery and value for money to the community and citizens"

"The IDP process and the Performance Management Process should appear to be seamlessly integrated. IDP fulfills the planning stage of performance management and performance management fulfills the implementation, management, monitoring and evaluation of the IDP process"

The implementation, management, monitoring and evaluation of the IDP is done through the Service Delivery Budget Implementation Plan (SDBIP). Performance management, IDP and SDBIP is a total integrated system. The IDP is the strategic plan of the municipality and the SDBIP is the operational plan of how the municipality is going to deliver on its strategic plan.

Organisational Performance Management is about monitoring, assessment, measurement, evaluation, review and reporting on the municipality's performance. This is necessary for the following reasons:

- To ensure that the municipality delivers on its commitment of service delivery to the community within allocated financial and other resources
- To detect early warning signs where service targets and budgets are not met in order to implement corrective measures to rectify non- or poor performance
- To identify achievements in performance to ensure future results.

15.14. Methodology

The Balanced Scorecard is used for the implementation of the performance management system. The benefits of implementing the Balanced Scorecard are that it brings strategic focus and direction to the organization, improves governance and accountability, promotes alignment and transparency, and improves management effectiveness.

A strategic and an institutional Balanced Scorecard take into account service delivery indicators and perspectives of the IDP and SDBIP. The strategic and institutional Balanced Scorecard can be cascaded into different levels of the municipality (top, functional and operational management).

The objectives of cascading the Balanced Scorecard are to achieve synergy across the municipality, maximize internal business process efficiencies (e.g. supply chain, information technology, human resources, etc.), and maximize efficient allocation of resources (financial and human) across the municipality.

The design approach of the Balanced Scorecard was customized to meet the needs of the Municipality. With an emphasis on the word “balanced”, the municipal Scorecard is intended to follow the traditional design approach promulgated by Kaplan and Norton, Financial, Customer, Internal Processes and Learning and Growth.

The measurement of developmental outcomes will be useful in informing the municipality whether policies and strategies are having the desired development impact, as per the following perspectives:

- Customer (citizens, communities) Perspective – Managers must know if the Municipality is meeting the community’s needs. This relates to services and products (outcomes and outputs) the Municipality should achieve. They must determine the answer to the question: Is the Municipality delivering the services the community wants?
- Financial Perspective – Managers must focus on how to meet service delivery needs in an economic, efficient and effective manner. They must answer the question: Is the service delivered at a good price?

- Internal Processes Perspective – Managers need to focus on those critical operations that enable them to satisfy the electorate, citizens and community. Managers must answer the question: Can the Municipality improve upon a service by changing the way a service is delivered?
- Learning and Growth (Employee Development) Perspective – An organisation’s ability to improve and meet community demands ties directly to the employees’ ability to meet those demands. Managers must answer the question: Is the municipality maintaining technology and employee training for continuous improvement?

The strategic balanced scorecard will provide an overall picture of performance for the Municipality as a whole, reflecting performance on its strategic (IDP) priorities. The Municipal Manager and Section 57 Managers will use it after review, as a basis for reporting to the Executive Committee, Council, and the public.

The institutional scorecard is the interface between the strategic and departmental scorecards, between the IDP and SDBIP where the IDP is cascaded to the SDBIP and an interface approach is adopted and integration is developed between the different departments on the outputs and outcomes. Departmental balanced scorecards will capture the performance of each department and will provide a comprehensive picture of the performance at that level. Departmental balanced scorecards will be comprised of the key components highlighted in the customized municipal balanced scorecard system. The strategic and institutional scorecards are depicted further on in the document.

15.15. Implementation of the Performance Management System

The performance management system is implemented through monitoring, evaluation, reporting and review. This phase is guided by the following extract from the Performance Management Guidelines for Municipalities (2001: Ch. 5)³: “Having adopted the system, the municipality can mandate the project team to facilitate the implementation thereof. The team, which may be the same as the IDP team, should develop an implementation strategy. The strategy should be linked to the IDP implementation framework and should entail planning, implementation, monitoring and review.” Measurement and reporting should be included in this phase, according to the Performance Management Regulations.

The performance management system is implemented through four components in a yearly cycle, namely planning and review; monitoring and assessment; reporting and evaluation, and auditing.

15.16. Planning and Review

The first review process of the performance management system starts with the review of the IDP of a Municipality for the following financial year. Whenever the municipality amends its IDP the municipality will, as part of the process referred to in Regulation 3, review those KPIs that will be affected by such an amendment. The indicators in the IDP will be an integral part of the performance management system. The IDP and the performance management system therefore have to be seamlessly integrated. The integration between the performance management system and integrated development planning process is highlighted in the Performance Management Guide for Municipalities (2001 draft 2 page 16):

“The integrated development planning process and the performance management process should appear to be seamlessly integrated. Integrated development planning fulfils the planning stage of performance management. Performance management fulfils the implementation management, monitoring and evaluation of the IDP process.”

The review of the IDP is thus the first step when implementing the performance management system. Once the IDP is reviewed, the performance management system is aligned to reflect the changes in the IDP. During the review of the IDP, it is also important to take the budget implementation plan into account for the following Financial Year. This budget implementation plan will also reflect and have bearing on the performance management system.

The review of the IDP and integration with the performance management system will start with the analysis phase that will continue into the planning, strategic and alignment phases of the IDP (thus from July and will be completed in November annually).

In the review of the IDP process and integration with the performance management system, four elements are necessary to ensure success: strategy implementation and priority setting; the setting of objectives; the development of KPIs and the setting of performance targets.

15.17. Strategy and Priority Setting

This strategic approach should correlate with the IDP review process, and will also integrate with the development of the SDBIP and budgetary implementation plan for the year.

Strategic direction setting from a performance driven point of view is important to drive the organization in a performance-oriented way.

The strategic approach entails setting the vision and strategic direction of the Council. This is reflected in setting up of the municipal scorecard in the performance management system to encapsulate the strategic intent of the organization in a focused manner. See the Guidelines (par. 5.1.2) “Consistent with the event-centered approach in the IDP guide, the IDP should deliver the following products:

- An assessment of development in the municipal area, identifying development challenges, marginalized and vulnerable citizens and communities;
- A long-term development vision for the municipal area that overcomes its development challenges;
- A set of delivery priorities and objectives, based on identified needs, achievable in the current term of office, that would contribute significantly to the achievement of the development vision for the area;
- A set of internal transformation strategies, priorities and objectives, whose achievement would enable the delivery and the realization of the development vision;
- Additional projects identified which contribute to the achievement of the above objectives;
- A financial plan and medium term income and expenditure framework that is aligned with the priorities of the municipality;
- A spatial development framework;
- Disaster management plans and
- Operational strategies.

During the IDP process, the municipality identifies a set of service delivery priorities and objectives, a set of internal transformation strategies, identified projects that contribute to the achievement of the above objectives and a financial plan. The strategic intent is captured according to the Balanced Scorecard methodology. This constitutes the premise of a good performance management system for the Municipality in order to enhance service delivery efforts. Priorities should then be clustered into five KPAs, which represent the broad development mandate of local government. These five main KPAs are described as follows in the Performance Management Guidelines for Municipalities, Draft II, followed by the description as given by CoGTA in brackets:

- Infrastructure and Services (KPA 1: Basic Service Delivery);

- Social and Economic Development (KPA 2: Local Economic Development and spatial rationale);
- Institutional Transformation (KPA 3: Municipal Transformation and Organizational Development);
- Democracy and Governance, and (KPA 4: Good Governance and Public Participation) and
- Financial management (KPA 5: Municipal Financial Viability and Management)

The priorities are, in essence, the issues that a municipality intends to focus on in order of importance to address the needs. These will vary from one area to the other. They may include programmes for water delivery, electrification, sanitation and so forth. Although the clustering on the priorities is not an easy task, it begins with the aligning of priorities with objectives and also to simplify the reporting process in terms of the strategic attainment as well as achievement of the five main KPAs.

15.18. Housing Chapter.

There is a backlog of housing across villages and that should be addressed through allocation of housing and also provision of sites for development in the municipality. There are measures in Kgapane to establish township, also in Uitspan portion to address the housing issues. The municipality has also indicated that they are in a process of accessing the strategically situated land where they intend to develop mixed income housing developments. The table below indicates a number of Allocation planned for 2026/2027 by Coghsta.

Housing allocation for the financial year 2026/2027 per ward per village.

Village/Township	Rural/ Urban	No. of Units	Housing Typologies 12			Family types in the household			
			Mud	Shacks	Blocked/milestone	Disabled	Disaster	Child headed/Orphan	Pensioner
Iketleng	Rural	04						04	05
Raselaka		01						01	04
Mohlakamosoma		02							
Maraka		01							
Rabothata		01							
Molelema		01							
Kekutine		01							
		Total: 11							
Mapalle	Rural	08		00		00	08	00	00
Shawela		06	00			00		02	04
Dichosing		06		01		01		01	03
		Total: 20							

Boshakge	Rural	03	01	01		00		00	01
Sekgothi		03	02					01	
Hlatsa		03	01			01	01		
Kgopong		02	01	01				01	
Mabulana		03		02		01			
Polaseng		03	01	01		01			
Matselapata		02						01	01
Mothobeki		01				01			
		Total: 20							

Total allocation for the Greater Letaba Municipality during the financial year 2025/2026 sits at 51 Housing Units

15.19. Conclusion on Housing Chapter

Greater Letaba Local Municipality has only one official dedicated to housing, and her main job is to coordinate housing programme and the management of the housing waiting list.

The high backlog in rural housing units proves to be a challenge to the municipality, for the following reasons:

- There is not sufficient allocation to address the backlog in the short term;
- The fact that these units will be constructed in the rural villages, will continue to perpetuate the apartheid planning in that it will not encourage any densification in the urban areas, as well as the eradication of buffer zones;
- The areas where this backlog exists are the ones that are already experiencing huge backlog in bulk infrastructure delivery – therefore adding to the current service delivery challenges; and
- Given the topography, in the rural villages, especially those in the north-eastern areas, it is also doubtful if the entire backlog can be addressed in these areas.

Another challenge that the municipality has is that of accessing well located within the urban edge so that it can help address the high demand of housing within its jurisdiction.

15.20. Land Use Management Scheme

The Land Use Management Scheme has been developed to give effect to the spatial vision. Unlike the SDF, the Land Use Management Scheme is tighter and only amended where required for a particular development. The SDF therefore informs the content of the LUMS, rather than to act as a direct source of rights and controls itself

In the rural context it will be necessary also to deal specifically with natural resource management issues, land rights and tenure arrangements, land capability, subdivision and consolidation of farms and the protection of prime agricultural land.

The purpose of the LUMS is not to infringe upon existing land rights but to control land uses. The LUMS comprises of basically the following parts systematically:

- Part I: General.
- Part II: Definitions.

- Part III: General Conditions applicable to all properties.
- Part IV: Interpretation of use zones and use of land and buildings.
- Part V: Specific conditions and development criteria applicable to use zones.
- Part VI: Special, written and temporary consent of the local municipality.
